

Contents

Preface	iii
Contributors	xiii
G. Milton Wing: The Early Years <i>V. Faber</i>	xvii
Transport Theory in Binary Statistical Mixtures <i>G. C. Pomraning, C. D. Levermore, and J. Wong</i>	1
A Look at Transport Theory from the Point of View of Linear Algebra <i>V. Faber and Thomas A. Manteuffel</i>	37
A Quasi-Diffusive Approach to Linear Transport <i>M. Celaschi and B. Montagnini</i>	63
On the Asymptotic Behaviour of Electrons in an Ionized Gas <i>L. Arlotti</i>	81
Dispersion Characteristics and Landau Damping in a Plasma with an External Field <i>V. G. Molinari and P. Peerani</i>	97
Duality of Backward and Forward Transport Formulations in Radiation Damage <i>A. K. Prinja</i>	105
P-1 Transverse-Leakage Treatment of Interface-Current Nodal Transport Method <i>Y-W H. Liu</i>	113
Systems of Conservation Equations in Nonlinear Particle Transport Theory <i>V.C. Boffi</i>	123
The Nonlinear Boltzmann Equation: Representation Theory, Super- and Subolutions <i>Peter Takáč</i>	147
Comparison Theorems and Their Use in the Analysis of Some Nonlinear Diffusion Problems <i>Hans G. Kaper and Man Kam Kwong</i>	165
Bubbles and Bends and Bio-Transport <i>B. R. Wienke and B. A. Hills</i>	179

A Semigroup for Lagrangian 1D Isentropic Flow <i>G.H. Pimbley</i>	203
Mass Transfer, Heat Transfer, and Brownian Particle Deposition onto Two Spheres in Contact <i>H. W. Chiang</i>	217
Eigenmodes of a Random Walk on a 2D Lattice Torus with One Trap <i>David C. Torney</i>	237
A Stability Analysis of the Chandrasekhar Reflection Equation in Radiative Transfer <i>T. W. Mullikin</i>	247
A Discrete Model of Transport and Invariant Imbedding in Two or More Dimensions <i>James Coronos</i>	271
Invariant Imbedding in Two Dimensions <i>V. Faber, Daniel L. Seth, and G. Milton Wing</i>	279
Refined Eigenvalue Estimates in the Case of Lipschitz Continuity <i>James A. Cochran</i>	301
Remarks on Some Iterative Methods for an Integral Equation in Fourier Optics <i>C. W. Groetsch</i>	313
Inversion of a First-Kind Integral Equation as a Plasma Diagnostic <i>Joseph F. McGrath, George Charatis, Robert J. Schroeder, and Stephen Wineberg</i>	325
Application of the Numerical Laplace Transform Inversion to Neutron Transport Theory <i>B. D. Ganapol</i>	343
A Bayesian Approach to Nonlinear Inversion: Abel Inversion from X-Ray Attenuation Data <i>Kenneth M. Hanson</i>	363
Numerical Solution of the Magnetic Relief Problem <i>Katarzyna Jonca and Curtis R. Vogel</i>	379
The Weierstrass Transform in X-Ray Analysis <i>John D. Zahrt and Natalie D. Carter</i>	393
Multi-Boundary Alternating Direction Collocation Schemes for Computing Ideal Flows over Bodies of Arbitrary Shape Using Cartesian Coordinates <i>Kevin Cooper and P. M. Prenter</i>	401
A Priori L^2 Error Estimates for Galerkin Approximations to Semi-Linear Parabolic Integro-Differential Equations <i>Yanping Lin</i>	421

Counting Backward from 10
