

# Contents

<b>Well-posedness of Semilinear Heat Equations with Iterated Logarithms</b> Paolo Albano, Piermarco Cannarsa and Vilmos Komornik .....	1
<b>Uniform Stability of Nonlinear Thermoelastic Plates with Free Boundary Conditions</b> George Avalos, Irena Lasiecka and Roberto Triggiani .....	13
<b>Exponential Bases in Sobolev Spaces in Control and Observation Problems</b> Sergei A. Avdonin, Sergei A. Ivanov and David L. Russell .....	33
<b>Sampling and Interpolation of Functions with Multi-Band Spectra and Controllability Problems</b> Sergei Avdonin and William Moran .....	43
<b>Discretization of the Controllability Grammian in View of Exact Boundary Control: the Case of Thin Plates</b> Frédéric Bourquin, José Urquiza and Rabah Namar .....	53
<b>Stability of Holomorphic Semigroup Systems under Nonlinear Boundary Perturbations</b> Francesca Bucci .....	63
<b>Shape Control in Hyperbolic Problems</b> John Cagnol and Jean-Paul Zolésio .....	77
<b>Second Order Optimality Conditions for Some Control Problems of Semilinear Elliptic Equations with Integral State Constraints</b> Eduardo Casas .....	89
<b>Intrinsic <math>P(2, 1)</math> Thin Shell Models and Naghdi's Models without A Priori Assumption on the Stress Tensor</b> Michel C. Delfour .....	99
<b>On the Approximate Controllability for some Explosive Parabolic Problems</b> J.I. Díaz and J.L. Lions .....	115
<b>Fréchet-Differentiability and Sufficient Optimality Conditions for Shape Functionals</b> Karsten Eppler .....	133
<b>State Constrained Optimal Control for some Quasilinear Parabolic Equations</b> Luis A. Fernández .....	145
<b>Controllability property for the Navier-Stokes equations</b> Andrei V. Fursikov .....	157

<b>Shape Sensitivity and Large Deformation of the Domain for Norton-Hoff Flows</b> Nicolas Gomez and Jean-Paul Zolésio .....	167
<b>On a Distributed Control Law with an Application to the Control of Unsteady Flow around a Cylinder</b> Michael Hinze and Andreas Kauffmann .....	177
<b>Homogenization of a Model Describing Vibration of Nonlinear Thin Plates Excited by Piezopatches</b> K.-H. Hoffmann and N. D. Botkin .....	191
<b>Stabilization of the Dynamic System of Elasticity by Nonlinear Boundary Feedback</b> Mary Ann Horn .....	201
<b>Griffith Formula and Rice–Cherepanov’s Integral for Elliptic Equations with Unilateral Conditions in Nonsmooth Domains</b> A.M. Khludnev and J. Sokolowski .....	211
<b>A Domain Optimization Problem for a Nonlinear Thermoelastic System</b> A. Myśliński and F. Tröltzsch .....	221
<b>Approximate Controllability for a Hydro-Elastic Model in a Rectangular Domain</b> Axel Osses and Jean-Pierre Puel .....	231
<b>Noncooperative Games with Elliptic Systems</b> Tomáš Roubíček .....	245
<b>Incomplete Indefinite Decompositions as Multigrid Smoothers for KKT Systems</b> Volker H. Schulz .....	257
<b>Domain Optimization for the Navier-Stokes Equations by an Embedding Domain Method</b> Thomas Slawig .....	267
<b>On the Approximation and Optimization of Fourth Order Elliptic Systems</b> J. Sprekels and D. Tiba .....	277
<b>On the Existence and Approximation of Solutions for the Optimal Control of Nonlinear Hyperbolic Conservation Laws</b> Stefan Ulbrich .....	287
<b>Identification of Memory Kernels in Heat Conduction and Viscoelasticity</b> L. v. Wolfersdorf and J. Janno .....	301
<b>Variational Formulation for Incompressible Euler Equation by Weak Shape Evolution</b> Jean-Paul Zolésio .....	309
