

# Contents

<b>Bibliography (through 1999)</b>	<b>vii</b>
[1971a] Transcendental Numbers and Diophantine Approximations .....	1
[1971b] On the Zeta Function of Number Fields .....	44
[1971c] The Group of Automorphisms of the Modular Function Field ....	53
[1972a] Isogenous Generic Elliptic Curves .....	55
[1972b] Continued Fractions for Some Algebraic Numbers (with H. Trotter) .....	69
[1973] Frobenius Automorphisms of Modular Function Fields .....	78
[1974a] Higher Dimensional Diophantine Problems .....	102
[1974b] Addendum to “Continued Fractions of Some Algebraic Numbers” (with H. Trotter) .....	111
[1975a] Diophantine Approximations on Abelian Varieties with Complex Multiplication .....	120
[1975b] Division Points of Elliptic Curves and Abelian Functions over Number Fields .....	122
[1975c] Units in the Modular Functions Field I (with D. Kubert) .....	178
[1975d] Units in the Modular Functions Field II (with D. Kubert) .....	208
[1975e] Units in the Modular Functions Field III (with D. Kubert) .....	223

[1976a] Diophantine Approximations on Abelian Varieties with Complex Multiplication (with J. Coates) .....	236
[1976b] Distributions on Toroidal Groups (with D. Kubert) .....	241
[1976c] Units in the Modular Function Field (with D. Kubert) .....	260
<b>[1976d] Frobenius Distributions in <math>GL_2</math>-Extensions</b> (with H. Trotter) .....	289
[1977a] Units in the Modular Field IV (with D. Kubert) .....	567
[1977b] Primitive Points on Elliptic Curves (with H. Trotter) .....	587
