

Table of Contents

Preface

Part One Basic Ideas and Historical Background 1

1	The Nature of Urban Areas	2
	What Are Urban Areas?	3
	Note on Statistical Data	5
	Why Urban Areas?	7
	Scale Economies, Input Substitution, and Urban Areas	8
	Agglomeration Economies	20
	Limits to Urban Size	21
	Preindustrial Cities in the United States	21
	Preindustrial Cities Elsewhere	22
	Industrialization	23
	Industrialization in the United States	24
	Steel	26
	Construction Innovations	26
	Subways and Electric Trolleys	27
	Electric Power	29
	Internal Combustion Engines	29
	Summary	30
	Questions and Problems	31
	References and Further Reading	31
2	Comparative Advantage and Regions	33
	Theoretical Principles of Interregional Firm Location Decisions	33
	Determinants of Firm Location When Regions Differ	35
	Footloose Industries and Amenity Orientation	38
	Regions and Regional Shifts in the United States, 1790 to 1990	39
	Colonial Times	39
	Early Development	40
	The Railroad Era and Beyond	43
	Summary	51
	Questions and Problems	52
	References and Further Reading	52

3 Urbanization and Economic Growth in the United States 54

A Digression on Disease	54
Long-Term Trends	56
Recent Trends	60
National Employment	60
MSA Population	61
MSA Employment	62
MSA Manufacturing Employment	65
Summary	70
Questions and Problems	71
References and Further Reading	71

4 Trends in Sizes and Structures of Urban Areas 72

Sizes of U.S. Urban Areas	73
Estimates of MSA Size Distributions	77
Suburbanization	81
Summary	85
Questions and Problems	86
References and Further Reading	86

Part Two Theoretical Foundations 88

5 Introducing Land and Land Rents into Price Theory 89

Some Terms	90
Theory of Land Rent and Land Use	91
Welfare and Ethical Aspects of Land Rent	94
Summary	98
Questions and Problems	99
References and Further Reading	99

6 Theoretical Analysis of Urban Structure 100

Urban Area with a Single Industry	101
Production Conditions	101
Market Equilibrium Conditions	104
Households in an Urban Spatial Context	105
Assumptions of the Model	107
Implications of the Model	109
Several Urban Sectors	112
Two Production Sectors	112
Households and Production Sectors	115
Firm and Household Location with Decentralized Employment	117
Equilibrium with Other Cities: The Open-City Model	121

Comparative Statics: The Equilibrium Effects of Changes in Income and Transport Cost	123
Rise in Income	123
Transport Cost	124
Realistic Urban-Location Patterns and Urban-Simulation Models	127
Summary	129
Questions and Problems	129
References and Further Reading	130

7 A Critical Examination of the Model 131

Statistical Evidence	131
Evidence	134
Conclusion	144
Criticisms and Extensions	145
Rural-Urban Boundary	147
Speculation	148
Topography	151
Summary	152
Questions and Problems	152
References and Further Reading	153

8 Welfare Economics and Urban Problems 155

What Is Welfare Economics?	155
Criteria of Economic Performance	157
Conditions for Economic Efficiency	158
Pure Consumption Model	158
Production-Consumption Model	161
Variable Input/Output Model	164
Some Causes of Resource Misallocation	167
Monopoly and Monopsony	167
External Economies and Diseconomies	167
Externalities in an Urban Context	169
Taxes	170
Summary	173
Questions and Problems	173
References and Further Reading	174

Part Three Urban Problems and the Public Sector 175

9 The Problem of Poverty 176

Measures of Poverty	177
Demography of Poverty	179

Race and Poverty	183	
Public Programs for Reducing Poverty	185	185
Macroeconomic Policies	185	
Income-Maintenance Policies: Theory	186	186
Redistribution Programs in the United States	188	188
Income-Maintenance Policies: Facts and Institutions	189	
Further Possible Steps for Reducing Poverty	193	
Summary	194	
Questions and Problems	194	
References and Further Reading	195	

10 The Market for Housing 196

Quantity and Price Measures for Housing	197	
Quantity	197	
Price	199	
Relationship Between Value Price and Rental Price	199	
Cost of Capital: Complications	202	
Inflation	202	
Federal Income Taxation	204	
Inflation and Income Taxation Combined	205	205
The Market for Housing	206	
Demand for Housing	206	
Empirical Estimates of Demand for Housing	207	207
Housing Supply	209	
Market Equilibrium	211	
Development Industry	213	
Stock of Housing	215	
Summary	217	
Questions and Problems	218	
References and Further Reading	218	

11 Housing Finance and Investment 220

Defining Some Terms	221	
Housing Ownership Forms and Finance	222	222
Ownership Forms	222	
Housing Finance	222	
Secondary Mortgage Markets	227	227
Taxation of Housing	228	
Rental Housing	229	
Owner-Occupied Housing	230	230
Comparison	230	
Is Owner-Occupancy a Good Investment?	232	232
Summary	237	

Questions and Problems	237
References and Further Reading	238

12 **Housing Problems and Policies** 239

Housing Problems	243
Abandonment	246
An Economic Decision	247
Some Effects of Abandonment	250
Filtering	251
Neighborhood Effects	252
Slums and Neighborhood Effects	252
Neighborhood Effects in Stable Neighborhoods	254
Neighborhood Attachment	255
Racial Segregation and Discrimination	256
Segregation	257
Discrimination	259
Homelessness	263
Housing Policies	264
Owner-Occupied Housing	264
Housing the Poor	265
Why Subsidize Housing?	271
Summary	273
Questions and Problems	273
References and Further Reading	275

13 **Urban Transportation** 278

Personal Transport	279
Trends in Urban Transportation	280
Demand for Urban Transportation	284
Congestion and Pricing	287
Short-Run Issues	287
Long-Run Issues	290
Spatial Variation in Optimum Congestion	293
Realistic Pricing Possibilities	294
Cost and Supply of Urban Transit	297
Automobile	298
Bus and Subway	298
Comparative Costs	299
Effects of Transportation on Urban Structure	305
Transportation and Urban Poverty	307
Urban Freight Transport	308
Private Costs	308
External Costs	309
Summary	311

	Questions and Problems	312
	References and Further Reading	314
14	Local Government	315
	System of State and Local Governments	315
	Finance	316
	Trends in State and Local Finance	316
	Overview of Big-City Finances	323
	Reasons for Central-City Fiscal Problems	327
	Goods and Services	334
	Goods Provided by Local Governments	335
	Tiebout Hypothesis	338
	Some Special Problems of Education	347
	Police Protection and Crime	360
	Regulation	361
	Regulated Enterprises	361
	Land-Use Regulation	362
	Summary	366
	Questions and Problems	367
	References and Further Reading	367
15	Pollution and Environmental Quality	370
	Facts, Institutions, and Basic Economics	371
	What Is Pollution?	371
	Materials Balance	372
	Amounts and Effects of Pollutants	376
	Alternative Environmental Policies of the Government	384
	Environmental Amenities and Urban Economics	391
	High Density	391
	Amenities, Rents, Wages, and Location	392
	Summary	396
	Questions and Problems	397
	References and Further Reading	397
16	Sizes and Structures of Urban Areas	399
	Size Distribution of Urban Areas	400
	Theory	400
	Policy Questions	403
	Suburbanization	406
	Interurban Variation	408
	Historical Trends and International Comparisons	410
	Market Failure?	411
	City-Suburban Income Differences	417
	Return-to-the-City Movement	418

	Central-City Population Loss	422	
	The Economic Decline of Central Cities		424
	Summary	429	
	Questions and Problems	430	
	References and Further Reading	430	
17	Urbanization in Developing Countries		433
	Characteristics of Developing Countries		434
	Income	434	
	Income Growth	434	
	Population Growth	435	
	Level of Urbanization	435	
	Implications of Urbanization	438	
	Growth of Population	438	
	Size of the Urban Sector	439	
	Poverty and Income Distribution		445
	Housing	451	
	Slums and Squatters	452	
	Urbanization and Capital Investment Needs		455
	Summary	456	
	Questions and Problems	457	
	References and Further Reading	457	
	Appendix Regression Analysis		459
	Acknowledgments	462	
	Index	463
