Foreword by W. T. Martin	<i>vii</i>
Introduction and Some Comments on Wiener's Selected Papers by Norman Levinson	<i>1</i>
Contributions of Norbert Wiener to Linear Theory and Nonlinear Theory in Engineering by Y. W. Lee	<i>17</i>
1. Nets and the Dirichlet Problem	<i>35</i>
2. Differential Space	<i>55</i>
3. The Dirichlet Problem	<i>99</i>
4. Generalized Harmonic Analysis	<i>119</i>
5. Tauberian Theorems	<i>261</i>
6. Über eine Klasse Singulärer Integralgleichungen	<i>361</i>
7. The Homogeneous Chaos	<i>372</i>
8. The Ergodic Theorem	<i>412</i>
9. Entropy and Information	<i>430</i>
10. Problems of Sensory Prosthesis	<i>431</i>
11. Homeostasis in the Individual and Society	<i>440</i>
12. A Factorization of Positive Hermitian Matrices	<i>444</i>
