

CONTENTS

CONTRIBUTORS	vii
PREFACE	ix
Modelling and Identification Theory:	
A Flight Control Application <i>A. V. Balakrishnan</i>	1
Structure Analysis of Linear and Bilinear	
Dynamical Systems <i>P. d'Alessandro, A. Isidori, and A. Ruberti</i>	25
Structural Problems of Regulators <i>G. Basile and G. Marro</i>	37
The Realization of Near-Optimal Feedback Controllers <i>H. K. Knudsen</i>	53
The Base Model Concept <i>B. P. Zeigler</i>	69
A Dynamic Upper Bound of the Uncertainty in Linear System Approximation <i>F. Donati</i>	95
Some Results on the Abstract Realization	
Theory of Multilinear Systems <i>G. Marchesini and G. Picci</i>	109
Mathematical Models and Identification of Bilinear Systems <i>C. Bruni, G. Di Pillo, and G. Koch</i>	137
On the Algebraic Structure of Bilinear Systems <i>R. W. Brockett</i>	153
Bilinear Structures and Man <i>R. R. Mohler</i>	169

CONTENTS

Mathematical Models and Prostheses for Sense Organs	183
<i>E. Biondi and R. Schmid</i>	
Variable Structure Aspects of Ecosystems	213
<i>B. C. Patten</i>
