

# Table of contents

## Part I. Integral geometry

1. Integral transformations connected with straight line complexes in a complex affine space (with M. I. Graev) . . . . .	3
2. Integral geometry on $k$ -dimensional planes (with M. I. Graev and Z. Ya. Shapiro) . . . . .	7
3. Complexes of $k$ -dimensional planes in the space $\mathbf{C}^n$ and Plancherel's formula for the group $GL(n, C)$ (with M. I. Graev) . . . . .	21
4. Complexes of straight lines in the space $\mathbf{C}^n$ (with M. I. Graev) . . . . .	26
5. Differential forms and integral geometry (with M. I. Graev and Z. Ya. Shapiro) . . . . .	37
6. Integral geometry in projective space (with M. I. Graev and Z. Ya. Shapiro) . . . . .	51
7. A problem of integral geometry connected with a pair of Grassmann manifolds (with M. I. Graev and Z. Ya. Shapiro) . . . . .	68
8. Nonlocal inversion formulas in real integral geometry (with S. G. Gindikin) . . . . .	73
9. A local problem of integral geometry in a space of curves (with S. G. Gindikin and Z. Ya. Shapiro) . . . . .	80
10. A problem of integral geometry in $RP^n$ connected with the integration of differential forms (with S. G. Gindikin and M. I. Graev) . . . . .	96
11. Integral geometry in affine and projective spaces (with S. G. Gindikin and M. I. Graev) . . . . .	99
12. Geometric structures of double bundles and their relation to certain problems in integral geometry (with G. S. Shmelev) . . . . .	228
13. The problem of integral geometry and intertwining operators for a pair of real Grassmannian manifolds (with M. I. Graev and R. Rosu) . . . . .	241
14. On a characterization of Grassmann manifolds (with A. B. Goncharov) . . . . .	266

## Part II. Cohomology and characteristic classes

1. On classifying spaces for principal fiberings with Hausdorff bases (with D. B. Fuks) . . . . .	273
2. Topology of noncompact Lie groups (with D. B. Fuks) . . . . .	277
3. The cohomologies of the Lie algebra of the vector fields in a circle (with D. B. Fuks) . . . . .	288

4. Cohomologies of the Lie algebra of tangential vector fields of a smooth manifold (with D. B. Fuks) . . . . .	290
5. Cohomology of the Lie algebra of formal vector fields (with D. B. Fuks)	307
6. Cohomologies of Lie algebra of tangential vector fields II (with D. B. Fuks) . . . . .	323
7. Cohomologies of Lie algebra of vector fields with nontrivial coefficients (with D. B. Fuks) . . . . .	330
8. Quadratic forms over commutative group rings and the $K$ -theory (with A. S. Mishchenko) . . . . .	342
9. Upper bounds for cohomology of infinite-dimensional Lie algebras (with D. B. Fuks) . . . . .	347
10. The actions of infinite-dimensional Lie algebras (with D. B. Fuks and D. A. Kazhdan) . . . . .	349
11. Cohomology of the Lie algebra of Hamiltonian formal vector fields (with D. B. Fuks and D. I. Kalinin) . . . . .	354
12. PL Foliations (with D. B. Fuks) . . . . .	358
13. Cohomologies of the Lie algebra of formal vector fields with coefficients in its adjoint space and variations of characteristic classes of foliations (with B. L. Feigin and D. B. Fuks) . . . . .	365
14. The Gauss-Bonnet theorem and the Atiyah-Patodi-Singer functionals for the characteristic classes of foliations (with D. B. Fuks and A. M. Gabrielov) . . . . .	379
15. PL Foliations II (with D. B. Fuks) . . . . .	403
16. Combinatorial computation of characteristic classes (with A. M. Gabrielov and M. V. Losik) . . . . .	407
17. Combinatorial computation of characteristic classes (with A. M. Gabrielov and M. V. Losik) . . . . .	420
18. A local combinatorial formula for the first class of Pontryagin (with A. M. Gabrielov and M. V. Losik) . . . . .	437
19. Atiyah-Patodi-Singer functionals for characteristic functionals for tangent bundles (with A. M. Gabrielov and M. V. Losik) . . . . .	441
20. Computing of characteristic classes of combinatorial vector bundles (with M. V. Losik) . . . . .	454
21. Cohomology of infinite-dimensional Lie algebras and Laplace operators (with B. L. Feigin and D. B. Fuks) . . . . .	487
22. Geometry in Grassmannians and a generalization of the dilogarithm (with R. D. MacPherson) . . . . .	492

### **Part III. Functional integration; probability; information theory**

1. Generalized random processes . . . . .	529
2. Integration in functional spaces and its applications in quantum physics (with A. M. Yaglom) . . . . .	534

3. To the general definition of the amount of information  
(with A. N. Kolmogorov and A. M. Yaglom) . . . . . 556
4. Calculation of the amount of information about a random function  
contained in another such function (with A. M. Yaglom) . . . . . 560

#### **Part IV. Mathematics of computation; cybernetics; biology**

1. On the application of the method of random tests (the Monte Carlo method) for the solution of the kinetic equation (with N. N. Chentsov, S. M. Fejnberg, and A. S. Frolov) . . . . . 611
2. On difference schemes for the solution of the equation of thermal conductivity. The double sweep method for solution of difference equations (with O. V. Lokysievskij) . . . . . 617
3. Some methods of control for complex systems (with M. L. Tsetlin) . . . . . 648
4. Determination of crystal structure by the method of nonlocal search (with Yu. G. Fedorov and I. I. Piatetski-Shapiro) . . . . . 671
5. Determination of crystal structures by the method of the *R*-factor minimization (with Yu. G. Fedorov, R. A. Kayushina, and B. K. Vainstein) . . . . . 675
6. On certain classes of games and automata games (with I. I. Piatetski-Shapiro and M. L. Tsetlin) . . . . . 680
7. Some problems in the analysis of movements (with V. S. Gurfinkel, M. L. Shik, and M. L. Tsetlin) . . . . . 686
8. Recordings of neurones of the dorsal spinocerebellar tract during evoked locomotion (with Yu. I. Arshavskij, M. B. Berkenblit, O. I. Fukson, and G. N. Orlovskij) . . . . . 703
9. Origin of modulation in neurones of the ventral spinocerebellar tract during locomotion (with Yu. I. Arshavskij, M. B. Berkenblit, O. I. Fukson, and G. N. Orlovskij) . . . . . 707
10. Generation of scratching I. Activity of spinal interneurons during scratching (with M. B. Berkinblit, T. G. Delyagina, A. G. Fel'dman, and G. N. Orlovskij) . . . . . 711
11. The cerebellum and control of rhythmical movements (with Yu. I. Arshavskij and G. N. Orlovskij) . . . . . 729
12. Interrelationships of contacting cells in the cell complexes of mouse ascites hepatoma (with V. I. Guelstein, A. G. Malenkov, and Yu. M. Vasil'ev) . . . . . 735
13. Initiation of DNA synthesis in cell cultures by colcemid (with V. I. Guelstein and Yu. M. Vasil'ev) . . . . . 747
14. Mechanisms of morphogenesis in cell cultures (with Yu. M. Vasil'ev) . . . . . 750
15. Possible common mechanism of morphological and growth-related alterations accompanying neoplastic transformation (with Yu. M. Vasil'ev) . . . . . 866
16. Special type of morphological reorganization induced by phorbol ester: Reversible partition of cell into mobile and stable domains (with V. B. Dugina, T. M. Svitkina, and Yu. M. Vasil'ev) . . . . . 870

**Part V. General theory of hypergeometric functions**

1. General theory of hypergeometric functions . . . . .	877
2. Generalized hypergeometric equations (with S. I. Gelfand) . . . . .	882
3. A duality theorem for general hypergeometric functions (with M. I. Graev) . . . . .	886
4. Algebraic and combinatorial aspects of the general theory of hyper- geometric functions (with A. V. Zelevinskij) . . . . .	891
5. Combinatorial geometries, convex polyhedra, and Schubert cells (with M. Goresky, R. D. MacPherson, and V. V. Serganova) . . . . .	906
6. Strata of a maximal torus in a compact homogeneous space (with V. V. Serganova) . . . . .	922
7. Combinatorial geometries and torus strata on homogeneous compact manifolds (with V. V. Serganova) . . . . .	926
8. General hypergeometric functions on complex Grassmannians (with V. A. Vasiliev and A. V. Zelevinskij) . . . . .	959
9. Holonomic systems of equations and series of hypergeometric type (with M. I. Graev and A. V. Zelevinskij) . . . . .	977
10. On Heaviside functions of configuration of hyperplanes (with A. N. Varchenko) . . . . .	983
11. Arrangement of real hyperplanes and the associated partition function (with T. V. Alekseevskaya and A. V. Zelevinskij) . . . . .	1006
12. Generalized Airey functions, Schubert cells and Jordan groups (with V. S. Retakh, V. V. Serganova) . . . . .	1011

**Appendix**

Cardiac arrhythmias and circle mappings (by V. I. Arnold) . . . . .	1019
<b>An Editorial Perspective</b> (by B. Kostant) . . . . .	1025
<b>Table of contents for volumes I and II</b> . . . . .	1027
<b>Bibliography</b> . . . . .	1033
<b>Acknowledgements</b> . . . . .	1075
