Contents

D. Auzinger, Hj. Wacker:

First steps to an on-line control for pusher type reheating furnaces 9

B. Bank, R. Mandel:

(Mixed-) integer solutions of quasiconvex polynomial inequalities 20

H. Bernau:

An exact penalty function method for strictly convex quadratic problems 35

F. Fiedler:

Doubly stochastic matrices and optimization 44

F. Giannessi:

On a generalization of F. John Theorem for constrained extremum problems 52

J. Guddat, H. Th. Jongen:

On global optimization based on parametric optimization 63

H. Hollatz:

Extended subdifferential and minimization of nondifferentiable functions 80

P. Kall:

Stochastic programming with recourse: upper bounds and moment problems - a review 86

D. Klatte:

On strongly stable local minimizers in nonlinear programs 104

B. Kummer:

Newton's method for non-differentiable functions 114

K. Lommatzsch:

A minimization of a strictly convex function on a simplex 126

W. Oettli:

Monoton-konvexe Funktionen - eine Bemerkung zum Satz von Browder-Minty 130

D. Pallaschke:

Quasi-differentiable functions in non-differentiable optimization theory 137

J. Piehler:

The global rank of Gomory cuts 142

B. Pshenichnyj:

Necessary conditions for an extremum penalty functions and regularity 146

S. Rolewicz:

On uniform stability of uniformly bounded weak evolution operators 158

W. Römisch, R. Schultz:

On distribution sensitivity in chance constrained programming 161

G. S. Rubinstein:

The canonical group of increasing functions of bounded convex variation and some of its applications 169

J. Rückmann, K. Tammer:

Theoretical foundations of two-level methods in nonconvex optimization 180

M. Schoch:

An investigation of the Frobenius problem 191

H. Schramm, J. Zowe:

A combination of the bundle approach and the trust region concept 196

K. Zimmermann:

Optimization problems with max-separable constraints and additively separable objective function 210

S. Zlobec:

Structural optima in nonlinear programming 218

M. Vlach: On aggregation of variables in linear programming 227
