Part I

Władysław Orlicz (by <i>W. Matuszewska</i>)	xi
A survey of Władysław Orlicz's scientific work (by <i>L. Maligranda and W. Matuszewska</i>) . .	xv
List of publications of Władysław Orlicz (by <i>L. Maligranda and W. Matuszewska</i>)	XLVII
List of doctoral dissertations written under the supervision of Władysław Orlicz (by <i>L. Maligranda and W. Matuszewska</i>)	LIii

COLLECTED PAPERS

1 Zur allgemeinen Limitierungstheorie	1
2 Zur Theorie der Orthogonalreihen.	6
3 Über die unabhängig von der Anordnung fast überall konvergenten Funktionenreihen	41
4 Beiträge zur Theorie der Orthogonalentwicklungen.	50
5 Beiträge zur Theorie der Orthogonalentwicklungen II	89
6 Einige Bemerkungen über die Divergenzpunktmengen von Orthogonalentwicklungen .	104
7 Eine Bemerkung über Divergenzphänomene von Orthogonalentwicklungen	119
8 (und <i>Z. W. Birnbaum</i>) Über Approximation im Mittel.	123
9 (und <i>Z. W. Birnbaum</i>) Über die Verallgemeinerung des Begriffes der zueinander konjugierten Potenzen	133
10 Über konjugierte Exponentenfolgen	200
11 Quelques théorèmes sur les développements orthogonaux	212
12 Quelques théorèmes sur les séries orthogonales	214
13 Über eine gewisse Klasse von Räumen vom Typus <i>B</i>	217
14 Zur Theorie der Differentialgleichung $y' = f(x, y)$	231
15 Beiträge zur Theorie der Orthogonalentwicklungen (III).	239
16 Über die Divergenz von allgemeinen Orthogonalreihen	249
17 Über unbedingte Konvergenz in Funktionenräumen (I)	255
18 Über unbedingte Konvergenz in Funktionenräumen (II).	260
19 (et <i>S. Mazur</i>) Sur les méthodes linéaires de sommation	267
20 (und <i>S. Mazur</i>) Über Folgen linearer Operationen	270
21 Beiträge zur Theorie der Orthogonalentwicklungen (IV).	276
22 (und <i>S. Mazur</i>) Grundlegende Eigenschaften der polynomischen Operationen I. . . .	290
23 Ein Satz über die Erweiterung von linearen Operationen	309
24 Über Folgen linearer Operationen, die von einem Parameter abhängen.	323
25 (und <i>S. Mazur</i>) Grundlegende Eigenschaften der polynomischen Operationen II . . .	334
26 Über Räume (L^M).	345
27 Beiträge zur Theorie der Orthogonalentwicklungen (V)	360
28 (und <i>S. Mazur</i>) Polynomische Operationen in abstrakten Räumen	379
29 (et <i>S. Mazur</i>) Sur la divisibilité des polynomes abstraits.	381

30	Einige Gegenbeispiele zur Konvergenztheorie der allgemeinen Orthogonalentwicklungen	384
31	(et S. Mazur) Sur les fonctionnelles rationnelles	390
32	Über k -fach monotone Folgen	392
33	Beiträge zur Theorie der Orthogonalentwicklungen (VI)	403
34	(et S. Mazur) Sur quelques propriétés de fonctions périodiques et presque-périodiques	410
35	(et A. Alexiewicz) Remarque sur l'équation fonctionnelle $f(x + y) = f(x) + f(y)$. . .	426
36	Sur les fonctions continues non dérivables	428
37	Une généralisation d'un théorème de MM. S. Banach et S. Mazur	444
38	Une généralisation d'un théorème de Cantor-Lebesgue	448
39	Sur les fonctions satisfaisant à une condition de Lipschitz généralisée (I)	456
40	Sur les opérations linéaires dans l'espace des fonctions bornées	475
41	Sur l'oeuvre scientifique de Stefan Banach	505
42	Sur la convergence uniforme des développements orthogonaux de fonctions bornées . .	517
43	Sur quelques propriétés des fonctions de Baire périodiques	524
44	(et A. Alexiewicz) Sur la continuité et la classification de Baire des fonctions abstraites	535
45	(et S. Mazur) Sur les espaces métriques linéaires (I)	557
46	Linear operations in Saks spaces (I)	582
47	(and A. Alexiewicz) On analytic vector-valued functions of a real variable	618
48	(and A. Alexiewicz) Remarks on Riemann-integration of vector-valued functions . .	622
49	On a class of asymptotically divergent sequences of functions	630
50	(and A. Alexiewicz) On the differentials in Banach spaces	652
51	Sur les fonctions satisfaisant à une condition de Lipschitz généralisée (II)	657
52	(et S. Mazur) Sur les espaces métriques linéaires (II)	671
53	On the convergence of functionals representable as integrals over some classes of bounded functions	714
54	On functions of finite variation, depending on a parameter	724
55	(and A. Alexiewicz) Analytic operations in real Banach spaces	739
56	(and S. Mazur) On linear methods of summability	761
57	On a class of operations over the space of continuous vector-valued functions	793
58	On a class of operations over the space of integrable functions	806
59	(and A. Alexiewicz) On a theorem of C. Carathéodory	814
60	(and A. Alexiewicz) On summability of double sequences (I)	818
61	On perfectly convergent series in certain function spaces	830

Part II

62	Linear operations in Saks spaces (II)	851
63	(and A. Alexiewicz) Some remarks on the existence and uniqueness of solutions of the hyperbolic equation $\partial^2 z / \partial x \partial y = f(x, y, z, \partial z / \partial x, \partial z / \partial y)$	876
64	(and J. Musielak) Linear functionals over the space of functions continuous in an open interval	891
65	(and V. Pták) Some remarks on Saks spaces	900
66	On the continuity of linear operations in Saks spaces with an application to the theory of summability	913
67	Contribution to the theory of Saks spaces	918
68	(and J. Musielak) On spaces of functions of finite generalised variation	943
69	(and W. Matuszewska) On a class of Saks spaces	947

70	On perfect convergence in certain Banach spaces	951
71	On the summability of bounded sequences by continuous methods	955
72	(and Z. Ciesielski) Some remarks on the convergence of functionals on bases	963
73	(and S. Mazur) On some classes of linear spaces	981
74	Funktionalanalysis und allgemeine Theorie der linearen Transformationen	1004
75	(and J. Musielak) On generalized variations (I)	1021
76	(and J. Musielak) On modular spaces	1052
77	(and A. Alexiewicz) Consistency theorems for Banach space analogues of Teoplitzian methods of summability	1069
78	(and A. Alexiewicz) On summability of double sequences (II)	1081
79	(and W. Matuszewska) On the local tests for convergence of Fourier series	1091
80	(and J. Musielak) Some remarks on modular spaces	1099
81	(and A. Alexiewicz) Inequalities for functionals in locally convex linear spaces	1107
82	(and W. Matuszewska) On certain properties of φ -functions	1112
83	(and J. Musielak) A generalization of certain extension theorems	1117
84	Operations and linear functionals in spaces of φ -integrable functions	1121
85	On integral representability of linear functionals over the space of φ -integrable functions	1124
86	Some remarks on the absolute convergence of biorthogonal expansions in the space C	1127
87	On spaces of φ -integrable functions	1133
88	A note on modular spaces. I	1142
89	(and W. Matuszewska) A note on the theory of s -normed spaces of φ -integrable functions	1148
90	(and J. Albrycht) A note on modular spaces. II	1157
91	(and J. Albrycht) A note on modular spaces. III.	1165
92	A note on modular spaces. IV	1170
93	(and J. Musielak) On modular spaces of strongly summable sequences	1176
94	On some spaces of strongly summable sequences	1196
95	(and W. Matuszewska) A note on modular spaces. V.	1202
96	(and W. Matuszewska) A note on modular spaces. VI	1206
97	A note on modular spaces. VII.	1212
98	(and W. Matuszewska) On some classes of functions with regard to their orders of growth	1217
99	On the convergence of norms in spaces of φ -integrable functions	1231
100	On some classes of modular spaces	1237
101	A note on modular spaces. VIII	1265
102	(and J. Musielak) Notes on the theory of integral. I.	1273
103	(and J. Musielak) Notes on the theory of integral. II	1282
104	(and J. Musielak) Notes on the theory of integral. III.	1290
105	(and W. Matuszewska) A note on modular spaces. IX	1300
106	(and L. Drewnowski) A note on modular spaces. X	1308
107	(and L. Drewnowski) A note on modular spaces. XI	1314
108	(and L. Drewnowski) On orthogonally additive functionals	1320
109	On some classes of finitely additive set functions	1326
110	On spaces $L^{*\varphi}$ based on the notion of a finitely additive integral	1337
111	Absolute continuity of vector-valued finitely additive set functions, I.	1352
112	(and L. Drewnowski) On representation of orthogonally additive functionals	1365
113	(and L. Drewnowski) Continuity and representation of orthogonally additive functionals	1372
114	Absolute continuity of set functions with respect to a finitely subadditive measure.	1379

115	Notes on the theory of integral. IV.	1397
116	(and B. Kotkowski) A note on modular spaces. XII.	1405
117	(and B. Kotkowski) A note on modular spaces. XIII.	1411
118	(and W. Matuszewska) On the Riesz–Fischer theorem for vector-valued functions	1418
119	(and R. Leśniewicz) On generalized variations (II)	1434
120	(and I. Labuda) Some remarks on Saks spaces	1473
121	(and R. Leśniewicz) A note on modular spaces. XIV.	1479
122	(and W. Matuszewska) Modulus of continuity of a set function and some of its applications	1488
123	(and Cz. Byłka) On some generalizations of the Young inequality	1497
124	Juliusz Paweł Schauder, 1899–1943.	1506
125	(and S. Szufła) On the convergence of successive approximations for nonlinear equations in function spaces.	1508
126	(and H. Hudzik, R. Urbański) Interpolation of sublinear, bounded operators in sequence spaces $h_M(X)$ of nonsymmetric type.	1512
127	(and R. Urbański) A generalization of the Brooks–Jewett theorem	1522
128	(and R. Urbański) On \mathfrak{S} -additivity of set functions	1527
129	(and S. Szufła) Generic properties of infinite system of integral equations in Banach spaces	1533
130	(and S. Szufła) On some classes of nonlinear Volterra integral equations in Banach spaces	1546
131	(and J. Ciemnoczołowski) On some classes of vector valued functions of bounded weak variation.	1558
132	(and D. Jach) On some classes of Saks spaces	1568
133	(and W. Matuszewska) On a class of linear functionals which are modular continuous	1576
134	(and R. Urbański) Total variation of a set-valued measure.	1584
135	(and J. Ciemnoczołowski) Inclusion theorems for classes of functions of generalized bounded variations	1589
136	(and S. Szufła) On the structure of L_φ -solution sets of integral equations in Banach spaces	1603
137	Achievements of Polish mathematicians in the domain of functional analysis in the years 1919–1951	1616
138	(and J. Ciemnoczołowski) Variation and compactness.	1642
139	(and J. Ciemnoczołowski) Functions of bounded φ -variation and some related operators	1656
140	(and J. Ciemnoczołowski) Subseries convergence in the space of functions of bounded φ -variation	1671
141	Stefan Kaczmarz (1895–1939)	1679
