

Contents

Preface	i
The Difference of Topology at Infinity for the Case of Two Masses in Changing Sign Yamabe Problems on S^3 , <i>Abbas Bahri and Sagun Chanillo</i>	1
Linking, Positive Invariance and Localization of Critical Points, <i>Thomas Bartsch</i>	9
Is There Failure of the Inverse Function Theorem? <i>Haim Brezis</i>	23
Blow-up of Solutions of Nonlinear Parabolic Problems, <i>Chao-Nien Chen</i>	35
Variational Problems Which are Nonquadratic at Infinity, <i>David G. Costa</i>	39
Homoclinic Orbits of Hamiltonian Systems, <i>Yanheng Ding</i>	57
Self-adjointness of Hamiltonian Operator and Some Problems in Symplectic Geometry, <i>Mei-Yue Jiang</i>	67
Dirichlet Problem of p -Laplacian with Nonlinear Term $f(x, u) \sim u^{p-1}$ at Infinity, <i>Gongbao Li and Huan-Song Zhou</i>	77
Some Advances in Morse Theory and Minimax Theory, <i>Shujie Li</i>	91
On a Class of Elliptic Eigenvalue Problems with Constraint, <i>Yongqing Li</i>	117
Iteration Theory of Maslov-type Index and its Applications, <i>Chun-gen Liu</i>	125
Number of Invariant Sets of Descending Flow with Applications in Critical Point Theory, <i>Zhaoli Liu and Jingxian Sun</i>	139

The Maslov-type Index and its Iteration Theory with Applications to Hamiltonian Systems, <i>Yiming Long</i>	157
The Spectrum of p -Laplacian Systems under Dirichlet, Neumann and Periodic Boundary Conditions, <i>Raul Manasevich and Jean Mawhin</i>	201
A Note on Hamiltonian Systems of Multiple Pendulum Type, <i>Paul H. Rabinowitz</i>	217
Nontrivial Critical Points for Asymptotically Quadratic Functional at Resonance, <i>Jiabao Su</i>	225
Positive Solutions Having Prescribed Symmetry for Nonlinear Elliptic Problems, <i>Zhi-Qiang Wang</i>	235
A Decomposition Lemma and Critical Minimization Problems, <i>Michel Willem</i>	247
The Effect of Sublinear Term at Origin in Some Elliptic Problems, <i>Shaoping Wu</i>	257
Positive Mass Theorem for Modified Energy Condition, <i>Xiao Zhang</i> ...	275
