Preface	iii
Contributors	ix
Conference Participants	xiii
List of Publications of Ky Fan	xv
Smooth and Heavy Viable Solutions to Control Problems <i>Jean-Pierre Aubin</i>	1
On Simplified Proofs of Theorems of von Neumann, Heinz, and Ky Fan, and Their Extended Versions <i>Gong-ning Chen</i>	15
Vandermonde Determinant and Lagrange Interpolation in $\mathbf{R}^S$ <i>Charles K. Chui and M. J. Lai</i>	23
Applications of Nonstandard Theory of Locally Convex Spaces <i>Carl L. DeVito</i>	37
Local Invertibility of Set-Valued Maps <i>Halina Frankowska</i>	47
Some Minimax Theorems Without Convexity <i>Andrzej Granas and Fon-Che Liu</i>	61
Weak Compactness and the Minimax Equality <i>Chung-Wei Ha</i>	77
Nonlinear Volterra Equations with Positive Kernels <i>Norimichi Hirano</i>	83
Some Results on Multivalued Mappings and Inequalities Without Convexity <i>Charles D. Horvath</i>	99
Strong Equilibria <i>Tatsuro Ichiishi</i>	107

A Variational Principle Application to the Nonlinear Complementarity Problem <i>George Isac and M. Thera</i>	127
On a Best Approximation Theorem <i>Hidetoshi Komiya</i>	147
A Vector-Minimization Problem in a Stochastic Continuous-Time n-Person Game <i>Hang-Chin Lai and Kensuke Tanaka</i>	151
Calculation of the $\lambda$ -Function for Several Classes of Normed Linear Spaces <i>Robert H. Lohman and Thaddeus J. Shura</i>	167
Existence of Positive Eigenvectors and Fixed Points for A-Proper Type Maps in Cones <i>W. V. Petryshyn</i>	175
On the Method of Successive Approximations for Nonexpansive Mappings <i>Simeon Reich and I. Shafrir</i>	193
Quasilinear Ellipticity on the N-Torus <i>Victor L. Shapiro</i>	203
A Local Minimax Theorem Without Compactness <i>Shi Shu-zhong and Chang Kung-ching (Zhang Gong-qing)</i>	211
Covering Theorems of Convex Sets Related to Fixed-Point Theorems <i>Mau-Hsiang Shih and Kok-Keong Tan</i>	235
Shapley Selections and Covering Theorems of Simplexes <i>Mau-Hsiang Shih and Kok-Keong Tan</i>	245
Generalizations of Convex Supremization Duality <i>Ivan Singer</i>	253
On the Asymptotic Behavior of Almost-Orbits of Commutative Semigroups in Banach Spaces <i>Wataru Takahashi and Jong Yeoul Park</i>	271
On a Factorization of Operators Through a Subspace of $c_0$ <i>Yau-Chuen Wong</i>	295
Trace Formula for Almost Lie Algebra of Operators and Cyclic One-Cocycles <i>Daoxing Xia</i>	299
Index	309
