<b>Contributors</b>	<b>ix</b>
<b>Preface</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Optical Fibers . . . . .	2
1.2 Raman Amplification . . . . .	4
1.3 Advantages of Raman Amplification . . . . .	9
1.3.1 Improved Noise Figure . . . . .	9
1.3.2 Improved Gain Flatness . . . . .	11
1.4 Concerns in Raman Amplification . . . . .	14
1.4.1 Multipath Interference . . . . .	14
1.4.2 Pump Noise Transfer to the Signal . . . . .	15
1.4.3 Noise Figure Tilt . . . . .	17
1.5 Advanced Concepts in Raman Amplification . . . . .	17
1.5.1 Bidirectional Pumping . . . . .	19
1.5.2 Higher Order Pumping . . . . .	19
1.5.3 Frequency Modulated Pumps . . . . .	20
1.5.4 Broadband Spectral Width Pump Sources . . . . .	22
1.6 Pump Sources . . . . .	22
1.6.1 Diode Lasers . . . . .	23
1.6.2 Raman Fiber Lasers . . . . .	24
1.7 Summary of Chapters . . . . .	25
References . . . . .	27
<b>2 Theory of Raman Amplifiers</b>	<b>33</b>
2.1 Pump and Signal Equations . . . . .	34
2.1.1 Raman Gain Spectrum . . . . .	36
2.1.2 Single-Pump Raman Amplification . . . . .	39
2.1.3 Multiple-Pump Raman Amplification . . . . .	47
2.2 Performance Limiting Factors . . . . .	51
2.2.1 Spontaneous Raman Scattering . . . . .	52
2.2.2 Rayleigh Backscattering . . . . .	59
2.2.3 Pump-Noise Transfer . . . . .	63

2.3	Effects of Polarization-Mode Dispersion . . . . .	66
2.3.1	Vector Theory of Raman Amplification . . . . .	67
2.3.2	Average Raman Gain and Signal Fluctuations . . . . .	72
2.3.3	Probability Distribution of Amplified Signal . . . . .	76
2.3.4	Polarization-Dependent Gain . . . . .	79
2.4	Ultrafast Raman Amplification . . . . .	83
2.4.1	Pulse-Propagation Equations . . . . .	84
2.4.2	Effects of Group-Velocity Mismatch . . . . .	88
2.4.3	Anomalous-Dispersion Regime . . . . .	93
2.4.4	Normal-Dispersion Regime . . . . .	95
	References . . . . .	97
<b>3</b>	<b>Distributed Raman Amplifiers</b>	<b>103</b>
3.1	Benefits of Distributed Raman Amplification . . . . .	105
3.1.1	Upgradability . . . . .	106
3.1.2	Noise Improvements in Repeatered Systems . . . . .	107
3.1.3	Bandwidth/Flatness . . . . .	108
3.1.4	Gain at Any Wavelength . . . . .	109
3.2	Beneficial Characteristics of Distributed Raman Amplifiers . . . . .	109
3.2.1	General Benefits from the Raman Scattering Process . . . . .	110
3.2.2	Noise Properties of Distributed Raman Amplifiers . . . . .	114
3.3	Challenging Characteristics of Distributed Raman Amplifiers . . . . .	120
3.3.1	Nonlinearities . . . . .	124
3.3.2	Rayleigh Reflections . . . . .	132
3.3.3	Time Response . . . . .	140
3.4	Backward Pumping . . . . .	149
3.4.1	Wavelength Multiplexing of Pumps . . . . .	150
3.4.2	Broadened Pumps . . . . .	152
3.4.3	Time-Division-Multiplexed Pumps . . . . .	154
3.5	Advanced Pumping Configurations . . . . .	156
3.5.1	Higher Order Pumping . . . . .	157
3.5.2	Quiet Pumps . . . . .	159
3.6	Summary . . . . .	162
	References . . . . .	163
<b>4</b>	<b>Discrete Raman Amplifiers</b>	<b>169</b>
4.1	Basic Configuration and Its Model . . . . .	169
4.1.1	Single-Pump Amplification . . . . .	172
4.1.2	Multiple-Pump Amplification . . . . .	174
4.1.3	Nonlinear Phase Shift . . . . .	175
4.2	Gain Fibers and Material . . . . .	176

4.2.1	Raman Properties of Germano-Silicate Fibers . . . . .	177
4.2.2	Raman Properties of Other Fiber Materials . . . . .	178
4.3	Design Issues of Discrete Raman Amplifier . . . . .	180
4.3.1	Maximum Raman Gain as a Function of Fiber Length . . . . .	180
4.3.2	Figure of Merit of Gain Fiber . . . . .	182
4.3.3	Efficiency and Linearity . . . . .	183
4.3.4	Pump-Mediated Noise . . . . .	186
4.3.5	ASE Noise Figure . . . . .	188
4.3.6	Nonlinear Effects and Double Rayleigh Backscattering Noise . . . . .	191
4.3.7	Optimum Fiber Length and Number of Stages . . . . .	192
4.3.8	Transient Effects . . . . .	194
4.4	Dispersion-Compensating Raman Amplifiers . . . . .	197
4.4.1	Dispersion-Compensating Fiber . . . . .	197
4.4.2	DCF as a Raman Gain Fiber . . . . .	199
4.5	Wideband Operation by WDM Pumping . . . . .	201
4.5.1	Wide Flat Composite Gain . . . . .	202
4.5.2	Pump SRS Tilt—Effect of Saturation . . . . .	205
4.5.3	Signal SRS Tilt—How to Define Gain . . . . .	205
4.5.4	Control of Gain . . . . .	206
4.5.5	Flattening Other Parameters . . . . .	206
References	. . . . .	209
<b>5</b>	<b>System Impairments</b>	<b>215</b>
5.1	Introduction . . . . .	215
5.2	Pump Noise Transfer . . . . .	216
5.2.1	Relative Intensity Noise . . . . .	216
5.2.2	Undepleted Model . . . . .	220
5.2.3	Performance Degradation Due to RIN . . . . .	235
5.2.4	Impact of Pump Depletion . . . . .	238
5.2.5	Measurements of RIN Transfer . . . . .	240
5.2.6	Low RIN Pump Laser Technologies . . . . .	242
5.2.7	Summary . . . . .	246
5.3	Multipath Interference Penalties . . . . .	249
5.3.1	Analysis . . . . .	250
5.3.2	Measurement of DRS Noise . . . . .	256
5.3.3	MPI Suppression . . . . .	261
5.3.4	Summary . . . . .	263
5.3.5	Appendix . . . . .	263
References	. . . . .	264

<b>6 Semiconductor Pump Lasers</b>	<b>267</b>
6.1 Technology Basis of High-Power Semiconductor Lasers . . . . .	267
6.1.1 High-Power Semiconductor Laser Module . . . . .	268
6.1.2 Fundamentals of High-Power Semiconductor Laser Chip . . . . .	269
6.1.3 Other Approaches to High-Power Pump Laser . . . . .	278
6.1.4 Heat Exhaustion of the Laser Chip . . . . .	281
6.1.5 Optical Coupling System . . . . .	282
6.1.6 Performance of 14xx-nm Pump Lasers . . . . .	283
6.2 Semiconductor Pump Lasers for Raman Amplifiers . . . . .	286
6.2.1 Fiber Bragg Grating Lasers . . . . .	287
6.2.2 Fabry-Perot Lasers . . . . .	293
6.2.3 Inner-Grating Multimode Lasers . . . . .	294
6.2.4 Hybrid Pump . . . . .	297
References . . . . .	300
<b>7 Cascaded Raman Resonators</b>	<b>303</b>
7.1 Overview . . . . .	304
7.1.1 Pump Laser . . . . .	307
7.1.2 Raman Fiber . . . . .	313
7.1.3 Fiber Bragg Gratings . . . . .	317
7.2 Design of a Cascaded Raman Resonator . . . . .	323
7.2.1 Optimization of Fiber Length, Output Coupler Reflectivity, and Splice Loss . . . . .	325
7.2.2 Fiber Type and Pump Wavelength Optimization . . . . .	330
7.2.3 Linewidth Considerations . . . . .	332
7.2.4 Noise Properties . . . . .	339
7.3 Multiple Wavelength Cascaded Raman Resonators . . . . .	340
7.3.1 Obtainable Operating Points . . . . .	347
7.3.2 Operating Point Stability . . . . .	352
7.3.3 Temporal Behavior of a MWRFL . . . . .	353
7.3.4 Six-Wavelength Raman Fiber Lasers . . . . .	355
7.3.5 Second-Order Raman Fiber Lasers . . . . .	357
References . . . . .	361
