

Table of contents

Editorial introduction	XI
List of participants	XIII
Limit behaviour in a singular perturbation problem, regularized convolution operators and the three-body quantum problem	
S. ALBEVERIO and K.A. MAKAROV	
1. Introduction	1
2. Some auxiliary results	4
3. The main results	5
4. A sketch of the proof	6
References	9
Banach algebras of functions on nonsmooth domains	
F. ALI MEHMETI and S. NICAISE	
1. Introduction	11
2. The differential operators and imbeddings of their domains	12
3. Continuity of the operator of multiplication	13
4. Applications to semilinear evolution equations	17
References	19
A nonlinear approach to generalized factorization of matrix functions	
M.C. CÂMARA and A.F. DOS SANTOS	
1. Introduction	21
2. Preliminaries	21
3. The method	23
4. The <i>RW</i> class	25
5. The class \mathcal{N}	30
6. Some other classes of interest	35
References	37
Completeness of scattering systems with obstacles of finite capacity	
J. VAN CASTEREN and M. DEMUTH	
1. Assumptions and results	39
2. Proof of the results	43
References	49

**Examples of positive operators in a Krein space
with 0 a regular critical point of infinite rank**

B. ĆURGUS and B. NAJMAN

1. Introduction	51
2. Perturbed wave equation	52
3. Elliptic operators with mildly varying coefficients on \mathbb{R}^n	55
References	56

**On Hilbert-Schmidt operators and determinants
corresponding to periodic ODE systems**

R. DENK

1. Introduction	57
2. The structure of the regularized determinant	59
3. On the convergence of the infinite determinant	64
References	70

On estimates of the first eigenvalue in some elliptic problems

YU.V. EGOROV and V.A. KONDRATIEV

1. On estimates of the first eigenvalue in the Sturm Liouville problem	73
2. Other estimates of the first eigenvalue in the Sturm Liouville problem ..	75
3. Estimates of the first eigenvalue for a more general Sturm Liouville problem	76
4. On estimates of the first eigenvalue for an operator of higher order	78
5. Multidimensional problems	78
6. First negative eigenvalue	81
References	83

**Nonsingularity of critical points of some
differential and difference operators**

A. FLEIGE and B. NAJMAN

1. Introduction	85
2. A Sturm-Liouville operator with indefinite weight	86
3. A difference operator	89
References	95

**A nonlinear spectral problem with periodic coefficients
occurring in magnetohydrodynamics**

A. LIFSHITZ

1. Introductory remarks	97
2. Three-dimensional quasi-helical plasma equilibria with flow	98
3. Basic equations	99

4. Instabilities and waves for helical flows	104
5. The location of the spectrum for general quasi-helical equilibria	105
6. A numerical study of the spectrum	110
7. Concluding remarks	113
References	116

An evolutionary problem of a flow of a nonlinear viscous fluid in a deformable viscoelastic tube

W.G. LITVINOV

1. Introduction	119
2. Problem of forced oscillations of a tube	120
3. Problem for the fluid and the function of the load of the tube	121
4. Generalized solution of the problem for the fluid	124
5. On the w -dependence of the velocity and the pressure functions	126
6. Existence theorem	127
References	128

Quantum compound Poisson processes and white noise analysis

E.W. LYTVYNOV

1. Introduction	131
2. Basic standard triples	132
3. Compound Poisson white noise on T – a spectral approach	134
4. Spaces of test and generalized functions	139
References	140

Invariant and hyperinvariant subspaces of direct sums of simple Volterra operators

M.M. MALAMUD

1. Introduction	143
2. Cyclic subspaces	144
3. The lattices of invariant subspaces	151
4. The lattices of hyperinvariant subspaces	158
References	166

Some interior and exterior boundary-value problems for the Helmholtz equation in a quadrant

E. MEISTER, F. PENZEL, F.-O. SPECK and F.S. TEIXEIRA

1. The Dirichlet problem D_{Q_1}	169
2. The mixed problem M_{Q_1}	171
3. The complement problem $D_{Q_3^c}$	172
References	178

**Interpolation of some function spaces and
indefinite Sturm-Liouville problems**

S.G. PYATKOV

1. Introduction	179
2. Interpolation of some Sobolev spaces	180
3. Indefinite Sturm-Liouville problems	193
References	199

**Mellin pseudodifferential operator techniques in the theory
of singular integral operators on some Carleson curves**

V.S. RABINOVICH

1. Introduction	201
2. Banach algebras of Mellin pseudodifferential operators	202
3. Singular integral operators on contours composed of perturbed logarithmic spirals	208
References	217

Wiener-Hopf factorization of singular matrix functions

M. RAKOWSKI

1. Introduction	219
2. Generalized Wiener-Hopf factorization	220
3. Riemann problem with singular coefficient	223
References	229

**Elliptic boundary value problems for general elliptic
systems in complete scales of Banach spaces**

I. ROITBERG

1. Introduction	231
2. Statement of the problem	231
3. Definition of the ellipticity of the problem (2.1), (2.2)	232
4. Functional spaces	233
5. Theorem on complete collection of isomorphisms	235
6. Some applications of the theorem on isomorphisms	236
7. Proof of Theorem 5.1	236
References	241

Classic spectral problems

L.A. SAKHNOVICH

1. Generalized string equation (direct spectral problem)	243
2. Matrix Sturm-Liouville equation (direct spectral problem)	249
3. Inverse spectral problem	251
References	253

**Mellin operators in a pseudodifferential calculus for
boundary value problems on manifolds with edges**

E. SCHROHE and B.-W. SCHULZE

1. Introduction	255
2. Basic constructions for pseudodifferential boundary value problems	256
3. Wedge Sobolev spaces	263
4. Operator-valued Mellin symbols	268
References	284

**On some global aspects of the theory of partial differential
equations on manifolds with singularities**

B.-W. SCHULZE, B. STERNIN and V. SHATALOV

1. Introduction	287
2. Examples	288
3. General statement	295
4. Two-dimensional case	295
5. Multi-dimensional case	301
References	305

**Green's formula for elliptic operators
with a shift and its applications**

Z.G. SHEFTEL

1. Elliptic problems with a shift and Green's formula	307
2. Solvability conditions	310
3. Theorem on isomorphisms and generalized solvability in complete scales of spaces	311
4. Some applications	312
References	313

**On second order linear differential equations
with inverse square singularities**

R. WEIKARD

1. Introduction	315
2. The unperturbed case	316
3. Perturbations	317
References	324
