<i>Preface</i>	xiv
Introduction	1
<b>Part I Labour Market Trends and the Theory of a New Class Schema</b>	<b>9</b>
1 Class Theorists and the Debate about the End of Class	11
2 Three Labour Market Trends and their Impact on the Employment Structure	27
3 Women, the Manual/Non-Manual Divide and the Working Class	40
4 Horizontal Divisions within the Middle Class	51
5 The Construction Logic of a New Class Schema	59
<b>Part II An Empirical Analysis of Employment Stratification</b>	<b>73</b>
6 Operationalization of the New Class Schema	75
7 The Class Structure of Britain, Germany, Sweden and Switzerland	85
8 The Distribution of Advantage within the Class Schema: Work Income and Promotion Prospects	94
9 Structural Divisions within the Class Schema: Firm Size, Public Sector Employment and Party Support	107
10 Collapsed Versions of the Detailed Class Schema	124
<b>Part III Class and the Concept of Institutional Embeddedness</b>	<b>135</b>
11 Introducing Institutions: the Concept of Institutional Embeddedness	137
12 Class Differences in Pension System Integration	144
13 Class Differences in Trade Union Membership	160
14 Class Differences in Political Citizenship and Electoral Participation	179
15 Cumulative Differences in Institutional Embeddedness	197
Concluding Summary	209

<b>Statistical Annexes</b>	<b>222</b>
<i>Notes</i>	<b>232</b>
<i>References</i>	<b>239</b>

# List of Tables

1.1	The Wright class schema based on exploitation	15
1.2	The size of the working class according to the Wright class schema	16
1.3	The expanded Erikson and Goldthorpe class schema	23
5.1	The dimensions at the basis of the three different work logics of wage-earners	64
5.2	The detailed 17-class schema (and collapsed 8-class) based on four different work logics	68
6.1	Data sets and sample size	76
6.2	Operationalization of the class schema	79
6.3	Britain 1999 (BHPS): Most frequent professions in each class (ISCO-4-digit level)	82
7.1	Britain 1999: Total distribution across classes in %; in parentheses: women's share within each class in %	88
7.2	Germany 2000: Total distribution across classes in %; in parentheses: women's share within each class in %	88
7.3	Sweden 2000: Total distribution across classes in %; in parentheses: women's share within each class in %	89
7.4	Switzerland 1999: Total distribution across classes in %; in parentheses: women's share within each class in %	89
8.1	Britain 1999: Median gross work income per month	96
8.2	Germany 2000: Median gross work income per month	96
8.3	Sweden 2000: Median gross work income per month	96
8.4	Switzerland 1999: Median gross work income per month	96
8.5	Britain 1999: Relative differences in earnings	99
8.6	Germany 2000: Relative differences in earnings	99
8.7	Sweden 2000: Relative differences in earnings	99
8.8	Switzerland 1999: Relative differences in earnings	99
8.9	Britain 1999: Promotion opportunities in current job	104
8.10	Germany 2000: Can improve career through further education	104
8.11	Sweden 2000: Has some chances of promotion	104
8.12	Switzerland 1999: Has some chances of promotion	104
9.1	Britain 1999: Individuals working in a large company (>100) as multiple of individuals working in a small company (<25)	108
9.2	Germany 2000: Individuals working in a large company (>100) as multiple of individuals working in a small company (<20)	108

9.3	Switzerland 1999: Individuals working in a large company (>100) as multiple of individuals working in a small company (<25)	108
9.4	Britain 1999: Share of individuals employed in a public organization	111
9.5	Germany 2000: Share of individuals employed in the civil service	111
9.6	Sweden 2000: Share of individuals employed in a public entity/administration	111
9.7	Switzerland 1999: Share of individuals employed in a public entity/administration	111
9.8	Britain 1999: Feels closest to party on the left	115
9.9	Germany 2000: Feels closest to party on the left	115
9.10	Switzerland 1999: Would vote for party on the left	115
9.11	Sweden 2000: Leftist political preferences	115
9.12	Britain 1999: Feels closest to Liberal Democrats	118
9.13	Germany 2000: Feels closest to Green Party	118
9.14	Estimates for the odds of supporting a given party	121
10.1	The collapsed 8-class schema	125
10.2	Total distribution across the 8-class schema	126
10.3	Median monthly work income within 8-class schema	127
10.4	Support for a political party on the left	128
10.5	Collapsed 6-class schema, following Erikson and Goldthorpe	132
10.6	Total distribution across classes, monthly median work income, left party support and public employment	133
12.1	Characteristic dimensions of the three welfare regimes	145
12.2	The reduced 15-class schema	153
12.3	Britain 1999: Coverage with an occupational scheme	153
12.4	Britain 1999: Estimates for the odds of coverage with an occupational or a personal pension	155
12.5	Switzerland 1999: Integration into the second-tier pension system	157
12.6	Germany 1997: Share of individuals rating their financial security when elderly as bad or very bad	158
13.1	National characteristics of the union structure and collective bargaining in 2000	163
13.2	The evolution of membership in trade unions (and professional associations)	165
13.3	11-class schema (including wage-earner classes only)	167
13.4	Britain 1999: Union membership by sex	170
13.5	Germany 1998: Union membership by sex	170
13.6	Sweden 2000: Union membership by sex	170
13.7	Switzerland 1999: Union membership by sex	170

13.8	Estimates for the odds of union membership	176
13.9	The probability of being a union member for four emblematic profiles of wage-earners	178
14.1	The 15-class schema used in this section	181
14.2	Germany 2000: Share of non-German nationals	182
14.3	Sweden 2000: Share of non-Swedish nationals	182
14.4	Switzerland 1999: Share of non-Swiss nationals	182
14.5	Sweden 2000: Share of individuals who did not vote in 1998 parliamentary elections	185
14.6	Switzerland 1999: Share of individuals who would not vote in case of elections held tomorrow	185
14.7	Estimates for the odds of electoral participation	188
14.8	Share of individuals earning more than 1.5/less than 0.66 times the median work income	195
15.1	Estimates for the odds of coverage with a second-tier occupational pension	206
A.1	ISCO-1988 codes of each class (identical for British, German and Swiss samples)	222
A.2	NYK-1983 codes of each class (used for Swedish sample)	223
A.3	Female odds ratios: the probability of women being in a given class as compared to the probability of men being in the same class	225
A.4	Mean weekly working hours	226
A.5	Britain 1999: Median monthly gross work income for men and women	227
A.6	Germany 2000: Median monthly gross work income for men and women	227
A.7	Sweden 2000: Median monthly gross work income for men and women	227
A.8	Switzerland 1999: Median monthly gross work income for men and women	228
A.9	Germany 2000: Feels closest to Social-democratic Party (SPD)	228
A.10	Britain 1999: Union membership by age category	229
A.11	Germany 1998: Union membership by age category	229
A.12	Sweden 2000: Union membership by age category	229
A.13	Switzerland 1999: Union membership by age category	229
A.14	Britain 1999: Union membership by company size	230
A.15	Germany 1998: Union membership by company size	230
A.16	Switzerland 1999: Union membership by company size	230
A.17	OLS-regression for political interest, Switzerland 1999	231

# List of Figures

1.1	Bourdieu's space of social positions (simplified and adapted [1984: 128–9])	18
1.2	Overview of Part I: a theoretical review of labour market stratification	26
2.1	Employment shifts in industry and the services between 1970 and 2000	30
2.2	The rise in women's labour market participation, 1970–2000	33
2.3	Subtracting the share of <i>female service jobs</i> from the share of <i>male industrial jobs</i> (as part of total employment), 1970–2000	34
2.4	The evolution of professional and managerial occupations as compared to craft, production and elementary occupations, 1991–2001	38
6.1	Overview of Part II: an empirical analysis of labour market stratification	81
7.1	Distribution of total employment across the four work logics	85
7.2	Distribution of total employment across the four hierarchical levels	86
7.3	Female odds ratios: the probability of women being in a given work logic as compared to the probability of men being in the same work logic (equal probability = 1)	92
8.1	Wage premium associated with being in a given class as compared to the routine service class in %	100
8.2	Mean age of the different hierarchical levels (employees only)	106
9.1	Share of employees working in a large company (>100) according to work logic and gender	109
9.2	Cleavage in support for a party on the left within the middle class for the youngest cohort and the oldest cohort of economically active individuals	119
10.1	Party support among economically active individuals, Britain 1999	129
10.2	Party support among economically active individuals, Germany 2000	130
10.3	Party support among economically active individuals, Switzerland 1999	130
11.1	The relationship between employment stratification and the concept of institutional embeddedness	142
12.1	Coverage with occupational and/or personal pensions, Britain 1999	154
13.1	Trade union density of different classes	168

13.2	Union density by class and by ownership sector	174
14.1	Class position and political interest, Switzerland 1999	191
14.2	Educational attainment and different measures of political attitude, Switzerland 1999	191
14.3	Share of foreigners and abstainers in the total of each class, Sweden 2000	193
14.4	Share of foreigners and abstainers in the total of each class, Switzerland 1999	193
15.1	Union membership among different categories of wage-earners	199
15.2	Electoral abstention of union members and non-union members, wage-earners only	200
15.3	Perceiving financial security in old-age as being very bad, and nationality, Germany 1997	202
15.4	Lacking coverage with a second-tier pension, and nationality, Switzerland 1999	203
15.5	Not covered by a second-tier occupational pension, union members and non-members, Britain 1999	205
15.6	Not covered by second-tier pension, by nationality and union membership, Switzerland 1999	207
C.1	Share of women within each of the four classes	211
C.2	Monthly gross work income	212
C.3	Class differences in pension coverage	214
C.4	Left support	216
C.5	Electoral abstention	217
C.6	Trade union membership	218
