

CONTENTS

Nathan Saul Mendelsohn (C.C. LINDNER)	vii
Nathan Mendelsohn. As I have known him (G. DE B. ROBINSON)	ix
Editor's preface	xi
B. ALSPACH and T.D. PARSONS, On hamiltonian cycles in metacirculant graphs	1
L.D. ANDERSEN, Embedding latin squares with prescribed diagonal	9
L.D. ANDERSEN and E. MENDELSON, A direct construction for latin squares without proper subsquares	27
L. BABAI and J. NEŠETŘIL, High chromatic rigid graphs II	55
F.E. BENNETT, Direct constructions for perfect 3-cyclic designs	63
N.L. BIGGS, Distance-regular graphs with diameter three	69
P.J. CAMERON, Colour schemes	81
M.J. COLBOURN and C.J. COLBOURN, The analysis of directed triple systems by refinement	97
J. DÉNES and P. HERMANN, On the product of all elements in a finite group	105
R.H.F. DENNISTON, Enumeration of symmetric designs (25, 9, 3)	111
P. ERDŐS and J. LARSON, On pairwise balanced block designs with the sizes of blocks as uniform as possible	129
T. EVANS, Finite representations of two-variable identities or why are finite fields important in combinatorics ?	135
T. EVANS and M. FRANCE, Some connections between Steiner systems and self-conjugate sets of m.o.i.s.	143
U. FAIGLE, Incidence-geometric aspects of finite abelian groups	161
D. GALE and A.J. HOFFMAN, Two remarks on the Mendelsohn–Dulmage theorem	171
B. GANTER and R. QUACKENBUSH, Düroids	179

H. GRÖFLIN and A.J. HOFFMAN, Lattice polyhedra II: Generalization, construction and examples	189
W. HAEMERS and J.H. VAN LINT, A partial geometry $pg(9, 8, 4)$	205
Z. HEDRLÍN, P. HELL and C.S. KO, Homomorphism interpolation and approximation	213
K. HEINRICH, Prolongation in m -dimensional permutation cubes	229
A.J.W. HILTON and C.A. RODGER, Match-tables	239
G.B. HOGHTON and A.D. KEEDWELL, On the sequenceability of dihedral groups	253
D.R. HUGHES, A combinatorial construction of the small Mathieu designs and groups	259
C.C. LINDNER and W.D. WALLIS, Embeddings and prescribed intersections of transitive triple systems	265
R. MATHON, On linked arrays of pairs	273
E. MENDELSON and K.T. PHELPS, Simple Steiner quadruple systems	293
A. NEUMAIER, Rectagraphs, diagrams, and Suzuki's sporadic simple group	305
R. PADMANABHAN, Logic of equality in geometry	319
F. PIPER, On axial automorphisms of symmetric designs	333
I. RIVAL and B. SANDS, Pictures in lattice theory	341
S.A. VANSTONE, On mutually orthogonal resolutions and near-resolutions	357
Appendix. Research papers by N.S. Mendelsohn	371
