

Contents

This table of contents is also a bibliography of the collected papers. It is ordered according to topics, and is chronological within each division.

THESIS

1. Quadratische Körper im Gebiet der höheren Kongruenzen I, II,
Math. Zeitschrift 19 (1924) pp. 153-246 1

CLASS FIELD THEORY

2. Über die Zetafunktionen gewisser algebraischer Zahlkörper,
Math. Ann. 89 (1923) pp. 147-156 95
3. Über eine neue Art von L -Reihen,
Hamb. Abb. (1923) pp. 89-108 105
4. Über den zweiten Ergänzungssatz zum Reziprozitätsgesetz der l -ten
Potenzreste im Körper k_f der l -ten Einheitswurzeln und in Oberkörpern
von k_f (with H. Hasse),
J. reine angew. Math. (1925) pp. 143-148 125
5. Beweis des allgemeinen Reziprozitätsgesetzes,
Hamb. Abb. 5 (1927) pp. 353-363 131
6. Die beiden Ergänzungssätze zum Reziprozitätsgesetz der l^n -ten Potenzreste
im Körper der l^n -ten Einheitswurzeln (with H. Hasse),
Hamb. Abb. 6 (1928) pp. 146-162 142
7. Idealklassen in Oberkörpern und allgemeines Reziprozitätsgesetz,
Hamb. Abb. 7 (1929) pp. 46-51 159
8. Zur Theorie der L -Reihen mit allgemeinen Gruppencharakteren,
Hamb. Abb. 8 (1930) pp. 292-306 165
9. Die gruppentheoretische Struktur der Diskriminanten algebraischer
Zahlkörper,
J. reine angew. Math. 164 (1931) pp. 1-11 180

ALGEBRAIC NUMBER THEORY

10. Über Einheiten relativ galoisscher Zahlkörper,
J. reine angew. Math. (1932) pp. 153-156 195
11. Über die Bewertungen algebraischer Zahlkörper,
J. reine angew. Math. (1932) pp. 157-159 199

12. Axiomatic Characterization of Fields by the Product Formula for Valuations (with G. Whaples), <i>Bulletin Am. Math. Soc.</i> 51 (1945) pp. 469-492	202
13. A Note on Axiomatic Characterization of Fields (with G. Whaples), <i>Bulletin Am. Math. Soc.</i> 52 (1946) pp. 245-247	226
14. Questions de base minimale dans la théorie des nombres algébriques, <i>Colloque international du CNRS</i> , Paris (1950) pp. 19-20	229
15. The Class-Number of Real Quadratic Fields (with N. C. Ankeny and S. Chowla), <i>Proc. Nat. Acad. Sci. USA</i> 37 (1951) pp. 524-525	232
16. The Class-Number of Real Quadratic Number Fields (with N. C. Ankeny and S. Chowla), <i>Annals of Mathematics</i> 56 (1952) pp. 479-493	234
17. Representatives of the Connected Component of the Idèle Class Group <i>Proc. International Symposium on Algebraic Number Theory</i> , Tokyo (1955) pp. 51-54	249

REAL FIELDS

18. Kennzeichnung des Körpers der reellen algebraischen Zahlen, <i>Hamb. Abb.</i> 3 (1924) pp. 319-323	253
19. Algebraische Konstruktion reeller Körper (with O. Schreier), <i>Hamb. Abb.</i> 5 (1926) pp. 85-99	258
20. Über die Zerlegung definiter Funktionen in Quadrate, <i>Hamb. Abb.</i> 5 (1927) pp. 100-115	273
21. Eine Kennzeichnung der reell abgeschlossenen Körper (with O. Schreier), <i>Hamb. Abb.</i> 5 (1927) pp. 225-231	289

ALGEBRA AND NUMBER THEORY

22. Die Erhaltung der Kettensätze der Idealtheorie bei beliebigen endlichen Körpererweiterungen (with B. L. van der Waerden), <i>Nachr. Ges. Wiss. Göttingen</i> (1926) pp. 23-27	296
23. Über einen Satz von Herrn J. H. Maclagan Wedderburn, <i>Hamb. Abb.</i> 5 (1928) pp. 245-250	301
24. Zur Theorie der hyperkomplexen Zahlen, <i>Hamb. Abb.</i> 5 (1928) pp. 251-260	307
25. Zur Arithmetik hyperkomplexer Zahlen, <i>Hamb. Abb.</i> 5 (1928) pp. 261-289	317
26. On the Sums of Two Sets of Integers (with P. Scherk), <i>Annals of Mathematics</i> 44 (1943) pp. 138-142	346
27. The Theory of Simple Rings (with G. Whaples), <i>Am. J. Math.</i> 65 (1943) pp. 87-107	351

28. The Free Product of Groups, <i>Am. J. Math.</i> 69 (1947) pp. 1-4	372
29. Linear Mappings and the Existence of a Normal Basis, <i>Volume for Courant's 60th birthday</i> , Interscience (1948) pp. 1-5	376
30. Remarques concernant la théorie de Galois, <i>Colloque international du CNRS</i> , Paris (1950) pp. 161-162	380
31. A Note on Finite Ring Extensions (with J. T. Tate), <i>J. Math. Soc. Japan</i> 3 (1951) pp. 74-77	383
32. The Orders of the Linear Groups, <i>Communications on Pure and Applied Math.</i> 8 (1955) pp. 355-365	387
33. The Orders of the Classical Simple Groups, <i>Communications on Pure and Applied Math.</i> 8 (1955) pp. 455-472	398

TOPOLOGY

34. Theorie der Zöpfe, <i>Hamb. Abh.</i> 4 (1925) pp. 47-72	416
35. Zur Isotopie zweidimensionaler Flächen im R_4 , <i>Hamb. Abh.</i> 4 (1925) pp. 174-177	442
36. Theory of Braids, <i>Annals of Mathematics</i> 48 (1947) pp. 101-126	446
37. Braids and Permutations, <i>Annals of Mathematics</i> 48 (1947) pp. 643-649	472
38. Some Wild Cells and Spheres in Three-Dimensional Space (with R. H. Fox), <i>Annals of Mathematics</i> 49 (1948) pp. 979-990	479
39. The Theory of Braids, <i>American Scientist</i> 38 (1950) pp. 112-119	491

MISCELLANEOUS

40. Ein mechanisches System mit quasiergodischen Bahnen, <i>Abh. Math. Sem. Hamburg</i> (1924) pp. 170-175	499
41. Coordinates in Affine Geometry, <i>Notre Dame Math. Colloquium</i> (1940) pp. 15-20	505
42. On the Independence of Line Integrals on the Path, <i>Proc. Nat. Acad. Sci. USA</i> 27 (1941) pp. 489-490	511
43. On the Theory of Complex Functions, <i>Notre Dame Math. Lectures</i> No. 4 (1944)	513
44. A Proof of the Krein-Milman Theorem, <i>Picayune Sentinel</i> , University of Indiana (1950) (a letter to M. Zorn)	523

GENERAL

45. The Influence of J. H. M. Wedderburn on the Development of Modern Algebra,
Bull. Am. Math. Soc. 56 (1950) pp. 65-72 526
46. Review of Bourbaki's *Algebra*,
Bull. Am. Math. Soc. (1953) pp. 474-479 534
47. Contents and Methods of an Algebra Course,
Tata Institute, Bombay (1960) pp. 5-12 539
48. Die Bedeutung Hilberts für die moderne Mathematik,
Jahrbuch Akad. Wiss. Göttingen (1962) (address given for Hilbert's 100th birthday) 547
49. Zur Problemlage der Mathematik (lecture broadcast from RIAS) 552

The following is a list of books and lecture notes not reproduced in this volume.

- Einführung in die Theorie der Gammafunktion,
Hamburger mathematische Einzelschriften 1 Heft (1931)
- Galois Theory,
Notre Dame Lectures (1942)
- Galoische Theorie,
Leipzig (1959) (a translation and expansion of the preceding item)
- Modern Higher Algebra, Galois Theory,
(Notes by A. Blank) Lectures, New York University (1947)
- Rings with Minimum Condition (with C. J. Nesbitt and R. M. Thrall),
Michigan (1948)
- Algebraic Numbers and Algebraic Functions (Notes by I. Adamson),
Princeton-New York University (1950)
- Modern Developments in Algebra (Notes by R. Stoll),
Boulder summer conference (1953)
- Selected Topics in Modern Algebra,
Summer conference at University of North Carolina (1954)
- Elements of Algebraic Geometry (Notes by G. Bachman),
New York University (1955)
- Calculus and Analytic Geometry (Notes by G. B. Seligman),
Princeton (1957)
- Algebraic Number Theory (Notes by G. Wurges),
Göttingen (1956)
- Geometric Algebra,
Interscience, New York (1957)
- Class Field Theory (with J. T. Tate),
Harvard (1961)
