

# Contents

A Direct Method for Stochastic Automata Networks <i>Raymond Chan and Wai Ki Ching</i> .....	1
Estimating the Speed of Random Walks <i>Dayue Chen</i> .....	17
A New Story of Ergodic Theory <i>Mu-Fa Chen</i> .....	25
Solvability of a Stochastic Linear Quadratic Optimal Control Problem <i>Shuping Chen and Jiongmin Yong</i> .....	35
Convertible Bonds with Market Risk and Credit Risk <i>Mark Davis and Fabian R. Lischka</i> .....	45
Quasi-Monte Carlo Methods and Their Randomizations <i>Fred Hickernell and Regina H.S. Hong</i> .....	59
Contingent Claim Approach for Analyzing the Credit Risk of Defaultable Currency Swaps <i>Hong Yu and Yue-Kuen Kwok</i> .....	79
Dynamic Insider Trading <i>Shunlong Luo and Qiang Zhang</i> .....	93
A New Hedging Model and a Nonlinear Generalization of Black-Scholes Formula <i>Shanjian Tang</i> .....	105
An Overview on Martingale Approach to Option Pricing <i>Jia-an Yan</i> .....	121
On Comparison Theorems for Diffusion Processes <i>Xinsheng Zhang</i> .....	135
