<i>Foreword: Solomon Lefschetz (1884–1972) and Joseph Pierre LaSalle (1916–1989)</i>	iii
<i>Preface: Thirty Years of Modern Optimal Control Contributors</i>	v xi
1. Thirty Years of Differential Games <i>Leonard D. Berkovitz</i>	1
2. Some Concepts of Optimality for Infinite Horizon Optimal Control and Their Interrelationships <i>Dean A. Carlson</i>	13
3. Discontinuous Solutions of Bounded Variation to Problems of the Calculus of Variations and of Quasi-Linear Hyperbolic Differential Equations. Integrals of Serrin and Weierstrass <i>Lamberto Cesari</i>	23
4. Control Problems for Abstract Volterra Functional-Differential Equations <i>Constantin Corduneanu</i>	41
5. Deterministic Control of Uncertain Systems <i>M. Corless and George Leitmann</i>	49
6. Explicit Estimates for Convergence of Suboptimal Controls <i>Hector Fattorini and Halina Frankowska</i>	71
7. Set-Valued Analysis and Some Control Problems <i>Halina Frankowska</i>	89
8. Caratheodory Type Selections of Aumann Integrals <i>Andrzej Fryszkowski</i>	105

9.	Efficient General Numerical Methods in Optimal Control Theory <i>John Gregory and Cantian Lin</i>	115
10.	Interconnection Between Ordinary and Delay Differential Equations <i>Istvan Györi</i>	131
11.	On a Tracking Problem <i>Sherry E. Hammel and Pan-Tai Liu</i>	143
12.	Nilpotent Approximations of Control Systems <i>Henry Hermes</i>	157
13.	Nonlinear Discrete Time Systems: Accessibility Conditions <i>Bronislaw Jakubczyk and Eduardo D. Sontag</i>	173
14.	Invariants and Optimality <i>Velimir Jurdjevic</i>	187
15.	Optimal Control Problems Arising in Large Deviation Theory <i>Efthimos Kappos</i>	203
16.	Periodic and Aperiodic Orbits in the Hamiltonian Formulation of a Model Magnetic System <i>Charles Kaufman, N. Srivastava, and G. Müller</i>	217
17.	Existence of Minimizers and “Complete Figure” in Linear-Quadratic Problems of Optimal Control <i>Jacob Kogan</i>	237
18.	On Near-Optimum Large-Scale Regulations <i>G. S. Ladde and O. Sirisaengtaksin</i>	249
19.	On Some Optimal Control Problems of Differential Equations with Additional Equality Constraints <i>Urszula Ledzewicz-Kowalewska</i>	259
20.	Differential Inclusions, Linear Selections, and an Optimal Control Problem <i>S. J. Lee and M. Z. Nashed</i>	271
21.	Optimal Feedback <i>Stanislaw Lojasiewicz and W. Szpunar</i>	289
22.	Bang-Bang Control of Quasi-Differential Equations <i>Lawrence Markus</i>	301
23.	Towards Dynamic Control Optimization of Flexible Manufacturing Cells <i>Pablo Spinadel</i>	315
24.	Differential Games and Optimal Control Theory <i>Vera W. de Spinadel</i>	341
25.	Thirty Years of Optimal Control: Was the Path Unique? <i>Hector J. Sussmann</i>	359
26.	Exact Controllability in the Presence of Damping <i>Robert Triggiani</i>	377
27.	Some Selected Problems of Optimal Control <i>Jack Warga</i>	389
28.	Stopping Times for Stochastic Approximation <i>George Yin</i>	409

Contents	ix
29. Remarks and Personal Reminiscences	421
<i>Laurence C. Young</i>	
<i>Index</i>	435
