CONTENTS

Preface vii

Archimedes 1
J. M. Rassias

Towards the Ultimate Scheme for Numerical Integration in Multi-Dimensions 5
C. D. Angelopoulos and V. D. Angelopoulos

Efficient Finite Difference Schemes for Multi-Dimensional Nonlinear Diffusion Equations 21
C. D. Angelopoulos and V. D. Angelopoulos

On a Simplified Quasilinear Equation of Elasticity Theory 43
L. Berg and K. Frischmuth

Quantum Stochastic Integral Equations with Exponential Noise 61
A. Boukas

The Euler Formula for Polyhedra and Functional Equations 77
E. Castillo and R. Ruiz-Cobo

Relative Homotopy Groups in Unirational Homotopy Theory 85
P. Cherenack

Discrete and Non-Discrete Phenomena in the Mixed Problem 101
C. Q. Wu and Y. K. Liu

A WZ Proof of Ramanujan's Formula for π 107
Sh. B. Ekhad and D. Zeilberger

Problems on the n Dimensional Simplex 109
K. Hatada

On the Reason Why the Product of Two Negative Integers Must be Positive 113
K. Hatada

The Two Squares Theorem 121
P. Karagiorgis and K. Markata

Free Surface Flows Induced by Submerged Sources 125
A. C. King

Archimedes and the Invention of Burning Mirrors: An Investigation of Work by Buffon 139
E. Kreyszig

A Characterization of the $c_2(\mathbb{A})$ Function from the Characteristic Polynomial 149
D. S. Moak and K. J. Heuvers

Algorithms and Complexity for Continuous Problems 157
E. Novak

The Well-Posed Tricomi Problem in the Euclidean Plane 189
J. M. Rassias

A New Computation Formula for the Inverse of a Matrix 197
J. M. Rassias

An Archimedes Solution to the Problem: Find the Volume Common to Two Intersecting Right Circular Cylinders of the Same Radius if the Axis of the First Forms an Non-Orthogonal Angle with that of the Second 205
W. A. Stannard

A Problem which Archimedes Would Probably Like 215
S. Tabachnikov

Application of Expansion of Poisson Kernel to the Dirichlet Problem for a Degenerate Elliptic Equation in the Extended Space 219
X. H. Ji and D. Q. Chen

On the Non-Fredholm Oblique Derivative Problem 227
A. Yanushauskas

Extreme Position Functionals of Involutive Algebras 243
Y. Tsertos

Fractional Linear Algebra 251
J. M. Rassias

The Global Cauchy Problem for Quasilinear Hyperbolic Equations $u_{xx} + f_1(u_x)f_2(u_y)u_{xy} = 0$ 269
O. Jokhadze

On the Stability of the Multi-Dimensional Nonlinear Euler-Algebra Functional Equation 275
J. M. Rassias

Multi-Dimensional Landau Inequalities 287
J. M. Rassias

Open Problems in Analysis 355
J. M. Rassias

On the Stability of a Multi-Dimensional Cauchy Type Functional Equation 365
J. M. Rassias
