

# TABLE OF CONTENTS

160. Recent progress on Waring's theorem and its generalizations, [276] . . . . .	7
161. Proof of a Waring theorem on fifth powers, [274] . . . . .	34
162. Waring's problem for ninth powers, [281] . . . . .	39
163. The converse of Waring's problem, [282] . . . . .	47
164. The Waring problem and its generalizations, [296] . . . . .	51
165. A generalization of Waring's problem, [295] . . . . .	61
166. All integers except 23 and 239 are sums of eight cubes, [308] . . . . .	66
167. The theory of numbers: its principal branches, [232] . . . . .	71
168. Recent light on classic problems in the theory of numbers, [258] . . . . .	83
169. The quadratic Cremona transformation, [22] . . . . .	91
170. Systems of simple groups derived from the orthogonal group, [25'] . . . . .	103
171. Systems of simple groups derived from the orthogonal group, [25''] . . . . .	121
172. Why it is impossible to trisect an angle or to construct a regular polygon of seven or nine sides by ruler and compasses, [227] . . . . .	133
173. Systems of continuous and discontinuous simple groups, [14] . . . . .	141
174. Higher irreducible congruences, [15] . . . . .	150
175. The structure of the hypoabelian groups, [19] . . . . .	159

176. Report on the recent progress in the theory of linear groups, [28] .....	175
177. Orthogonal group in a Galois field, [17] .....	190
178. Concerning a linear homogeneous group in $C_{m,q}$ variables isomorphic to the general linear homogeneous group in $m$ variables, [20] .....	196
179. Systems of simple groups derived from the orthogonal group, [18] .....	212
180. Concerning real and complex continuous groups, [54] ...	220
181. The configurations of the 27 lines on a cubic surface and the 28 bitangents to a quartic curve, [55] .....	231
182. An extension of the theory of numbers by means of correspondences between fields, [207] .....	239
183. Integral solutions of $x^2 - my^2 = zw$ , [236] .....	243
184. All integral solutions of $ax^2 + bxy + cy^2 = w_1 w_2 \cdots w_n$ , [247] .....	248
185. A generalization of Waring's theorem on nine cubes, [251] .....	253
186. Integers represented by positive ternary quadratic forms, [250] .....	255
187. Extensions of Waring's theorem on fourth powers, [252] .	263
188. All positive integers are sums of values of a quadratic function of $x$ , [253] .....	273
189. Generalizations of the theorem of Fermat and Cauchy on polygonal numbers, [261] .....	281
190. Extended polygonal numbers, [262] .....	291
191. New division algebras, [263] .....	305
192. The forms $ax^2 + by^2 + cz^2$ which represent all integers, [271] .....	311
193. Perfect and amicable numbers, [226] .....	317
194. Cyclic numbers, [9] .....	324
195. Proof of the non-isomorphism of the simple Abelian group on $2m$ indices and the simple orthogonal group on $2m + 1$ indices for $m > 2$ , [50] .....	336

196. A triply infinite system of simple groups, [16] . . . . .	359
197. The first hypoabelian group generalized, [24] . . . . .	369
198. A class of groups in an arbitrary realm connected with the configuration of the 27 lines on a cubic surface, [61] . . . . .	385
199. Theorems on the residues of multinomial coefficients with respect to a prime modulus, [79] . . . . .	414
200. Determination of all the subgroups of the three highest powers of $p$ in the group $G$ of all $m$ -ary linear homogeneous transformations modulo $p$ , [121] . . . . .	421
201. On the last theorem of Fermat, [152] . . . . .	434
202. On the last theorem of Fermat (second paper), [153] . . . . .	453
203. On families of quadratic forms in a general field, [150] . . . . .	472
204. On non-vanishing forms, [177] . . . . .	490
205. Theorems and tables on the sum of the divisors of a number, [185] . . . . .	500
206. On commutative linear groups, [163] . . . . .	533
207. Modular invariants of the system of a binary cubic, quadratic, and linear form, [194] . . . . .	563
208. Gergonne's pile problem, [7] . . . . .	576
209. Isomorphism between certain systems of simple linear groups, [44] . . . . .	579
210. Impossibility of restoring unique factorization in a hypercomplex arithmetic, [231] . . . . .	586
211. Algebras and their arithmetics, [239] . . . . .	591
212. Quadratic fields in which factorization is always unique, [240] . . . . .	602
213. Resolvent sextics of quintic equations, [243] . . . . .	609
214. <i>Obituary</i> : Hans Frederik Blichfeldt 1873–1945, [311] . . . . .	618
<b>BIBLIOGRAPHY</b> . . . . .	623
<b>INDEX</b> . . . . .	641
