preface

vii

one **Fitness Assessment Defined** 1

Peter J. Maud, PhD

Historical Perspectives 1 · Energy Systems Approach 3 · Health Fitness 4 · Fitness Evaluation for Athletic Participation 4 · Perceptual Motor Domain 7 · Rationale for Text Test Items 8 · Summary 8

two **Direct Determination of Aerobic Power** 9

James A. Davis, PhD

Measurement of $\dot{V}O_{2\max}$ 9 · Criteria for Achievement of $\dot{V}O_{2\max}$ 14 · Reference Values 16 · Summary 17

three **Indirect Methods for Estimation of Aerobic Power** 19

Véronique Billat, PhD · Philippe Lopes, PhD

Indirect Estimation of $\dot{V}O_{2\max}$ Using Power Output or Velocity 21 · Determination of $\dot{V}O_{2\max}$ From Speed 22 · Determination of $\dot{V}O_{2\max}$ Using Nonexercise Measurements 24 · Estimation of $\dot{V}O_{2\max}$ Using Simple Calculations and the Critical Speed Concept 26 · Estimation of $\dot{V}O_{2\max}$ Using an Estimation of the Oxygen Cost of Running and Walking 30 · Estimation of $\dot{V}O_{2\max}$ Using a Heart Rate Monitor 32 · Estimation of $\dot{V}O_{2\max}$ From the Running or Walking Ascent of a Mountain 34 · Estimation of $\dot{V}O_{2\max}$ Using HR Variability at Rest 35 · Summary 36

four **Heart Rate Variability: Measurement Methods and Practical Implications** 39

Philippe Lopes, PhD · John White, PhD

Control Mechanisms and the Conducting System 39 · Measurement Methods 41 · Practical Implications 49 · Practical Example 54 · Heart Rate Variability Measures in Coronary Heart Disease Morbidity and Mortality 56 · Summary 61

five **Blood Lactate, Respiratory, and Heart Rate Markers on the Capacity for Sustained Exercise** 63

Carl Foster, PhD · Holly M. Cotter, MS

Relationship of Blood and Muscle Lactate 64 · Practical Significance of the Anaerobic Threshold 66 · Laboratory Approaches to Measurement 66 · Laboratory Concerns With Aerobic and Anaerobic Thresholds 74 · Summary 75

six	Testing for Anaerobic Ability	77
	<i>Peter J. Maud, PhD · Joseph M. Berning, PhD · Carl Foster, PhD · Holly M. Cotter, MS · Christopher Dodge, MS · Jos J. deKoning, PhD · Floor J. Hettinga, MS · Joanne Lampen, MS</i>	
	Measurement of Peak and Mean Anaerobic Power 77 · Performance-Based Peak Anaerobic Power Tests 78 · Performance-Based Mean Anaerobic Power Tests 82 · Testing Issues 85 · Accumulated O ₂ Deficit 88 · Summary 91	
seven	The Measurement of Human Mechanical Power	93
	<i>Everett Harman, PhD</i>	
	Quantitative Foundation of Power Testing 94 · Testing Strategy and Test Results 96 · Instrumentation 97 · Specific Applications 109 · Summary 118	
eight	Strength Training: Development and Evaluation of Methodology	119
	<i>William J. Kraemer, PhD, FACSM, CSCS · Nicholas A. Ratamess, PhD, CSCS · Andrew C. Fry, PhD, CSCS · Duncan N. French, PhD, CSCS</i>	
	What Is Muscular Strength? 119 · Why Is Measurement of Strength Important? 120 · Physiological Adaptations Associated With Strength Training 121 · Testing Modalities 123 · Strength-Test Protocols for Repetition Maximums 129 · Isometric Testing 131 · Isokinetic Testing 134 · Overview of Testing Considerations 139 · Summary 149	
nine	Skeletal Muscle Structure and Function	151
	<i>Michael McGuigan, PhD · Matthew Sharman, PhD</i>	
	Skeletal Muscle Structure and Function 151 · Needle Muscle Biopsy 152 · Processing Muscle Tissue 153 · Measures of Tissue Capillarity 158 · Fiber Cross-Sectional Area 158 · Protein Quantification Through Bradford or Lowry Methods 163 · Immunohistochemistry for Steroid Receptor Analysis 165 · Western Blotting for Steroid Receptor Analysis 167 · Summary 169	
ten	The Utility of Near-Infrared Spectrophotometry in Athletic Assessment	171
	<i>Kenneth W. Rundell, PhD · Joohee Im, MS</i>	
	NIRS Instrumentation 172 · Principle of NIRS Measurement 173 · Summary 183	
eleven	Anthropometry and Body Composition Measurement	185
	<i>James E. Graves, PhD · Jill A. Kanaley, PhD · Linda Garzarella, MS · Michael L. Pollock, PhD</i>	
	Multicomponent Models 186 · Hydrostatic Weighing 188 · Air Displacement Plethysmography 193 · Anthropometry 194 · Bioelectric Impedance Analysis 206 · Ultrasound 212 · Dual-Energy Projection Methods 215 · Isotopic Dilution 218 · Magnetic Resonance Imaging and Computed Tomography 219 · Comparison Among Methods 221 · Normative Data 224 · Summary 225	

twelve	Static Techniques for the Evaluation of Joint Range of Motion and Muscle Length	227
	<i>Peter J. Maud, PhD · Kate M. Kerr, PhD, MCSP</i>	
	Rationale for Measurement of Flexibility 228 · Methods of Measurement 228 · Trunk Range of Motion 233 · Neck Range of Motion 240 · Upper Limb Range of Motion 242 · Lower Limb Range of Motion 244 · Muscle Length Tests 246 · Summary 251	
thirteen	Field Testing of Athletes	253
	<i>Carl Foster, PhD · Jack T. Daniels, PhD · Jos J. deKoning, PhD · Holly M. Cotter, MS</i>	
	General Principles for the Field Laboratory 254 · Specific Field-Test Conditions and Consideration 255 · Measurement of Hemodynamics in the Field 257 · Measurement of Blood Lactate 258 · Other Useful Items for Your Traveling Laboratory 258 · Summary 259	
	References	261
