INVITED PAPERS

Graphs as an Aid to Understanding Special Functions 3
by R. A. Askey

Asymptotics of Integals, Series, and Operators 35
by L. Berg

Asymptotic Expansions for the Coefficient Functions Associated with Linear Second-Order Differential Equations: The Simple Pole Case 53
by W. G. C. Boyd

Landen Transformations of Integrals 75
by B. C. Carlson

Accelerating the Convergence of Chebyshev Series 95
by L. M. Ciasullo and J. A. Cochran

Practical Methods for the Uniform Asymptotic Evaluation of Oscillating Integrals with Several Coalescing Saddle Points 137
by J. N. L. Connor

New Inequalities for the Zeros of Confluent Hypergeometric Functions 175
by Luigi Gatteschi

How (Un)stable Are Vandermonde Systems? 193
by Walter Gautschi

Singular Point and Exponential Asymptotics 211
by Floyd B. Hanson

Uniform Asymptotic Remainders 241
by D. S. Jones

Period Tripling and Subharmonic Oscillations in Marangoni Flows in a Cylindrical Liquid Bridge 265
by Nicholas D. Kazarinoff and Joseph S. Wilkowski

Positive Solutions for Degenerate and Nondegenerate Elliptic Systems: Existence and Numerical Approximations 285
by Anthony W. Leung and Guangwei Fan

Underlined name indicates the presenter of the paper.

Observable Tunneling in Several Dimensions 299
by R. E. Meyer

On Stokes' Phenomenon and Converging Factors 329
by Frank W. J. Olver

Singularly Perturbed Boundary Value Problems Viewed in the Liénard Plane 357
by J. D. Allen and R. E. O'Malley, Jr.

On the Asymptotic Theory of the Orr-Sommerfeld Problem 379
by W. H. Reid

Gevrey Property of Formal Solutions in a Parameter 393
by Yasutaka Sibuya

A Riccati Approach to the Airy Equation 403
by Donald R. Smith

A System of Polynomials Associated with the Chester, Friedman, and Ursell Technique 417
by K. Soni and R. P. Soni

Rational Approximation of the Step, Filter, and Impulse Functions 441
by Yasuhiko Ikebe, Marek Kowalski, and Frank Stenger

Polynomial Asymptotic Estimates of Gegenbauer, Laguerre, and Jacobi Polynomials 455
by Nico M. Temme

Integrals with a Large Parameter and the Maximum-Modulus Principle 477
by F. Ursell

Finite Axial Extension and Torsion of Elastic Helicoidal Shells 491
by Frederic Y. M. Wan

Some Properties of Convolution Sequences and Asymptotics for the Taylor Coefficients for Products of Bessel Functions 517
by Jet Wimp

A Generalization of Olver's Algorithm for Linear Difference Systems 535
by R. V. M. Zahar

CONTRIBUTED PAPERS

Continental Shelf Wave Scattering: Partial Removal of the Rigid Lid by Anthony M. J. Davis 555

Some Aspects of Invariant Subspaces Computation by Luca Dieci and Robert D. Russell 565

Error Bounds via Complete Monotonicity for a Uniform Asymptotic Expansion of the Legendre Function $P_n^{-m}(\cosh z)$ by C. L. Frenzen 587

Computational Asymptotics of Fourth-Order Operators by P. A. Carinhas and S. A. Fulling 601

Universal Asymptotic Distribution Functions mod 1 by William M. Y. Goh and Eric Schmutz 619

On the n-Variable Saddle Point and Steepest Descent Methods by D. Kaminski 627

Applications of the Method of Steepest Descents in Wave-Propagation Problems by Francesco Mainardi and Giuliano Vitali 639

The Asymptotics of Pearcey's Integral for Complex Variables by R. B. Paris 653

Asymptotic Methods in Magnetoconvection by N. Rudraiah, O. P. Chandna , and R. M. Barron 669

The Interior Layer Structure for a Linear Parabolic Problem with Discontinuous Data by Shagi-Di Shih 685

Asymptotic Expansions of Solutions to $\Delta u - u = f$ at Infinity by D. Siegel 697

Approximating Zeros of Solutions of Second-Order Linear ODEs by "Phase Function" Methods by R. Spigler and M. Vianello 707

Asymptotic Expansions of Integrals of Two Bessel Functions by B. J. Stoyanov, R. A. Farrell, and J. F. Bird 723

On Eigenvalues with Exponentially Small Imaginary Part by A. D. Wood and R. B. Paris 741

Index *751*
