

Contents

Preface	xvii
Organizers	xix

Friday January 5 — *Morning Session (Chair: Sudhakar Panda)*

Noncommutative solitons (I) RAJESH GOPAKUMAR	1
Free energy and critical temperature in eleven dimensions JORGE RUSSO	11
On de Sitter entropy and string theory PETR HOŘAVA	23
Strongly coupled gravity and conformal invariance CHRISTOPHER HULL	25

Friday January 5 — *Afternoon Session (Chair: P. Ramadevi)*

Noncommutative solitons (II) SHIRAZ MINWALLA	33
Fuzzy funnels: Non-abelian brane intersections ROBERT MYERS	45
Magnetic branes and giant gravitons SANDIP TRIVEDI	57
String field theory of the $D\bar{D}$ system PER KRAUS	69
Vacuum string field theory (joint contribution with A. Sen) BARTON ZWIEBACH	79

Saturday January 6 — *Morning Session (Chair: Gautam Sengupta, Dileep Jatkar)*

Vacuum string field theory (joint contribution with B. Zwiebach) ASHOKE SEN	79
--	----

Normalization of the boundary superstring field theory action DEBASHIS GHOSHAL	107
Mirror symmetry and some applications KENTARO HORI	113
D-branes and vector bundles on Calabi-Yau manifolds: A view from the helix SURESH GOVINDARAJAN	127
D-branes and $\mathcal{N} = 1$ supersymmetry MICHAEL DOUGLAS	139

Sunday January 7 — *Morning Session (Chair: Bala Sathiapalan)*

String physics at low energies IGNATIOS ANTONIADIS	153
Tunneling-mediated supersymmetry breaking SHAMIT KACHRU	167
Physics at intersecting branes LUIS IBÁÑEZ	169
(A)dS backgrounds from asymmetric orientifolds EVA SILVERSTEIN	179

Sunday January 7 — *Afternoon Session (Chair: Shibaji Roy)*

Gauge invariance and tachyon condensation in open string field theory WASHINGTON TAYLOR	189
Non BPS D-branes on a Calabi-Yau orbifold JAYDEEP MAJUMDER	201
Ramond-Ramond couplings of non-commutative branes NEMANI SURYANARAYANA	213
Instability of charged black holes in anti-de Sitter space STEVEN GUBSER	221
Resolved branes and M-theory on special holonomy spaces MIRJAM CVETIČ	231
Some challenges for holography HERMAN VERLINDE	247

Monday January 8 — *Morning Session (Chair: T. Jayaraman)*

An exact prediction of $\mathcal{N} = 4$ SUSYM gauge theory and comparison with string theory DAVID GROSS	249
--	-----

Bulk couplings to noncommutative branes SUMIT DAS	251
Energy-momentum tensors in matrix theory and in noncommutative gauge theories HIROSI OOGURI	263
Matrix model of two-dimensional black hole VLADIMIR KAZAKOV	279

Monday January 8 — *Afternoon Session (Chair: Jnan Maharana)*

Wilson lines in noncommutative gauge theories YOSHIHISA KITAZAWA	293
Classical and planar limits in noncommutative field theories SOO-JONG REY	303
On field theory of open strings, tachyon condensation and closed strings SAMSON SHATASHVILI	315
Brane-antibrane system and the tachyon potential from matrix model GAUTAM MANDAL	327
AdS, CFT and cosmology STEPHEN HAWKING	339

Tuesday January 9 — *Morning Session (Chair: Swapna Mahapatra)*

Quantum gravity in de Sitter space EDWARD WITTEN	351
D1/D5 systems in $\mathcal{N} = 4$ string theories K. S. NARAIN	367
String theory on AdS_3 and symmetric products AMIT GIVEON	379
Instantons and BPS Wilson loops MICHAEL GREEN	389

Tuesday January 9 — *Afternoon Session (Chair: S. Kalyana Rama)*

More on singularity resolution AMANDA PEET	403
From $\mathcal{N} = 4$ to $\mathcal{N} = 1$: Exact results vs AdS/CFT NICK DOREY	411
Supergravity dual of a cascading confining gauge theory IGOR KLEBANOV	421
Brane dynamics in CFT backgrounds VOLKER SCHOMERUS	437

D-branes in some near-horizon geometries COSTAS BACHAS	447
Wednesday January 10 — <i>Morning Session (Chair: Avinash Dhar)</i>	
Topology of the gauge group in noncommutative gauge theory JEFFREY HARVEY	457
Comments on the thermodynamics of little string theory and two dimensional string theory DAVID KUTASOV	465
Comments on Born-Infeld theory JOHN SCHWARZ	467
Acknowledgments	475
List of participants	477
