

TABLE OF CONTENTS

Volume I

<u>1</u>	<u>Lucas' Functions</u>	1
	On the Multiple Solutions of the Pell Equation.	3
	An Extended Theory of Lucas' Functions	10
	On the Factorization of Lucas' Functions.	42
	Factorization of Certain Cyclotomic Functions	49
<u>2</u>	<u>Tests for Primality</u>	68
	Tests for Primality by the Converse of Fermat's Theorem	69
	A Further Note on the Converse of Fermat's Theorem	83
	On Lucas's Test for Primality of Mersenne's Numbers	86
	On the Converse of Fermat's Theorem	90
	A Factorization Theorem Applied to a Test for Primality.	96
	On the Converse of Fermat's Theorem II.	102
	New Primality Criteria and Factorizations of $2^m \pm 1$	112
	Strong Carmichael Numbers	140
<u>3</u>	<u>Continued Fractions</u>	143
	On the Value of the Napierian Base.	145
	Arithmetical Periodicities of Bessel Functions.	150
	A Cotangent Analogue of Continued Fractions	158
	Note on an Absolute Constant of Khintchine	175
	Continued Fractions Containing Arithmetic Progressions	180

Lacunary Recurrence Formulas for the
 Numbers of Bernoulli and Euler. 189

On the Maxima and Minima of Bernoulli
 Polynomials 202

The Lattice Points of an n-Dimensional
 Tetrahedron 208

5 Diophantine Equations 221

On the Indeterminate Equation $t^2 - p^2 Du^2 = 1$ 223

On the First Case of Fermat's Last Theorem. 229

A Note on the Linear Diophantine Equation 233

The Tarry-Escott Problem 240

An Application of High-Speed Computing to
 Fermat's Last Theorem 245

On the Diophantine Equation $x^3 + y^3 + z^3 = 1$ 254

On a Problem of Störmer 260

§ Numerical Functions 283

The p-Dimensional Analogue of Smith's
 Determinant. 285

A New Calculus of Numerical Functions. 288

Arithmetic of Double Series. 300

On a Theorem of Von Sterneck 313

An Inversive Algorithm 317

On Euler's Totient Function. 319

Polynomials for the n-ary Composition
 of Numerical Functions 326

A Generalized Inversive Algorithm. 336

Recurrence Formulas for Certain Divisor
 Functions 339

The Distribution of Totatives.	346
Heuristics, Anyone?.	357
A Note on Primitive Roots.	366

Volume II

<u>7</u> <u>Matrices</u>	369
On Certain Character Matrices.	370
Power Character Matrices	379
Mahler's Matrices	392
Some Properties of Circulants.	403
Combinatorial and Cyclotomic Properties of Certain Tridiagonal Matrices	415
Fibonacci and Related Sequences in Periodic Tridiagonal Matrices	437
On the Permanent of Schur's Matrix	446
<u>8</u> <u>Power Residues</u>	457
On Runs of Residues	458
Machine Proof of a Theorem on Cubic Residues	463
Pairs of Consecutive Power Residues.	472
Bounds for Pairs of Consecutive Seventh and Higher Power Residues	478
Integer Sequences Having Prescribed Quadratic Character	489
<u>9</u> <u>Analytic Number Theory</u>	508
On a Conjecture of Ramanujan	511
On the Hardy-Ramanujan Series for the Partition Function	516
On the Series for the Partition Function	522

An Application of Schläfli's Modular Equation to a Conjecture of Ramanujan	547
On the Remainders and Convergence of the Series for the Partition Function.	554
A Conjecture of Krishnaswami	566
On the Roots of the Riemann Zeta-Function.	572
Extended Computation of the Riemann Zeta-Function	580
A Sum Involving the Function of Möbius	587
Euler Constants for Arithmetic Progressions	591

10 Partitions

609

Two Nonexistence Theorems on Partitions.	611
On the Partition of Numbers into Squares	618
A Triangular Number Formula for the Partition Function	624
On Reciprocally Weighted Partitions.	627
Calculating Moments of Partitions	637

11 Modular Forms

641

Properties of the Coefficients of the Modular Invariant $J(\tau)$	642
Ramanujan's Function $\tau(n)$	657
The Vanishing of Ramanujan's Function $\tau(n)$	667
Problems Concerning Ramanujan's Function	672
Ramanujan's Function with respect to the Modulus 49	673
Some Functions of Ramanujan.	677
The Primality of Ramanujan's Tau-Function.	689
Note on the Distribution of Ramanujan's Tau Function.	693

<u>12</u> <u>Cyclotomy</u>	696
Quasi-cyclotomic Polynomials.	698
On the Cubes of Kloosterman Sums.	705
Some Properties of the Cyclotomic Polynomial.	713
The Cyclotomy of Kloosterman Sums	726
The Cyclotomy of Hyper-Kloosterman Sums	749
Incomplete Gauss Sums	772
Prime Factors of Cyclotomic Class Numbers	783
Table of the Cyclotomic Class Numbers $h^*(p)$ and their Factors for $200 < p < 521$	792

Volume III

<u>13</u> <u>Combinatorics</u>	798
Combinatorial Problems with Digital Computers	799
Permutation by Adjacent Interchanges	813
Permutations with Strongly Restricted Displacements.	824
Effective Enumeration Methods for Highly Restricted Permutations.	840
Multisectioned Moments of Stirling Numbers of the Second Kind	854
The Characters of Linear Permutations	869
<u>14</u> <u>Sieves</u>	885
The Mechanical Combination of Linear Forms.	886
Some New Factorizations of $2^n \pm 1$	894
A Photo-Electric Number Sieve	898
A Machine for Combining Sets of Linear Congruences	903
The Sieve Problem for All-Purpose Computers	910
A Sieve Problem on Pseudo-Squares	919
A New Factorization Technique Using Quadratic Forms	921

<u>15</u>	<u>Equation Solving</u>	932
	The Graeffe Process as Applied to Power Series.	933
	A Machine Method for Solving Polynomial Equations	940
	The Complete Root-Squaring Method	952
	Search Procedures for Polynomial Equation Solving	965
<u>16</u>	<u>Computing Techniques</u>	981
	A Cross-Division Process and its Application to the Extraction of Roots	981
	Euclid's Algorithm for Large Numbers.	989
	Note on the Computation of the Bessel Function $I_n(x)$	996
	Discrete Variable Methods in Numerical Analysis	999
	Some High-Speed Logic	1007
	Mechanized Mathematics.	1012
	Some Recursive Sequences.	1024
	Exploitation of Parallelism in Number Theoretic and Combinatorial Computation.	1040
<u>17</u>	<u>Miscellaneous</u>	1057
	On Factoring Large Numbers.	1057
	A Ternary Analogue of Abelian Groups.	1064
	On arceotangent relations for π	1074
	On the Factors of $2^n \pm 1$	1081
	Approximations to the Area of an n-Dimensional Ellipsoid.	1085
	A Low Energy Proof of the Reciprocity Law	1101
	On the Exact Number of Primes Less than a Given Limit.	1104
	On a Problem of Hardy and Littlewood.	1112

The Prime Factors of Consecutive Integers.1115
On Certain Chains of Primes1117
On the Compounding of Certain Means.1121
