

# Table of Contents

Bibliography of Nathan Jacobson's Books and Papers .....	v
Doctoral Students of Nathan Jacobson .....	xi
Chronology .....	xiii
Preface .....	xv
Personal History and Commentary (1910–1943) .....	1
<b>Research Papers, 1934–1943</b>	
[1] Non-commutative polynomials and cyclic algebras .....	13
[2] A note on non-commutative polynomials .....	25
[3] Locally compact rings (with O. Taussky) .....	28
[4] Rational methods in the theory of Lie algebras .....	31
[5] On pseudo-linear transformations .....	39
[6] Totally disconnected locally compact rings .....	43
[7] Simple Lie algebras of type $A$ .....	60
[8] Pseudo-linear transformations .....	64
[9] A class of normal simple Lie algebras of characteristic zero .....	88
[10] A note on non-associative algebras .....	98
[11] Abstract derivation and Lie algebras .....	104
[12] $p$ -Algebras of exponent $p$ .....	123
[13] A note on topological fields .....	127
[14] Simple Lie algebras of type $A$ .....	133
[15] Simple Lie algebras over a field of characteristic zero .....	142
[16] Normal semi-linear transformations .....	161
[17] An application of E. H. Moore's determinant of a Hermitian matrix ...	177
[18] Structure and automorphisms of semi-simple Lie groups in the large ...	181
[19] Cayley numbers and normal simple Lie algebras of type $G$ .....	191
[20] The fundamental theorem of the Galois theory for quasi-fields .....	201
[21] A note on hermitian forms .....	208
[22] Restricted Lie algebras of characteristic $p$ .....	213
[23] Classes of restricted Lie algebras of characteristic $p$ I .....	225
[24] Classes of restricted Lie algebras of characteristic $p$ II .....	261
Personal History and Commentary (1943–1946) .....	276
<b>Research Papers, 1943–1946</b>	
[25] An extension of Galois theory to non-normal and non-separable fields .....	285
[26] Schur's theorems on commutative matrices .....	315
[27] Relations between the composites of a field and those of a subfield ...	322
[28] Galois theory of purely inseparable fields of exponent one .....	331
[29] Construction of central simple associative algebras .....	336
[30] The equation $x' \equiv xd - dx = b$ .....	346
[31] Structure theory of simple rings without finiteness assumptions .....	350
[32] The radical and semi-simplicity for arbitrary rings .....	368
[33] Structure theory for algebraic algebras of bounded degree .....	389
[34] A topology for the set of primitive ideals in an arbitrary ring .....	403

[35] On the theory of primitive rings .....	410
[36] A note on division rings .....	425
[37] Isomorphisms of Jordan rings .....	435
[38] The center of a Jordan ring .....	446
Permissions .....	453
