

## Contents

Preface	ix
List of speakers and titles of talks	xi
Optimal control of fluid limits of queuing networks and stochasticity corrections FLORIN AVRAM	1
Robust control of semiconductor manufacturing processes JOHN S. BARAS AND NITAL S. PATEL	37
Maintenance and production control of manufacturing systems with setups E. K. BOUKAS AND J. P. KENNE	55
Optimal $(s, S)$ production policies with delivery time guarantees WAI KI CHING AND XUN YU ZHOU	71
Identification and control of a stochastic manufacturing system with noisy demand T. E. DUNCAN	83
Stochastic optimization via grid search KATHERINE BENNETT ENSOR AND PETER W. GLYNN	89
Optimal ergodic control of singularly perturbed hybrid stochastic systems J. A. FILAR AND A. HAURIE	101
Robust design for quality improvement by ellipsoidal bounding S. HADJIHASSAN, L. PRONZATO, E. WALTER, AND I. VUCHKOV	127
Linear programming derived functional bounds for closed queueing networks: A primal approach CARLOS HUMES JR.	139
Risk sensitive optimal control of wear processes MARIO LEFEBVRE AND RICHARD LABIB	163
Stability and optimization of queueing networks and their fluid models SEAN MEYN	175
Stochastic adaptive control and manufacturing systems B. PASIK-DUNCAN	201

Coupling, ergodicity and sensitivity of Markov processes G. CH. PFLUG	219
Optimal feedback controls in dynamic stochastic jobshops ERNST L. PRESMAN, SURESH P. SETHI, AND WULIN SUO	235
Using Renyi entropies to measure uncertainty in search problems L. PRONZATO, H. P. WYNN, AND A. A. ZHIGLJAVSKY	253
The role of information in scheduling machines to supply a production line RAYMOND RISHEL	269
Some insights into near-optimal plans for stochastic manufacturing systems SURESH P. SETHI	287
On stochastic optimization and its applications to manufacturing MIKE S. YANG, LOOHAY LEE, AND YU-CHI HO	317
Stochastic scheduling via polymatroid optimization DAVID D. YAO AND LI ZHANG	333
Dynamic programming and the maximum principle for control of piecewise deterministic Markov processes J. J. YE	365
Autocorrelation analysis of some linear transfer function models and its applications in the dynamic process systems NIEN FAN ZHANG	385
