Invited Contributions

A Methodology for Estimating Interdomain Web Traffic	7
<i>Anja Feldmann, Nils Kammenhuber, Olaf Maennel, Bruce Maggs, Roberto De Prisco, Ravi Sundaram</i>	
The Role and Impact of Distribution in Software and Systems Engineering	13
<i>Manfred Broy</i>	
Large Networks and the Price of Anarchy or Stability	23
<i>Èva Tardos</i>	
Algorithmic Issues in Coalitional and Dynamic Network Games	25
<i>Dimitris Fotakis, Spyros Kontogiannis, Panagiota Panagopoulou, Christoforos Raptopoulos, Paul Spirakis</i>	
Towards a Paradigm for Robust Distributed Algorithms and Data Structures	43
<i>Christian Scheideler</i>	
Adaptive Routing with Methods from Evolutionary Game Theory	57
<i>Simon Fischer, Berthold Vöcking</i>	
Parallel Computation of Three-Dimensional Flows on Unstructured Grids	63
<i>Stephan Blazy, Oliver Marquardt</i>	
Semantic Blueprints of Discrete Dynamic Systems: Challenges and Needs in Computational Modeling of Complex Behavior	81
<i>Roozbeh Farahbod and Uwe Glässer</i>	
Mapping of Nested Loop Programs onto Massively Parallel Processor Arrays with Memory and I/O Constraints	97
<i>Hritam Dutta, Frank Hannig, and Jürgen Teich</i>	
Using Distributed Systems for an Efficient Real-Time Control of Mixed-Model Assembly Lines	121
<i>Stefan Bock</i>	

Goals and Achievements of the CRC 376

The Collaborative Research Centre 376: Massively Parallel Computing: Algorithms, Design Methods, Applications	135
<i>Friedhelm Meyer auf der Heide</i>	
Efficient Parallel Algorithms	137
<i>Olaf Bonorden, Joachim Gehweiler, Friedhelm Meyer auf der Heide, Bettina Rehberg</i>	
Universal Basic Services for Parallel Systems	154
<i>Marcin Bienkowski, Martin Gairing, Georg Kliewer, Friedhelm Meyer auf der Heide and Burkhard Monien</i>	

On Balancing of Dynamic Networks	171
<i>Burkhard Monien, Stefan Schamberger, Ulf-Peter Schroeder, Henning Meyerhenke</i>	
Design Methods for Massively Parallel Real-Time Systems	182
<i>Willi Richert, Franz J. Rammig, Bernd Kleinjohann, Dania A. El-Kebbe</i>	
Intersection Management as Self-Organisation of Mechatronic Systems	198
<i>Torsten Bruns, Eckehard Münch</i>	
Controlling and Coordinating Supply Networks in Real-Time	214
<i>Stefan Bock, Andre Döring, Thomas van Brackel</i>	
Directional Communication in Mobile Ad Hoc Networks	225
<i>Matthias Grünewald, Friedhelm Meyer auf der Heide, Ulrich Rückert, Stefan Rührup, Christian Schindelhauer, Klaus Volbert</i>	
Efficient Control of Formation Flying Spacecraft	235
<i>Michael Dellnitz, Oliver Junge, Arvind Krishnamurthy, Sina Ober-Blöbaum, Kathrin Padberg, Robert Preis</i>	
Self-Coordinating Systems: The Next Challenge in Research on Distributed Systems . . .	248
<i>Franz J. Rammig, Wilhelm Dangelmaier, Holger Karl, Bärbel Mertsching, Friedhelm Meyer auf der Heide, Ansgar Trächtler</i>
