

## CONTENTS

### PART I: AN APPRECIATION

|  |    |
|--|----|
| 1. Harold Hotelling. <i>William G. Madow</i> .....                                 | 3  |
| 2. Harold Hotelling—A Leader in Mathematical Statistics. <i>Jerzy Neyman</i> ..... | 6  |
| 3. The Teaching of Statistics. <i>Harold Hotelling</i> .....                       | 11 |
| 4. Bibliography of Harold Hotelling .....  | 25 |

### PART II: CONTRIBUTIONS TO PROBABILITY AND STATISTICS

|   |     |
|---|-----|
| 5. Some Remarks on the Design and Analysis of Factorial Experiments.<br><i>R. L. Anderson</i> .....   | 35  |
| 6. A Limitation of the Optimum Property of the Sequential Probability<br>Ratio Test. <i>T. W. Anderson and Milton Friedman</i> .....                    | 57  |
| 7. Decision Theory and the Choice of a Level of Significance for the t-Test.<br><i>Kenneth J. Arrow</i> .....   | 70  |
| 8. Simultaneous Comparison of the Optimum and Sign Tests of a Normal<br>Mean. <i>R. R. Bahadur</i> .....  | 79  |
| 9. Some Stochastic Models in Ecology and Epidemiology. <i>M. S. Bartlett</i> ...  | 89  |
| 10. Random Orderings and Stochastic Theories of Responses. <i>H. D. Block<br/>and J. Marschak</i> .....   | 97  |
| 11. On a Method of Constructing Steiner's Triple Systems. <i>R. C. Bose</i> ....  | 133 |
| 12. A Representation of Hotelling's $T^2$ and Anderson's Classification Sta-<br>tistic $W$ in Terms of Simple Statistics. <i>Albert H. Bowker</i> ..... | 142 |
| 13. Euler Squares. <i>Kenneth A. Bush</i> .....   | 150 |
| 14. A Compromise Between Bias and Variance in the Use of Nonrepresenta-<br>tive Samples. <i>Herman Chernoff</i> .....                                   | 153 |

|   |     |
|---|-----|
| 15. Construction of Fractional Factorial Designs of the Mixed $2^m 3^n$ Series.<br><i>W. S. Connor</i> .....                              | 168 |
| 16. Application of Boundary Theory to Sums of Independent Random Variables. <i>J. L. Doob, J. L. Snell, and R. E. Williamson</i> .....    | 182 |
| 17. Some $k$ -Sample Rank-order Tests. <i>Meyer Dwass</i> .....   | 198 |
| 18. Characterization of Some Location and Scale Parameter Families of Distributions. <i>S. G. Ghurye</i> .....                            | 203 |
| 19. Generalization of Some Results for Inversion of Partitioned Matrices.<br><i>B. G. Greenberg and A. E. Sarhan</i> .....                | 216 |
| 20. Selecting a Subset Containing the Best of Several Binomial Populations.<br><i>Shanti S. Gupta and Milton Sobel</i> .....              | 224 |
| 21. Consistency of Maximum Likelihood Estimation of Discrete Distributions.<br><i>J. Hannan</i> .....                                     | 249 |
| 22. An Upper Bound for the Variance of Kendall's "Tau" and of Related Statistics. <i>Wassily Hoeffding</i> .....                          | 258 |
| 23. On the Amount of Information Contained in a $\sigma$ -Field. <i>Gopinath Kallianpur</i> .....   | 265 |
| 24. The Evergreen Correlation Coefficient. <i>M. G. Kendall</i> .....   | 274 |
| 25. Robust Tests for Equality of Variances. <i>Howard Levene</i> .....  | 278 |
| 26. Intrablock and Interblock Estimates. <i>Henry B. Mann and M. V. Menon</i>   | 293 |
| 27. A Bivariate Chebyshev Inequality for Symmetric Convex Polygons.<br><i>Albert W. Marshall and Ingram Olkin</i> .....                   | 299 |
| 28. Notes on the Numerical Convergence of Iterative Processes. <i>Sigeiti Moriguti</i> .....  | 309 |
| 29. Prediction in Future Samples. <i>George E. Nicholson, Jr.</i> .....   | 322 |
| 30. Ranking in Triple Comparisons. <i>R. N. Pendergrass and R. A. Bradley</i> ...   | 331 |
| 31. A Statistical Screening Problem. <i>Herbert Robbins</i> .....   | 352 |
| 32. On the Power of Some Rank-order Two-sample Tests. <i>Joan Raup Rosenblatt</i> .....   | 358 |
| 33. Some Non-parametric Analogs of "Normal" ANOVA, MANOVA, and of Studies in "Normal" Association. <i>S. N. Roy and V. P. Bhapkar</i> ... | 371 |
| 34. Relations Between Certain Incomplete Block Designs. <i>S. S. Shrikhande</i>   | 388 |
| 35. Infinitesimal Renewal Processes. <i>Walter L. Smith</i> .....   | 396 |

|   |     |
|---|-----|
| 36. Classification Procedures Based on Dichotomous Response Vectors. <i>Herbert Solomon</i> ..... | 414 |
| 37. Multiple Regression. <i>Charles Stein</i> .....   | 424 |
| 38. An Optimum Replicated Two-sample Test Using Ranks. <i>Milton E. Terry</i>                     | 444 |
| 39. A Survey of Sampling from Contaminated Distributions. <i>John W. Tukey</i>                    | 448 |
| 40. Multidimensional Statistical Scatter. <i>S. S. Wilks</i> .....                                | 486 |
| 41. Convergence of the Empiric Distribution Function on Half-spaces.<br><i>J. Wolfowitz</i> ..... | 504 |
| 42. Analysis of Two-factor Classifications With Respect to Life Tests.<br><i>M. Zelen</i> .....   | 508 |
