

TABLE OF CONTENTS

Volume 2

[32] Functional topology and abstract variational theory	533
[33] Critical point theory under general boundary conditions (with G. B. Van Schaack)	540
[34] Singular quadratic functionals (with W. Leighton)	563
[35] A special parameterization of curves	598
[36] Functional topology and abstract variational theory	606
[37] The index theorem in the calculus of variations	670
[38] Functional topology and abstract variational theory	686
[39] Symbolic dynamics (with G. A. Hedlund)	691
[40] On the existence of minimal surfaces of general critical types (with C. B. Tompkins)	743
[41] Sur le calcul des variations	779
[42] La dynamique symbolique	790
[43] Symbolic dynamics II. Sturmian trajectories (with G. A. Hedlund)	797
[44] Rank and span in functional topology	839
[45] The first variation in minimal surface theory	875
[46] Twentieth century mathematics	902
[47] Unstable minimal surfaces of higher topological types (with C. B. Tompkins)	908
[48] A mathematical theory of equilibrium with applications to minimal surface theory.	912
[49] Minimal surfaces not of minimum type by a new mode of approximation (with C. B. Tompkins)	915

[50]	Corrections to our paper on the existence of minimal surfaces of general critical types (with C. B. Tompkins)	926
[51]	Mathematics in the defense program (with W. L. Hart)	927
[52]	Unstable minimal surfaces of higher topological structure (with C. B. Tompkins)	935
[53]	The continuity of the area of harmonic surfaces as a function of the boundary representations (with C. B. Tompkins)	961
[54]	Report of the War Preparedness Committee of the American Mathematical Society and Mathematical Association of America at the Chicago meeting	975
[55]	What is analysis in the large?	978
[56]	Manifolds without conjugate points (with G. A. Hedlund)	985
[57]	Mathematics and the maximum scientific effort in total war	1010
[58]	The variational theory in the large including the non-regular case — First paper (with G. Ewing).	1016
[59]	Functional topology	1052
[60]	Unending chess, symbolic dynamics and a problem in semi-groups (with G. A. Hedlund).	1058
[61]	Topological methods in the theory of functions of a single complex variable: I. Deformation types of locally simple plane curves; II. Boundary values and integral characteristics of interior transformations and pseudo-harmonic functions (with M. Heins)	1065
