### VOLUME I

|   |        |
|---|--------|
| Editorial note . . . . .  | VII    |
| A. Mostowski (1913–1975) (by W. Marek) . . . . .  | IX     |
| Bibliography of works of A. Mostowski (compiled by W. Marek) . . . . .  | XI     |
| Andrzej Mostowski's studies of decidability, recursion and hierarchy (by A. Grzegorczyk) . . . . .                    | XXI    |
| The investigations of Andrzej Mostowski in the foundations of set theory (by W. Guzicki and W. Marek) . . . . .       | XXVII  |
| The work of Andrzej Mostowski in model theory (by L. Pacholski) . . . . .   | XXXIII |
| Research work of A. Mostowski in logical calculi (by C. Rauszer) . . . . .  | XLI    |
| Contribution of Mostowski to foundation of second order arithmetic (by P. Zbierski) . . . . .                         | XLV    |
| Thirty years of foundational studies . . . . .  | 1      |
| Models of set theory . . . . .  | 177    |
| On the independence of the well-ordering theorem from the ordering principle  | 290    |
| On definable sets of positive integers . . . . .  | 339    |
| (with A. Grzegorczyk and Cz. Ryll-Nardzewski) The classical and the $\omega$ -complete arithmetic . . . . .           | 371    |
| Formal system of analysis based on an infinitistic rule of proof . . . . .  | 390    |
| An exposition of forcing . . . . .  | 416    |
| Some impredicative definitions in the axiomatic set-theory . . . . .  | 479    |
| (with A. Ehrenfeucht) Models of axiomatic theories admitting automorphisms . . . . .                                  | 494    |
| (with Y. Suzuki) On $\omega$ -models which are not $\beta$ -models . . . . .  | 513    |
| Observations concerning elementary extensions of $\omega$ -models I . . . . .   | 524    |
| An undecidable arithmetical statement . . . . .   | 531    |
| (with W. Marek) On extendability of models of ZF set theory to the models of Kelley–Morse theory of classes . . . . . | 553    |

### VOLUME II

|  |     |
|--|-----|
| Editorial note . . . . .   | VII |
| Countable Boolean fields and their application to general metamathematics . . . . .                    | 1   |
| On the independence of definitions of finiteness in a system of logic . . . . .                        | 18  |
| On some universal relations . . . . .  | 68  |
| (with A. Lindenbaum) On the independence of the axiom of choice and some of its consequences . . . . . | 70  |
| (with A. Tarski) Boolean rings with an ordered basis . . . . .   | 75  |
| Axiom of choice for finite sets . . . . .  | 92  |
| On absolute properties of relations . . . . .  | 124 |
| On the principle of dependent choices . . . . .  | 134 |

|  |     |
|--|-----|
| Proofs of non-dedducibility in intuitionistic functional calculus . . . . .                                      | 138 |
| On a set of integers not definable by means of one-quantifier predicates . . . . .                               | 142 |
| (with A. Tarski) Arithmetical classes and types of well ordered systems . . . . .                                | 148 |
| On the rules of proof in the pure functional calculus of the first order . . . . .                               | 149 |
| A classification of logical systems . . . . .  | 154 |
| On models of axiomatic systems . . . . .   | 192 |
| On direct products of theories . . . . .   | 218 |
| On a system of axioms which has no recursively enumerable arithmetic model . . . . .                             | 249 |
| A lemma concerning recursive functions and its applications . . . . .  | 255 |
| A formula with no recursively enumerable model . . . . .   | 259 |
| Examples of sets definable by means of two and three quantifiers . . . . .                                       | 275 |
| Contributions to the theory of definable sets and functions . . . . .  | 287 |
| (with J. Łoś and H. Rasiowa) A proof of Herbrand's theorem . . . . .   | 292 |
| A generalization of a theorem of M. Deuring . . . . .  | 298 |
| Concerning a problem of H. Scholz . . . . .  | 306 |
| On a generalization of quantifiers . . . . .   | 311 |
| On computable sequences . . . . .  | 336 |
| On recursive models of formalized arithmetic . . . . .   | 351 |
| On a problem of W. Kinna and K. Wagner . . . . .   | 357 |
| On various degrees of constructivism . . . . .   | 359 |
| A generalization of the incompleteness theorem . . . . .   | 376 |
| An example of a non-axiomatizable many valued logic . . . . .  | 404 |
| Concerning the problem of axiomatizability of the field of real numbers in the weak second order logic . . . . . | 409 |
| (with A. Grzegorczyk and Cz. Ryll-Nardzewski) Definability of sets in models of axiomatic theories . . . . .     | 427 |
| (with A. Ehrenfeucht) A compact space of models of first order theories . . . . .                                | 432 |
| (with J. Łoś and H. Rasiowa) An addition to the paper "A proof of Herbrand's theorem" . . . . .                  | 437 |
| Axiomatizability of some many valued predicate calculi . . . . .   | 442 |
| Representability of sets in formal systems . . . . .   | 468 |
| A problem in the theory of models . . . . .  | 488 |
| The Hilbert epsilon function in many-valued logics . . . . .   | 494 |
| On models of Zermelo-Fraenkel set theory satisfying the axiom of constructibility                                | 514 |
| Craig's interpolation theorem in some extended systems of logic . . . . .  | 524 |
| Models of second order arithmetic with definable Skolem functions . . . . .                                      | 541 |
| A transfinite sequence of $\omega$ -models . . . . .   | 554 |
| Partial orderings of the family of $\omega$ -models . . . . .  | 561 |
| A contribution to teratology . . . . .   | 577 |
| A remark on models of the Gödel-Bernays axioms for set theory . . . . .  | 590 |
