

# Table of contents of Volume II

Portrait I. Gohberg . . . . .	VII
Editorial Preface . . . . .	IX
<i>Abergel F., Temam R.:</i>	
Duality methods for the boundary control of some evolution equations . . . . .	1
<i>Arocena R.:</i>	
Unitary extensions of isometries and contractive intertwining dilations . . . . .	13
<i>Ball J.A., Helton J.W.:</i>	
Factorization and general properties of nonlinear Toeplitz operators . . . . .	25
<i>Baumgärtel H.:</i>	
Quasilocal algebras over index sets with a minimal condition . . . . .	43
<i>Bercovici H., Voiculescu D.:</i>	
The analogue of Kuroda's theorem for n-tuples . . . . .	57
<i>Clancey K.F.:</i>	
The geometry of representing measures and their critical values . . . . .	61
<i>Costabel M., Saranen J.:</i>	
Boundary element analysis of a direct method for the biharmonic Dirichlet problem . . . . .	77
<i>Cotlar M., Sadosky C.:</i>	
Nonlinear lifting theorems, integral representations and stationary processes in algebraic scattering systems . . . . .	97
<i>Ćurgus B., Dijksma A., Langer H., Snoo H.S.V. de:</i>	
Characteristic functions of unitary colligations and of bounded operators in Krein spaces . . . . .	125
<i>Djrbashian M.M.:</i>	
Differential operators of fractional order and boundary value problems in the complex domain . . . . .	153
<i>Dym H.:</i>	
On reproducing kernel spaces, J unitary matrix functions, interpolation and displacement rank . . . . .	173
<i>Feintuch A.:</i>	
On asymptotic Toeplitz and Hankel operators . . . . .	241
<i>Foias C., Tannenbaum A.:</i>	
Iterative commutant lifting for systems with rational symbol . . . . .	255
<i>Frank L.S., Heijstek J.J.:</i>	
On the reduction of coercive singular perturbations to regular perturbations . . . . .	279

<i>Greenberg W., Polewczak J.:</i>	
Averaging techniques for the transport operator and an existence theorem for the BGK equation in kinetic theory . . . . .	299
<i>Helton J.W.:</i>	
Factorization of nonlinear system . . . . .	311
<i>Kaashoek M.A., Woerdeman H.J.:</i>	
Minimal lower separable representations: characterization and construction . . .	329
<i>Kérchy L.:</i>	
On the inclination of hyperinvariant subspaces of $C_{11}$ -contractions . . . . .	345
<i>Korenblum B.:</i>	
Unimodular Möbius-invariant contractive divisors for the Bergman space . . . .	353
<i>McLean W., Wendland W.L.:</i>	
Trigonometric approximation of solutions of periodic pseudodifferential equations . . . . .	359
<i>Meister E., Speck F.-O.:</i>	
Wiener-Hopf factorization of certain non-rational matrix functions in mathematical physics . . . . .	385
<i>Nakamura Y.:</i>	
Classes of operator monotone functions and Stieltjes functions . . . . .	395
<i>Nikolskii N.K., Vasyunin V.I.:</i>	
A unified approach to function models, and the transcription problem . . . . .	405
<i>Prössdorf S., Rathsfeld A.:</i>	
Quadrature methods for strongly elliptic Cauchy singular integral equations on an interval . . . . .	435
<i>Santos A.F. dos:</i>	
General Wiener-Hopf operators and representation of their generalized inverses . . . . .	473
<i>Sarason D.:</i>	
Exposed points in $H^1, I$ . . . . .	485
<i>Semenov E.M., Shneiberg I. Ya.:</i>	
Geometrical properties of a unit sphere of the operator spaces in $L_p$ . . . . .	497
<i>Taylor K.F.:</i>	
$C^*$ -algebras of Crystal groups . . . . .	511
<i>Widom H.:</i>	
On Wiener-Hopf determinants . . . . .	519
Table of contents of Volume I . . . . .	545
Errata . . . . .	547
