

# CONTENTS

<b>Foreword</b>	vii
<b>Programme</b>	viii
<b>List of Participants</b>	xiii
<b>E.J. Beggs</b> 2-forms and noncommutative Hamiltonian dynamics	1
<b>M.-T. Benameur and H. Oyono-Oyono</b> Gap-labelling for quasi-crystals (proving a conjecture by J. Bellissard)	11
<b>W.R. Bergmann and R. Conti</b> On infinite tensor products of Hilbert $*$ -bimodules	23
<b>M. Buneci</b> Haar systems and homomorphisms on groupoids	35
<b>M. Choda</b> Actions of the matrix groups on the free group factors and entropy of automorphisms	51
<b>M. Dadarlat</b> Some remarks on the universal coefficient theorem in KK-theory	65
<b>P. Duclos, O. Lev, P. Šťovíček and M. Vittot</b> Progressive diagonalization and applications	75
<b>D.E. Evans</b> Critical phenomena, modular invariants and operator algebras	89
<b>C. Ferrari and N. Macris</b> Spectral properties of finite quantum Hall systems	115
<b>V. Georgescu and A. Iftimovici</b> $C^*$ -algebras of quantum Hamiltonians	123
<b>F. Hiai</b> $q$ -deformed Araki-Woods algebras	169
<b>J. A Jeong</b> Real rank of graph $C^*$ -algebras	203

<b>T. Katsura</b>	
On crossed products of the Cuntz algebra $\mathcal{O}_\infty$ by quasi-free actions of abelian groups	209
<b>B. Kuckert</b>	
Moving quantum systems: particles versus vacuum	235
<b>S.-H. Kye</b>	
On the facial structures for positive linear maps between matrix algebras	243
<b>N.P. Landsman</b>	
Quantization and the tangent groupoid	251
<b>D. Lenz and P. Stollmann</b>	
Delone dynamical systems and associated random operators	267
<b>W.A. Majewski</b>	
On entanglement of states and quantum correlations	287
<b>M. Măntoiu</b>	
$C^*$ -algebras, dynamical systems, spectral analysis	299
<b>G. Morsella</b>	
The structure of charges in the ultraviolet and an intrinsic notion of confinement	315
<b>D. Pask and S.-J. Rho</b>	
Some intrinsic properties of simple graph $C^*$ -algebras	325
<b>N.C. Phillips</b>	
When are crossed products by minimal diffeomorphisms isomorphic?	341
<b>J. Renault</b>	
AF equivalence relations and their cocycles	365
<b>S. Vaes and A. Van Daele</b>	
The Heisenberg commutation relations, commuting squares and the Haar measure on locally compact quantum groups	379
