Preface	vii
List of Contributors	xv
1 BIOGRAPHY	1
John W. Tukey	
2 BIBLIOGRAPHY	7
Books	7
Papers	18
Miscellaneous	37
Reviews	41
3 CONTRIBUTIONS AS A SCIENTIFIC GENERALIST	45
William Kruskal	
3.1 Background	45
3.2 Creation and Generalization within Statistics	47
3.3 Overlaps between Statistics and Other Domains	49
3.4 Establishing Links among Nonstatistical Fields	49
3.5 Links between Research and Applications	50
3.6 Formation of New Fields of Inquiry	51
3.7 Encouragement of Other Scholars	53
3.8 Institutional Leadership in Science	53
Appendix 1: The Mosteller Years at AAAS	54
Appendix 2: Resolution Adopted by the Board of Trustees of the Russell Sage Foundation	56
4 CONTRIBUTIONS TO MATHEMATICAL STATISTICS	59
Persi Diaconis and Erich Lehmann	
4.1 Systematic Statistics	60
4.2 Slippage Tests: “The Problem of the Greatest One”	61
4.3 Stochastic Models for Learning	64
4.4 Products of Random Matrices, Computer Image Generation, and Computer Learning	70
4.5 Number Theory—Statistics for the Love of It	71
References	73

5 CONTRIBUTIONS TO METHODOLOGY AND APPLICATIONS	81
Stephen E. Fienberg	
5.1 Introduction	81
5.2 Public Opinion Polls and Other Survey Data	82
5.3 Quality Control	86
5.4 On Pooling Data	88
5.5 Thurstone-Mosteller Model for Paired Comparisons	88
5.6 Measuring Utility	92
5.7 Measuring Pain	93
5.8 The Analysis of Categorical Data	94
5.9 Statistics and Sports	97
5.10 The Jackknife	99
5.11 Meta-Analysis in the Social and Medical Sciences	101
5.12 Summary	105
Appendix: Frederick Mosteller, Social Science, and the Meta-Analytic Age	106
References	107
 6 FRED AS EDUCATOR	 111
Judith M. Tanur	
6.1 Precollege Education—Advocacy and Action	112
6.2 Face-to-Face Teaching in Traditional and Nontraditional Settings	116
6.3 On Teaching Teachers	124
6.4 Evaluating Education and Evaluating Educational Evaluations	126
6.5 The Learning Process—Research, Teaching, and Practice	127
6.6 Continuing Education	128
References	129
 7 FRED AT HARVARD	 131
Stephen E. Fienberg and David C. Hoaglin, editors	
7.1 Introduction	131
7.2 In the Department of Social Relations	132
7.3 In the Department of Statistics	145
7.4 In the Kennedy School of Government and the Law School	157
7.5 In the School of Public Health	161
7.6 The “Statistician’s Guide to Exploratory Data Analysis”	169
7.7 Epilogue	170
Appendix: Excerpts from “Some Topics of Interest to Graduate Students in Statistics”	172
References	180

8	REVIEWS OF BOOK CONTRIBUTIONS	181
	David C. Hoaglin, editor	
	<i>Sampling Inspection</i> , W. Allen Wallis	183
	<i>The Pre-Election Polls of 1948</i> , Richard F. Link	185
	<i>Statistical Problems of the Kinsey Report</i> , James A. Davis	192
	<i>Stochastic Models for Learning</i> , Paul W. Holland	194
	<i>Probability with Statistical Applications</i> , Emanuel Parzen	199
	<i>The Federalist</i> , John W. Pratt	201
	<i>Fifty Challenging Problems in Probability</i> , Joseph I. Naus	210
	<i>On Equality of Educational Opportunity</i> , Richard J. Light	212
	<i>Federal Statistics</i> , Yvonne M. Bishop	217
	<i>National Assessment of Educational Progress</i> , Lyle V. Jones	223
	<i>Statistics: A Guide to the Unknown</i> , Gudmund R. Iversen	230
	<i>Sturdy Statistics</i> , Ralph B. D'Agostino	233
	<i>Statistics by Example</i> , Janet D. Elashoff	237
	<i>Weather and Climate Modification</i> , Michael Sutherland	240
	<i>Costs, Risks, and Benefits of Surgery</i> , Howard H. Hiatt	244
	<i>Statistics and Public Policy</i> , Michael A. Stoto	247
	<i>Data Analysis and Regression</i> , Sanford Weisberg	251
	<i>Data for Decisions</i> , William B. Fairley	254
	<i>Statistician's Guide to Exploratory Data Analysis</i> , Persi Diaconis	258
	<i>Beginning Statistics with Data Analysis</i> , John D. Emerson	264
	<i>Biostatistics in Clinical Medicine</i> , Joel C. Kleinman	268
