

# Contents

Preamble . . . . .	3
Contents . . . . .	5
<b>I: Fairing and Shape Preserving of Curves . . . . .</b>	<b>7</b>
Horst Nowacki, Justus Heimann, Elefterios Melissaratos, Sven-Holm Zimmermann: <i>Experiences in Curve Fairing . . . . .</i>	9
J. M. Carnicer, M. S. Floater: <i>Co-convexity preserving Curve Interpolation . . . . .</i>	17
Tim Goodman: <i>Shape Preserving Interpolation by Planar Curves . . . . .</i>	29
Tim Goodman, Boon-Hua Ong: <i>Shape Preserving Interpolation by Curves in Three Dimensions . . . . .</i>	39
Andrew Ives-Smith: <i>A coparative study of two curve fairing methods in Tribon Initial Design . . . . .</i>	47
<b>II: Fairing Curves and Surfaces . . . . .</b>	<b>57</b>
Jan Hadenfeld: <i>Fairing of B-Spline Curves and Surfaces . . . . .</i>	59
Marc Daniel: <i>Declarative Modeling of fair shapes: An additional approach to curves and surfaces computations . . . . .</i>	77
<b>III: Shape Preserving of Curves and Surfaces . . . . .</b>	<b>86</b>
Paolo Costantini: <i>Shape-preserving interpolation with variable degree polynomial splines . . . . .</i>	87
<b>IV: Fairing of Surfaces . . . . .</b>	<b>115</b>
Malcolm I.G. Bloor, Michael J. Wilson: <i>Functional Aspects of Fairness . . . . .</i>	117
Roger Andersson: <i>Surface design based on brightness intensity or isophotes—theory and practice . . . . .</i>	131
Alain Massabo: <i>Fair surface blending, an overview of industrial problems . . . . .</i>	145
Hartmut Prautzsch: <i>Multivariate Splines with Convex B-Patch Control Nets are Convex . . . . .</i>	153

<b>V: Shape Preserving of Surfaces</b> . . . . .	160
Malcolm I.G. Bloor, Michael J. Wilson: <i>Parametrizing Wing Surfaces using Partial Differential Equations</i> . . . . .	161
J. M. Carnicer, M. S. Floater: <i>Algorithms for convexity preserving interpolation of scattered data</i> . . . . .	175
Paolo Costantini: <i>Abstract schemes for functional shape-preserving interpolation</i> . . . . .	185
B. Mulansky, J. W. Schmidt, M. Walther: <i>Tensor Product Spline Interpolation subject to Piecewise Bilinear Lower and     Upper Bounds</i> . . . . .	201
Bert Jüttler: <i>Construction of Surfaces by Shape Preserving Approximation of Contour Data</i>	217
Ulrich Dietz: <i>B-Spline Approximation with Energy Constraints</i> . . . . .	229
Günther Greiner: <i>Curvature approximation with application to surface modeling</i> . . . . .	241
Ron Pfeifle, Hans-Peter Seidel: <i>Scattered Data Approximation with Triangular B-Splines</i> . . . . .	253
<b>VI: Benchmarks</b> . . . . .	264
Kaklis D. Panagiotis and Gabrielides C. Nikolaos: <i>Benchmarking in the Area of Planar Shape-Preserving Interpolation</i> . . . . .	265
Steffen Wahl: <i>Benchmark Process in the Area of Shape-Constrained Approximation</i> . . . . .	283
