Editor's Preface .....	xi
Preface to the English Translation .....	xxiii
Introduction .....	1
Chapter I. The Maximum Principle .....	9
1. Admissible Controls .....	9
2. Statement of the Fundamental Problem .....	11
3. The Maximum Principle .....	17
4. Discussion of the Maximum Principle .....	21
5. Examples. The Synthesis Problem .....	22
6. The Problem with Variable Endpoints and the Transversality Conditions .....	45
7. The Maximum Principle for Non-Autonomous Systems ..	58
8. Fixed Time Problems .....	66
9. The Relation of the Maximum Principle to the Method of Dynamic Programming .....	69
Chapter II. The Proof of the Maximum Principle .....	75
10. Admissible Controls .....	75
11. The Formulation of the Maximum Principle for an Arbitrary Class of Admissible Controls .....	79
12. The System of Variational Equations and its Adjoint System .....	83
13. Variations of Controls and Trajectories .....	86
14. Fundamental Lemmas .....	92
15. The Proof of the Maximum Principle .....	99
16. The Derivation of the Transversality Conditions .....	108
Chapter III. Linear Time-Optimal Processes .....	115
17. Theorems on the Number of Switchings .....	115
18. Uniqueness Theorems .....	123

19. Existence Theorems . . . . .	127
20. The Synthesis of the Optimal Control. . . . .	135
21. Examples . . . . .	140
22. A Simulation of Linear Time-Optimal Processes by Means of Relay Circuits. . . . .	172
23. Linear Equations with Variable Coefficients . . . . .	181
<b>Chapter IV. Miscellaneous Problems. . . . .</b>	<b>189</b>
24. The Case Where the Functional is Given by an Improper Integral. . . . .	189
25. Optimal Processes with Parameters . . . . .	191
26. An Application of the Theory of Optimal Processes to Problems in the Approximation of Functions . . . . .	197
27. Optimal Processes with a Delay . . . . .	213
28. A Pursuit Problem . . . . .	226
<b>Chapter V. The Maximum Principle and the Calculus of Variations</b>	<b>239</b>
29. The Fundamental Problem of the Calculus of Variations	240
30. The Problem of Lagrange . . . . .	248
<b>Chapter VI. Optimal Processes with Restricted Phase Coordinates</b>	<b>257</b>
31. Statement of the Problem . . . . .	258
32. Optimal Trajectories Which Lie on the Boundary of the Region . . . . .	264
33. The Proof of Theorem 22 (Fundamental Constructions). . . . .	270
34. The Proof of Theorem 22 (Conclusion) . . . . .	291
35. Some Generalizations . . . . .	298
36. The Jump Condition . . . . .	300
37. Statement of the Fundamental Result. Examples . . . . .	311
<b>Chapter VII. A Statistical Optimal Control Problem . . . . .</b>	<b>317</b>
38. The Concept of a Markov Process. The Kolmogorov Differential Equation . . . . .	318

39. The Precise Statement of the Statistical Problem . . . . .	322
40. The Reduction of the Evaluation of the Functional $J$ to the Solution of a Boundary Value Problem for the Kolmogorov Equation. . . . .	324
41. The Evaluation of the Functional $J$ in the Case Where the Kolmogorov Equation has Constant Coefficients . . .	327
42. The Evaluation of the Functional $J$ in the General Case	348
References. . . . .	354
Index . . . . .	357
