

TABLE OF CONTENTS

SECTION I: ALGEBRA AND THEORY OF NUMBERS

Stated addresses

Davenport, H., Simultaneous diophantine approximation.	9
Erdős, P., On additive arithmetical functions and applications of probability to number theory.	13
Hlawka, E., Das inhomogene Problem in der Geometrie der Zahlen	20
Jacobson, N., Some aspects of the theory of representations of Jordan algebras	28
Maass, H., Differentialgleichungen und automorphe Funktionen.	34
Néron, A., Propriétés arithmétiques de certaines familles de courbes algébriques	40,481
Northcott, D. G., Specialization methods in algebraic geometry.	41,489

SECTION II: ANALYSIS

Stated addresses

Behnke, H., Funktionentheorie auf komplexen Mannigfaltigkeiten.	45
Bureau, F. J., Les solutions élémentaires et le problème de Cauchy	58
Cartwright, M. L., Some aspects of the theory of non-linear vibrations	71
Cesari, L., Retraction, homotopy, integral	77
Chandrasekharan, K., On some problems in Fourier analysis	85
Erdélyi, A., Asymptotic solutions of differential equations with transition points	92
Hayman, W. K., The coefficients of schlicht and allied functions.	102
Hille, E., Some aspect of Cauchy's problem	109
Kodaira, K., Some results in the transcendental theory of algebraic varieties	117, 474
Myrberg, P. J., Über automorphe Funktionen	118
Pauc, Chr., Contributions à la théorie de la dérivation de fonctions d'ensemble . .	127
Ważewski, T., Sur une méthode topologique de l'examen de l'allure asymptotique des intégrales des équations différentielles	132
Zygmund, A., Hilbert Transforms in E^n	140

SECTION III: GEOMETRY AND TOPOLOGY

Stated addresses

Coxeter, H. S. M., Regular honeycombs in hyperbolic space	155
Eckmann, B., Zur Cohomologietheorie von Räumen und Gruppen	170
Freudenthal, H., La topologie dans les fondements de la géométrie.	178
Montgomery, D., Topological transformation groups	185
Serre, J. P., Cohomologie et géométrie algébrique	189, 515
Yano, K., On pseudo-Hermitian and pseudo-Kählerian manifolds	190

SECTION IV: PROBABILITY AND STATISTICS

Stated addresses

Blackwell, D., Controlled random walks	201, 336
Doob, J. L., Interrelations between Brownian motion and potential theory . . .	202
Fortet, R., Lois des grands nombres pour des éléments aléatoires généraux.	205, 360

SECTION V: MATHEMATICAL PHYSICS AND APPLIED MATHEMATICS

Stated addresses

Collatz, L., Fehlermaszprinzipien in der praktischen Analysis.	209
Fichera, G., Methods of functional linear analysis in mathematical physics . . .	216
Hestenes, M. R., Hilbert space methods in variational theory and numerical analysis	229
Kampé de Fériet, J., Problèmes mathématiques posés par la mécanique statistique de la turbulence	237

Rellich, F., Halbbeschränkte Differentialoperatoren höherer Ordnung	243
Stoker, J. J., Some recent progress in the theory of surface waves in water	251
Weinstein, A., Elliptic and hyperbolic axially symmetric problems	264

SECTION VI: LOGIC AND FOUNDATIONS

Stated addresses

Lorenzen, P., Die Fiktion der Überabzählbarkeit	273
Mostowski, A., Development and applications of the „projective“ classification of sets of integers.	280
Barkley Rosser, J., The relative strength of Zermelo's set theory and Quine's new foundations	289

SECTION VII: PHILOSOPHY, HISTORY AND EDUCATION

Stated addresses

Daltry, C. T., Self-education by children in mathematics using Gestalt methods — i.e. learning-through-insight	297
Kurepa, G., The role of mathematics and mathematician at present time.	305
Pienc, K., School mathematics for universities and for life.	318

SYMPOSIUM A: STOCHASTIC PROCESSES

Dantzig, D. van, Opening speech	329
Fréchet, R. M., Allocution	332
Blackwell, D., Controlled random walks	201, 336
Blanc-Lapierre, A., Sur quelques applications de la théorie des fonctions aléatoires à l'optique	339
Doob, J. L., Present state and future prospects of stochastic process theory	348
Fortet, R. M., Les fonctions aléatoires comme éléments aléatoires dans un espace de Banach	356
Fortet, R. M., Lois des grands nombres pour des éléments aléatoires généraux	205, 360
Hille, E., Perturbation methods in the study of Kolmogoroff's equations	365
Kendall, D. G., and Reuter, G. E. H., Some pathological Markov processes with a denumerable infinity of states and the associated semigroups of operators on l ,	377
Lévy, P., Processus semi-markoviens.	416
Lindley D. V., The estimation of velocity distributions from counts	427

SYMPOSIUM B: ALGEBRAIC GEOMETRY

Gröbner, W., Über die idealtheoretische Grundlegung der algebraischen Geometrie	447
Hirzebruch, F., Der Satz von Riemann-Roch in Faisceau-theoretischer Formulierung; einige Anwendungen und offene Fragen	457
Kodaira, K., Some results in the transcendental theory of algebraic varieties	117, 474
Néron, A., Propriété sarithmétiques de certaines familles de courbes algébriques	40, 481
Northcott, D. G., Specialization methods in algebraic geometry.	41, 489
Rosenlicht, M., Group varieties and differential forms	493
Segre, B., Geometry upon an algebraic variety	497
Semple, J. G., The triangle as a geometric variable	514
Serre, J. P., Cohomologie et géométrie algébrique.	189, 515
Severi, F., Fonctions et variétés quasi-abéliennes	521
Severi, F., Problèmes résolus et problèmes nouveaux dans la théorie des systèmes d'équivalence.	529
Waerden, B. L. van der, The invariant theory of linear sets of an algebraic variety	542
Waerden, B. L. van der, On the definition of rational equivalence of cycles on a variety	545
Weil, A., Abstract versus classical algebraic geometry	550
