

Table of contents

Curriculum vitae	IX
Biographical note	XI
Zur Homotopietheorie gefaserter Räume	1
Über die Homotopiegruppen von Gruppenräumen	53
Systeme von Richtungsfeldern in Sphären und stetige Lösungen komplexer linearer Gleichungen	76
L'idée de dimension	102
Stetige Lösungen linearer Gleichungssysteme	117
Gruppentheoretischer Beweis des Satzes von Hurwitz-Radon über die Komposition quadratischer Formen	139
Topologie und Algebra	148
Über monothetische Gruppen	158
Harmonische Funktionen und Randwertaufgaben in einem Komplex	173
Der Cohomologie-Ring einer beliebigen Gruppe	189
Coverings and Betti numbers	240
Formes différentielles et métrique hermitienne sans torsion. I. Structure complexe, formes pures (with H. Guggenheimer)	247
Formes différentielles et métrique hermitienne sans torsion. II. Formes de classe k ; formes analytiques (with H. Guggenheimer)	250
Sur les variétés closes à métrique hermitienne sans torsion (with H. Guggenheimer)	253
Quelques propriétés globales des variétés kählériennes	256
Espaces fibrés et homotopie	259
Sur l'intégrabilité des structures presque complexes (with A. Frölicher)	276
Complex-analytic manifolds	279
On complexes with operators	287
Über injektive Moduln (with A. Schopf)	295
Cohomology of groups and transfer	299
A class of compact, complex manifolds which are not algebraic (with E. Calabi)	312
Structures complexes et transformations infinitésimales	319
Räume mit Mittelbildungen	328
Zur Cohomologietheorie von Räumen und Gruppen	340
Homotopie et dualité	348
Groupes d'homotopie et dualité. Groupes absolus (with P. J. Hilton)	361
Groupes d'homotopie et dualité. Suites exactes (with P. J. Hilton)	364
Groupes d'homotopie et dualité. Coefficients (with P. J. Hilton)	367
Transgression homotopique et cohomologique (with P. J. Hilton)	370

Décomposition homologique d'un polyèdre simplement connexe (with P. J. Hilton)	374
On the homology and homotopy decomposition of continuous maps (with P. J. Hilton)	377
Groupes d'homotopie et dualité	381
Structure maps in group theory (with P. J. Hilton)	392
Group-like structures in general categories I. Multiplications and comultiplications (with P. J. Hilton)	407
Homotopie und Homologie	436
Generalized means (with T. Ganea and P. J. Hilton)	445
Homotopy and cohomology theory	456
Unions and intersections in homotopy theory (with P. J. Hilton)	471
Composition functors and spectral sequences (with P. J. Hilton)	486
Commuting limits with colimits (with P. J. Hilton)	521
Continuous solutions of linear equations – some exceptional dimensions in topology	550
Le groupe des types simples d'homotopie sur un polyèdre (with S. Maumary)	561
Simple homotopy type and categories of fractions	576
On central group extensions and homology (with P. J. Hilton)	591
On the homology theory of central group extensions: I – The commutator map and stem extensions (with P. J. Hilton and U. Stambach)	602
On the Schur multiplier of a central quotient of a direct product of groups (with P. J. Hilton and U. Stambach)	623
Groups with homological duality generalizing Poincaré duality (with R. Bieri)	633
Finiteness properties of duality groups (with R. Bieri)	655
Aspherical manifolds and higher-dimensional knots	665
Cobordism for Poincaré duality groups (with R. Bieri)	671
Rational representations of finite groups and their Euler class (with G. Mislin)	674
Two-dimensional Poincaré duality groups and pairs (with R. Bieri)	684
On the Euler class of representations of finite groups over real fields (with G. Mislin)	690
Some recent developments in the homology theory of groups (Groups of finite and virtually finite dimension)	701
Poincaré duality groups of dimension two (with H. Müller)	716
Chern classes of group representations over a number field (with G. Mislin)	727
Plane motion groups and virtual Poincaré duality of dimension two (with H. Müller)	752
Poincaré duality groups of dimension two, II (with P. Linnell)	770
Profinite Chern classes for group representations (with G. Mislin)	774
The p -periodicity of the groups $GL(n, O_S(K))$ and $SL(n, O_S(K))$ (with B. Bürgisser)	783
Galois action on algebraic matrix groups, Chern classes and the Euler class (with G. Mislin)	792

Poincaré duality groups of dimension two are surface groups	802
Cyclic homology of groups and the Bass conjecture	813
Notes	823
I. Homotopy groups and fiber spaces	
II. Continuous solutions of linear equations	
III. Cohomology of groups	
IV. Homological algebra, transfer	
V. Duality in homotopy theory	
VI. Duality groups, Poincaré duality	
Bibliography of the publications of B. Eckmann	825
List of Ph.D. Theses written under the supervision of B. Eckmann	831
