

Contents

Contents of Volume I	xi
Contributors	xv
KP Equations, Strings, and the Schottky Problem	473
<i>Motohico Mulase</i>	
A Note on the Holonomic System of Invariant Hyperfunctions on a Certain Prehomogeneous Vector Space	493
<i>Masakazu Muro</i>	
Applications of Transformation Theory for Nonlinear Integrable Systems to Linear Prediction Problems and Isospectral Deformations	505
<i>Yoshimasa Nakamura</i>	
New Local Supersymmetry in the Framework of Einstein Gravity	517
<i>Noburo Nakanishi</i>	
$K3$ Surfaces Related to Root Systems in E_8	527
<i>Isao Naruki</i>	

Wronskian Determinants and the Gröbner Representation of a Linear Differential Equation: An Approach to Nonlinear Integrable Systems	549
<i>Masatoshi Noumi</i>	
Higher Codimensional Boundary Value Problem and F -Mild Hyperfunctions	571
<i>Toshinori Ôaku</i>	
Hodge Numbers of a Kummer Covering of \mathbf{P}^2 Ramified along a Line Configuration	587
<i>Takayuki Oda</i>	
On a Stochastic Difference Equation for the Multi-Dimensional Weakly Stationary Process with Discrete Time	601
<i>Yasunori Okabe</i>	
Bäcklund Transformations of Classical Orthogonal Polynomials	647
<i>Kazuo Okamoto</i>	
A Deformation of Dirichlet's Class Number Formula	659
<i>Takashi Ono</i>	
A Method of Harmonic Analysis on Semisimple Symmetric Spaces	667
<i>Toshio Oshima</i>	
A Note on Ehrenpreis' Fundamental Principle on a Symmetric Space	681
<i>Toshio Oshima, Yutaka Saburi, and Masato Wakayama</i>	
Resurgence, Quantized Canonical Transformations, and Multi-Instanton Expansions	699
<i>F. Pham</i>	
Quantization of Extended Vortices and $s\text{Diff } \mathbf{R}^3$	727
<i>Mario Rasetti and Tullio Regge</i>	

Moduli Space for Fuchsian Groups	735
<i>Kyoji Saito</i>	
The Hamburger Theorem for the Epstein Zeta Functions	789
<i>Fumihiko Sato</i>	
Microfunctions for Boundary Value Problems	809
<i>Pierre Schapira</i>	
Regularization of the Product of Complex Powers of Polynomials and Its Application	821
<i>Jiro Sekiguchi</i>	
On the Local Solvability of Fuchsian Type Partial Differential Equations	837
<i>Hidetoshi Tahara</i>	
$\bar{\partial}_b$ -Cohomology and the Bochner–Martinelli Kernel	849
<i>Shinichi Tajima</i>	
Issues of Multi-Dimensional Integrable Systems	853
<i>K. Takasaki</i>	
Second Microlocalization and Conical Refraction (II)	867
<i>Nobuyuki Tose</i>	
Pseudodifferential Operators in Hyperfunction Theory	883
<i>Keisuke Uchikoshi</i>	
Some Observations on Geometric Representations of the Superconformal Algebras and a Super Analogue of the Mumford Sheaves	893
<i>Kimio Ueno and Hirofumi Yamada</i>	
New Elliptic Solitons	901
<i>J.-L. Verdier</i>	

On the Microlocal Smoothing Effect of Dispersive Partial Differential Equations, I: Second-Order Linear Equations	911
<i>Masao Yamazaki</i>	
Locally Prehomogeneous Spaces and Their Transverse Localizations	927
<i>Tamaki Yano</i>	
On Carlson's Theorem for Holomorphic Functions	943
<i>Kunio Yoshino</i>
