Table of contents

Part I. General problems of representation theory

1. Irreducible unitary representations of locally bicompact groups (with D. A. Rajkov) . . . 3
2. Unitary representations of the group of linear transformations of the straight line (with M. A. Najmark) . . . 18
3. Center of the infinitesimal group ring . . . 22
4. Spherical functions on symmetric Riemannian spaces . . . 31

Part II. Infinite-dimensional representations of semisimple Lie groups

1. Unitary representations of the Lorentz group (with M. A. Najmark) . 39
2. Unitary representations of the Lorentz group (with M. A. Najmark) . 41
3. On unitary representations of the complex unimodular group (with M. A. Najmark) . . . 124
4. The principal series of irreducible representations of the complex unimodular group (with M. A. Najmark) . . . 128
5. Complementary and degenerate series of representations of the complex unimodular group (with M. A. Najmark) . . . 130
6. The trace in principal and complementary series representations of the complex unimodular group (with M. A. Najmark) . . . 135
7. On the connection between representations of a complex semisimple Lie group and its maximal compact subgroup (with M. A. Najmark) 138
8. An analogue of the Plancherel formula for the complex unimodular group (with M. A. Najmark) . . . 142
9. General relativistically invariant equations and infinite-dimensional representations of the Lorentz group (with A. M. Yaglom) . . . 146
10. On the structure of the ring of rapidly decreasing functions on a Lie group (with M. I. Graev) . . . 178
11. Unitary representations of classical groups (with M. A. Najmark) . . 182
12. Unitary representations of the real simple Lie groups (with M. I. Graev) . . . 212
13. Unitary representations of real unimodular groups (Principal non-degenerate series) (with M. I. Graev) . . . 215

14. On a general method for decomposition of the regular representation of a Lie group into irreducible representations (with M. I. Graev) . . 269

Part III. Geometry of homogeneous spaces; spherical functions; automorphic functions

1. Some remarks on the theory of spherical functions on symmetric Riemannian manifolds (with F. A. Berezin) 275
2. Geodesic flows on manifolds of constant negative curvature (with S. V. Fomin) 321
3. Geometry of homogeneous spaces, representations of groups in homogeneous spaces and related questions of integral geometry (with M. I. Graev) 338
4. Unitary representations in homogeneous spaces with discrete stationary groups (with I. I. Piatetski-Shapiro) 417
5. Unitary representations in a space G/Γ, where G is a group of n-by-n real matrices and Γ is a subgroup of integer matrices (with I. I. Piatetski-Shapiro) 421

Part IV. Models of representations; representations of groups over various fields

1. Categories of group representations and the problem of classifying irreducible representations (with M. I. Graev) 427
2. Construction of irreducible representations of simple algebraic groups over a finite field (with M. I. Graev) 431
3. Representations of quaternion groups over locally compact and functional fields (with M. I. Graev) 435
4. A new model for representations of finite semisimple algebraic groups (with I. N. Bernstein and S. I. Gelfand) 450
5. Irreducible unitary representations of the group of unimodular second-order matrices with elements from a locally compact field (with M. I. Graev) 453
6. Plancherel's formula for the groups of the unimodular second-order matrices with elements in a locally compact field (with M. I. Graev) . 457
7. On the representation of the group $GL(n, K)$, where K is a local field (with D. A. Kazhdan) 461
8. Models of representations of Lie groups (with I. N. Bernstein and S. I. Gelfand) 464
9. Complex manifolds whose skeletons are semisimple real Lie groups, and analytic discrete series of representations (with S. G. Gindikin) . 486
10. Models of representations of classical groups and their hidden symmetries (with A. V. Zelevinskij) 494

Part V. Verma modules; resolutions of finite-dimensional representations

1. Differential operators on the base affine space and a study of $\mathfrak{g}$-modules (with I. N. Bernstein and S. I. Gelfand) 513
2. Structure of representations generated by vectors of heighest weight (with I. N. Bernstein and S. I. Gelfand) 556
3. Differential operators on a cubic cone (with I. N. Bernstein and S. I. Gelfand) 564
4. Schubert cells and cohomology of the spaces G/P (with I. N. Bernstein and S. I. Gelfand) 570
5. Category of $\mathfrak{g}$-modules (with I. N. Bernstein and S. I. Gelfand) 596
6. Structure locale de la catégorie des modules de Harish-Chandra I (avec I. N. Bernstein et S. I. Gelfand) 602
7. Structure locale de la catégorie des modules de Harish-Chandra II (avec I. N. Bernstein et S. I. Gelfand) 605
8. Algebraic bundles over P^n and problems of linear algebra (with I. N. Bernstein and S. I. Gelfand) 608

Part VI. Enveloping algebras and their quotient skew-fields

1. Fields associated with enveloping algebras of Lie algebras (with A. A. Kirillov) 613
2. Sur les corps liés aux algèbres enveloppantes des algèbres de Lie (avec A. A. Kirillov) 616
3. On the structure of the field of quotients of the enveloping algebra of a semisimple Lie algebra (with A. A. Kirillov) 631
4. The structure of the Lie field connected with a split semisimple Lie algebra (with A. A. Kirillov) 634

Part VII. Finite-dimensional representations

1. Finite-dimensional representations of the group of unimodular matrices (with M. L. Tsetlin) 653
2. Finite-dimensional representations of the group of orthogonal matrices (with M. L. Tsetlin) 657
3. Finite-dimensional irreducible representations of the unitary and the full linear groups, and related special functions (with M. I. Graev) . 662

Part VIII. Indecomposable representations of semisimple Lie groups and of finite-dimensional algebras; problems of linear algebra

1. Indecomposable representations of the Lorentz group (with V. A. Ponomarev) 695

2. Remarks on the classification of a pair of commuting linear transformations in a finite-dimensional space (with V. A. Ponomarev) 753
3. The classification of the linear representations of the group $SL(2, \mathbf{C})$ (with M. I. Graev and V. A. Ponomarev) 755
4. Quadruples of subspaces of a finite-dimensional vector space (with V. A. Ponomarev) 760
5. Coxeter functors and Gabriel's theorem (with I. N. Bernstein and V. A. Ponomarev) 765
6. Model algebras and representations of graphs (with V. A. Ponomarev) 781

Part IX. Representations of infinite-dimensional groups

1. Representations of the group $SL(2, \mathbf{R})$, where $\mathbf{R}$ is a ring of functions (with M. I. Graev and A. M. Vershik) 793
2. Representations of the group of smooth mappings of a manifold X into a compact Lie group (with M. I. Graev and A. M. Vershik) . . . 839
3. Irreducible representations of the group G^X and cohomologies (with M. I. Graev and A. M. Vershik) 875
4. Representations of the group of diffeomorphisms (with M. I. Graev and A. M. Vershik) 878
5. Representations of the group of functions taking values in a compact Lie group (with M. I. Graev and A. M. Vershik) 928
6. A commutative model of representation of the group of flows $SL(2, \mathbf{R})^X$ that is connected with a unipotent subgroup (with M. I. Graev and A. M. Vershik) 955

Appendix

1. Two papers on representation theory (by G. Segal) 961
2. Four papers on problems in linear algebra (by C. M. Ringel) 974
