Contents of Volume I
Time Series: 1949 - 1964

Preface to the Collected Works, by William S. Cleveland		xi
Biography of John W. Tukey, by Frederick Mosteller		xv
Bibliography of John W. Tukey		xix
Foreword to the Time Series Volumes, by John W. Tukey		xxxvii
Tukey's Work on Time Series Analysis, by David R. Brillinger		xliii
Comments on the Individual Papers, by David R. Brillinger		xlvii
1.	Measuring noise color [1949u1] (with R. W. Hamming)	1
2.	The sampling theory of power spectrum estimates [1950k] (with added comments, 1957h)	129
3.	Book Review [1952a]	161
4.	The spectral representation and transformation properties of the higher moments of stationary time series [1953u1]	165
5.	Power spectral methods of analysis and their application to problems in airplane dynamics [1956i] (with H. Press)	185
6.	Table of contents, preface and glossary from *The measurement of power spectra from the point of view of communications engineering* [1959b] (with R. B. Blackman)	257

7.	The estimation of (power) spectra and related quantities [1959c]	279
8.	Equalization and pulse shaping techniques applied to determination of initial sense of rayleigh waves [1959e]	309
9.	An introduction to the measurement of spectra [1959f]	359
10.	Discussion, emphasizing the connection between analysis of variance and spectrum analysis [1961a]	397
11.	Curves as parameters and touch estimation [1961b]	437
12.	The quefrency alanysis of time series for echoes: cepstrum, pseudo-autocovariance, cross-cepstrum and saphe-cracking [1963a] (with B. P. Bogert and M. J. R. Healy)	455
13.	What can data analysis and statistics offer today? [1963e]	495
14.	Mathematics 596: An introduction to the frequency analysis of time series [1963u1]	503
Index		*i*-1

Contents of Volume II
Time Series: 1965 - 1984

Preface to the Collected Works, by William S. Cleveland xi
Biography of John W. Tukey, by Frederick Mosteller xv
Bibliography of John W. Tukey xix
Foreword to the Time Series Volumes, by John W. Tukey xxxvii
Tukey's Work on Time Series Analysis, by David R. Brillinger xliii
Comments on the Individual Papers, by David R. Brillinger xlvii

15. An algorithm for the machine calculation of complex fourier series [1965a] (with J. W. Cooley) 651

16. Data analysis and the frontiers of geophysics [1965b] 659

17. Uses of numerical spectrum analysis in geophysics [1966e] 677

18. Spectrum analysis of geophysical data [1966h] (with R. A. Haubrich) 739

19. Fourier methods in the frequency analysis of data [1966u1] and souvenir sheets [1966u1a] 755

20. Modern techniques of power spectrum estimation [1967b] (with C. Bingham and M. D. Godfrey) 781

21. An introduction to the calculations of numerical spectrum analysis [1968b] 811

22.	Nonlinear (nonsuperposable) methods for smoothing data [1974u1]	837
23.	First Scott lecture [1975u1]	857
24.	Second Scott lecture [1975u2]	885
25.	A data analyst's comments on a variety of points and issues [1978k]	915
26.	Comment on a paper by H. L. Gray *et al.* [1978l]	935
27.	Comments on a paper by C. W. J. Granger [1978n]	939
28.	Can we predict where 'time series' should go next? [1980g]	941
29.	When should which spectrum approach be used? [1980u1]	981
30.	Spectrum analysis in the presence of noise: some issues, and supplement [1983u1] (with D. R. Brillinger)	1001
31.	Styles of spectrum analysis [1984a]	1139
Index		*i*-1
