

# Contents

<b>Publications of P. A. P. Moran</b> .....	1
---	---

## Part 1 — Genetics

W. J. EWENS. Aspects of population genetics theory .....	9
C. C. HEYDE. The effect of differential reproductive rates on the survival of a gene represented in a founder population .....	19
J. F. C. KINGMAN. On the genealogy of large populations .....	27
CEDRIC A. B. SMITH. Correlations and regressions in 'family' data .....	45
G. A. WATTERSON. Substitution times for mutant nucleotides .....	59
SUSAN R. WILSON. Heritability .....	71

## Part 2 — Geometry and Geometrical Probability

P. ERDÖS AND I. VINCZE. On the approximation of convex, closed plane curves by multifocal ellipses .....	89
R. E. MILES AND R. J. MAILLARDÉ. The basic structures of Voronoi and generalized Voronoi polygons .....	97
B. H. NEUMANN. Plane polygons revisited .....	113

## Part 3 — Mathematics

DAVID G. KENDALL. The scale of perfection .....	125
B. C. RENNIE. On generalized functions .....	139

## Part 4 — Human Populations

BERNARD BENJAMIN. The human lifespan .....	159
VIOLET CANE AND ROSANNE McNAMEE. The spread of infection in a heterogeneous population .....	173

## Part 5 — Statistical Theory

M. S. BARTLETT. The 'ideal' estimation equation .....	187
H. E. DANIELS. A transformation for normal extremes .....	201
A. W. DAVIS. On the distribution of Hotelling's one-sample $T^2$ under moderate non-normality .....	207
P. D. FINCH. Functional dependence from a descriptive viewpoint .....	217
C. R. HEATHCOTE. Linear regression by functional least squares .....	225
M. R. OSBORNE. A finite algorithm for the rank regression problem .....	241
ELIZABETH L. SCOTT. Comparison of two treatments when there may be an initial effect .....	253
GEOFFREY S. WATSON. Distributions on the circle and sphere .....	265
MARK WESTCOTT. Approximations to hard-core models and their application to statistical analysis .....	281
E. J. WILLIAMS. Some classes of conditional inference procedures .....	293

## Part 6 — Stochastic Processes

HARRY COHN. Another look at the finite mean supercritical Bienaymé-Galton-Watson process .....	307
D. J. DALEY. Stationary point processes with Markov-dependent intervals and infinite intensity .....	313
J. GANI. On the probability generating function of the sum of Markov Bernoulli random variables .....	321
J. M. HAMMERSLEY. Critical phenomena in semi-infinite systems .....	327
A. M. HASOFER. Simple trigonometric models for narrow-band stationary processes .....	333
DAVID K. PICKARD. Inference for general Ising models .....	345
DAVID POLLARD. Beyond the heuristic approach to Kolmogorov-Smirnov theorems .....	359
E. SENETA. Entropy and martingales in Markov chain models .....	367
D. VERE-JONES. On the estimation of frequency in point-process data ...	383
P. WHITTLE. Identities relating forward and backward treatments of optimisation .....	395

## Part 7 — Time Series

E. J. HANNAN. Testing for autocorrelation and Akaike's criterion .....	403
DON McNEIL. Time series modelling — an integrated approach .....	413
