

# Contents

1 Introduction.....	1
1.1 Smith Zeros and Decoupling Zeros.....	2
1.2 Scope of the Book.....	5
1.3 Glossary of Symbols.....	7
2 Zeros and the Output-Zeroing Problem.....	9
2.1 Definitions of Zeros.....	9
2.2 Decoupling Zeros.....	13
2.3 Invariant and Transmission Zeros.....	18
2.4 The Output-Zeroing Problem.....	21
2.5 Invariant Zeros and Output-Zeroing Inputs.....	25
2.6 Relationships Between Smith and Invariant Zeros.....	36
2.7 Algebraic Criteria of Degeneracy.....	45
2.8 Exercises.....	53
3 A General Solution to the Output-Zeroing Problem.....	65
3.1 Preliminary Characterization of Invariant Zeros.....	65
3.1.1 Invariant Zeros in Proper Systems.....	66
3.1.2 Invariant Zeros in Strictly Proper Systems.....	67
3.2 Output-Zeroing Inputs.....	71
3.2.1 Output-Zeroing Inputs for Proper Systems.....	73
3.2.2 Output-Zeroing Inputs for Strictly Proper Systems.....	80
3.3 Exercises.....	91
4 The Moore-Penrose Inverse of the First Markov Parameter.....	107
4.1 System Zeros in Strictly Proper Systems.....	107
4.1.1 Decoupling and Transmission Zeros.....	109
4.1.2 First Markov Parameter of Full Rank.....	112
4.2 System Zeros in Proper Systems.....	120
4.2.1 Decoupling and Transmission Zeros.....	121
4.2.2 Proper Systems with Matrix D of Full Rank.....	122
4.3 Systems with Vector Relative Degree.....	128
4.4 Exercises.....	137

---

5 Singular Value Decomposition of the First Markov Parameter.....	149
5.1 Invariant and Smith Zeros in Strictly Proper Systems.....	151
5.2 A Procedure for Computing Zeros of Strictly Proper Systems..	165
5.3 Invariant and Smith Zeros in Proper Systems.....	173
5.4 A Procedure for Computing Zeros of Proper Systems.....	186
5.5 Exercises.....	192
6 Output-Nulling Subspaces in Strictly Proper Systems.....	197
6.1 Systems with the Identically Zero Transfer-Function Matrix....	198
6.2 First Markov Parameter of Full Column Rank.....	204
6.3 Invariant Subspaces.....	208
6.4 SVD and the Output-Zeroing Problem.....	222
6.5 Zeros, Output-Nulling Subspaces and Zero Dynamics.....	231
6.6 Exercises.....	237
7 Output-Nulling Subspaces in Proper Systems.....	245
7.1 Matrix D of Full Column Rank.....	245
7.2 Invariant Subspaces.....	249
7.3 SVD and the Output-Zeroing Problem.....	260
7.4 Zeros, Output-Nulling Subspaces and Zero Dynamics.....	267
7.5 Exercises.....	269
8 Singular Systems.....	271
8.1 Definitions of Zeros.....	271
8.2 Relationships Between Invariant and Smith Zeros.....	274
8.3 Sufficient and Necessary Condition for Degeneracy.....	274
8.4 Zeros and SVD of Matrix E.....	275
8.4.1 Invariant Zeros.....	276
8.4.2 Output Decoupling Zeros.....	279
8.4.3 Input Decoupling Zeros.....	280
8.5 Markov Parameters and the Weierstrass Canonical Form.....	281
8.6 Invariant Zeros and the First Markov Parameter.....	283
8.6.1 First Markov Parameter of Full Column Rank.....	287
8.6.2 SVD of the First Markov Parameter.....	290
8.7 Exercises.....	295
Epilogue.....	297
Appendix.....	299
A Appendix A.....	299
A.1 Reachability and Observability.....	299
A.2 Canonical Decomposition of the State Space.....	302

---

B Appendix B.....	305
B.1 The Moore-Penrose Inverse of a Matrix.....	305
B.2 Singular Value Decomposition of a Matrix.....	308
B.3 Endomorphisms of a Linear Space over $C$ .....	309
C Appendix C.....	312
C.1 Polynomial and Rational Matrices.....	312
References.....	317
Index.....	323
