

- 1 Symmetry and Non-Symmetry for the Overdetermined Stekloff Eigenvalue Problem II
G. Alessandrini and R. Magnanini
- 10 Optimal Asymptotics for Solutions to the Initial Value Problem for the Porous Medium Equation
S. B. Angenent and D. G. Aronson
- 20 The Shearing of Nonlinearly Viscoplastic Slabs
Stuart S. Antman and Frank Klaus
- 30 Bounds for Ratios of the First, Second, and Third Membrane Eigenvalues
Mark S. Ashbaugh and Rafael D. Benguria
- 43 Potential Representations of Incompressible Vector Fields
Giles Auchmuty
- 50 Inequalities for the Capillary Problem with Volume Constraint
Catherine Bandle and Jesus Ildefonso Diaz
- 57 Integral Inequalities with Applications to Nonlinear Degenerate Parabolic Equations
Francisco Bernis
- 66 Reaction-Diffusion Systems Modelling a Class of Spatially Structured Epidemic Systems
V. Capasso and R.E. Wilson
- 76 Quenching for Coupled Degenerate Parabolic Equations
C. Y. Chan and K. K. Nip
- 86 Numerical Mountain Pass Methods for Nonlinear Boundary Value Problems
Y.S. Choi and P.J. McKenna
- 96 Spectral Theory of the Magnetic Far Field Operator in an Orthotropic Medium
David Colton and Claudia Erbe
- 104 Conduction-Convection with Change of Phase
E. DiBenedetto and M. O'Leary
- 116 Wave-like Solutions for Gas-Solid Reaction in a Semi-Infinite Medium
Andrea Di Liddo
- 126 Penetration of a Wetting Front in a Porous Medium with Flux Dependent Hydraulic Parameters
A. Fasano and P. Tani
- 134 Clines and Material Interfaces with Nonlocal Interaction
P. C. Fife
- 140 The Seamount Problem
R. P. Gilbert and Yongzhi S. Xu

- 150 On the Existence of Asymmetric Minimizers for the One-Dimensional Ginzburg-Landau Model of Superconductivity
Stuart P. Hastings and William C. Troy
- 159 Applications of Boundary Element Methods to a Class of Nonlinear Boundary Value Problems in Mechanics
George C. Hsiao
- 169 On the Metastable and Supersensitive Motion of Shocks for Viscous Conservation Laws in One Space Dimension
Jacques G.L. Laforgue and Robert E. O'Malley, Jr.
- 177 On Expansion Methods for Inverse and Recovery Problems From Partial Information
M. Zuhair Nashed
- 190 Multiple Steady States in Coaxial Discs Flow
David O. Olagunju
- 199 Quenching for the Heat Equation with a Nonlocal Nonlinearity
W. E. Olmstead and Catherine A. Roberts
- 206 Decay Bounds in Quasilinear Parabolic Problems
L. E. Payne and G. A. Philippin
- 217 Some Complementary Estimates in the Dead Core Problem
René Sperb
- 225 Guided TM-Modes in a Self-Focusing Anisotropic Dielectric
C. A. Stuart
- 235 A Boundary Flux Property for a General Nonlinear Diffusion Reaction System
Mabo Suzuki, Alex McNabb, and Anthony J. Bracken
- 240 Different Kinds of Singular Solutions of Nonlinear Parabolic Equations
Juan Luis Vazquez and Laurent Véron
- 250 Uncertainty in Epidemic Models
S.D. Watt and G.C. Wake
- 259 Energy Estimates in Thermoelasticity
R. J. Weinacht and B. F. Esham
- 269 The Wigner-Poisson and Schrödinger-Poisson Systems
P. F. Zweifel and T. M. Morris, III
