

Contents

Chapter 1	Introduction	1
1.1	General remarks	1
1.2	Monetary policy	2
1.3	Fiscal policy	3
1.4	Monetary and fiscal policy interactions	5
1.5	Dynamic and econometric methodology	6
1.6	Outlook	7
Part I	Monetary Policy	
Chapter 2	Empirical Evidence of the IS and Phillips Curves	11
2.1	Introduction	11
2.2	The IS and Phillips curves with backward-looking behavior	13
2.3	The IS and Phillips curves with forward-looking behavior	17
2.4	Conclusion	26
	Appendix A2. Derivation of the new Keynesian Phillips curve	26
Chapter 3	Time-Varying Phillips Curve	31
3.1	Introduction	31
3.2	Time-varying reaction to the unemployment gap	33
3.3	Time-varying NAIRU with supply shocks	37
	3.3.1 Estimate of time-varying NAIRU	37
	3.3.2 Why does the NAIRU change over time?	43
3.4	Conclusion	47
	Appendix A3. The State-Space model and Kalman filter	48
	A3.1 The State-Space model	48
	A3.2 The Kalman filter	49

Chapter 4	Time-Varying Monetary Policy Reaction Function ...	55
4.1	Monetary policy rules	55
4.2	Money-supply and interest-rate rules	56
4.2.1	The money-supply rule	56
4.2.2	An interest-rate rule	58
4.2.3	Comments on the Taylor rule	60
4.3	The OLS regression and Chow break-point tests of the interest-rate rule	63
4.3.1	Germany	64
4.3.2	Japan	66
4.3.3	The US	67
4.3.4	France	69
4.3.5	The UK	71
4.3.6	Italy	72
4.4	Estimation of the time-varying interest-rate rule with the Kalman filter	72
4.4.1	Empirical evidence	74
4.4.2	Comparison of E3-countries	83
4.5	Parameter changes in a forward-looking monetary policy rule ...	86
4.5.1	Germany	89
4.5.2	France	90
4.5.3	Italy	90
4.5.4	The UK	91
4.5.5	The US	92
4.6	Conclusion	92
Chapter 5	Euro-Area Monetary Policy Effects Using US Monetary Policy Rules	95
5.1	Introduction	95
5.2	Simulation using the time-varying coefficient Taylor rule of the US	97
5.3	Simulation using the fixed coefficient Taylor rule of the US	100
5.4	Simulation using the suggested Taylor rules and actual interest rate	102
5.5	Conclusion	109
Chapter 6	Optimal Monetary Policy and Adaptive Learning	111
6.1	Introduction	111
6.2	Discrete-time deterministic dynamic programming	112

6.3	Deriving an optimal monetary policy rule	114
6.3.1	The goal of monetary policy	115
6.3.2	Derivation of an interest-rate rule	120
6.3.3	Simulation of the model	124
6.4	Monetary policy rules with adaptive learning	128
6.4.1	Numerical study	134
6.5	Monetary policy rules with robust control	135
6.5.1	Simulations	139
6.6	Conclusion	146
	Appendix A6. Important output concepts	146
Chapter 7	Time-Varying Optimal Monetary Policy	149
7.1	Introduction	149
7.2	The central bank's control problem	152
7.3	Hysteresis effects	162
7.4	Conclusion	168
	Appendix A7. Non-quadratic welfare function and the use of the HJB equation	171
Chapter 8	Asset Price Volatility and Monetary Policy	175
8.1	Introduction	175
8.2	The basic model	178
8.2.1	Monetary policy rule from a traditional model	178
8.2.2	Monetary policy rule with asset-price bubbles	179
8.3	Monetary policy rule in practice: the case of the Euro-area	185
8.4	Endogenizing probabilities and a non-linear monetary policy rule	188
8.5	The zero bound on the nominal interest rate	197
8.6	Conclusion	206

Part II Fiscal Policy

Chapter 9	Fiscal Policy and Economic Growth	209
9.1	Introduction	209
9.2	The growth model and steady-state results	212
9.3	Analytical results	215

9.3.1	Regimes (A) and (B)	221
9.3.2	Regime (C)	226
9.4	Numerical examples	228
9.5	The estimation of the model	232
9.6	Comparison of our results with the literature	240
9.7	Conclusion	242
	Appendix A9. Growth effects of an increase in public consumption, transfer payments and an increase in public consumption	244
A9.1	A rise in public consumption and transfer payments	244
A9.2	A rise in public investment in regime (A)	245
A9.3	A rise in public investment in regime (B)	245
A9.4	A rise in public investment in regime (C)	246
A9.5	The eigenvalues of the Jacobian	247
Chapter 10	Testing Sustainability of Fiscal Policies	249
10.1	Introduction	249
10.2	Theoretical considerations	251
10.3	Empirical analysis	258
10.3.1	France	261
10.3.2	Germany	265
10.3.3	Italy	268
10.3.4	Portugal	271
10.3.5	US	274
10.4	Conclusion	277
	Appendix A10. Proposition 10.2 with a time-varying interest rate and GDP growth rate	278
	Appendix B10. Data	279
Chapter 11	Stabilization of Public Debt and Macroeconomic Performance	281
11.1	Introduction	281
11.2	Granger-Causality tests	283
11.3	Sustainability indicators of fiscal policy in finite time	287
11.4	Testing a non-linear relationship	292
11.5	Conclusion	294

Part III Monetary and Fiscal Policy Interactions

Chapter 12	Monetary and Fiscal Policy Interactions in the Euro-Area	299
12.1	Introduction	299
12.2	Recent literature on monetary and fiscal policy interactions	300
12.2.1	The fiscal theory of the price level determination	300
12.2.2	Strategic interactions between monetary and fiscal policies	303
12.2.3	Empirical research on monetary and fiscal policy interactions	304
12.2.4	Monetary and fiscal policy interactions in open economies	304
12.3	Monetary and fiscal policy interactions in the Euro-area	305
12.3.1	Tests of the fiscal regime	305
12.3.2	Granger-Causality tests of monetary and fiscal policy interactions	312
12.4	Conclusion	317
Chapter 13	Time-Varying Monetary and Fiscal Policy Interactions	319
13.1	Monetary and fiscal policy interactions in a state-space model with Markov-switching	319
13.2	Monetary and fiscal policy interactions with forward-looking behavior	328
13.3	Conclusion	330
