Wissenschaftliches Programm der Tagung	ix
Preface	xi

MEAN VALUES AND CLASSICAL INEQUALITIES

RICHARD BELLMAN A note on inequalities	3
JOHN TODD The many limits of mixed means, I	5
WOLFGANG EICHHORN Inequalities and functional equations in the theory of the price index	23
GEORG AUMANN Induction with inequalities involving nonquasiarithmetic means	29
DIETER K. ROSS On Turán-type inequalities	35
E.F. BECKENBACH and RICHARD BELLMAN On the positivity of circulant and skew-circulant determinants	39
H.-H. KAIRIES Convexity in the theory of the gamma function	49
A. JAKIMOVSKI and D.C. RUSSELL On the Hausdorff moment problem	63

APPROXIMATIONS AND PROBABILISTIC INEQUALITIES

P.L. BUTZER and J. JUNGGEBURTH On Jackson-type inequalities in approximation theory	85
O. SHISHA and G.R. VERMA On Lipschitz condition and Zygmund's property for functions of several variables	115
ALEXANDER M. OSTROWSKI and RAYMOND M. REDHEFFER Inequalities related to the normal law	125
L.L. CAMPBELL Bound on the measure of a set in a product space	131
R. MOYNIHAN, B. SCHWEIZER, and A. SKIAR Inequalities among operations on probability distribution functions	133

FUNCTIONAL INEQUALITIES

T. HOWROYD Functional inequalities	153
ROMAN GER Almost subadditive functions	159
MAREK KUCZMA Additive functions and the Egorov theorem	169
MAREK KUCZMA Nonnegative continuous solutions of a functional inequality in a single variable	175
DOBIESZAW BRYDAK Nonlinear functional inequalities in a single variable	181
DOBIESZAW BRYDAK and BOGDEN CHOCZEWSKI Application of functional inequalities to determining one-parameter families of solutions of a functional equation	191
ERWIN TURDZA Comparison theorems for a functional inequality	199
J. MATKOWSKI Integrable solutions of a linear functional inequality	213

DIFFERENTIAL AND INTEGRAL INEQUALITIES

I. LOSONCZI A note on first-order linear partial differential inequalities	219
DONALD W. SNOW Rayleigh's principle by equivalent problems	223
M. AVRIL and S. SCHAIBLE Second-order criteria for pseudo-convex functions	231
JAMES T. LEWIS, CHARLES F. OSGOOD, and OVED SHISHA Infinite Riemann sums, the simple integral, and the dominated integral	233
F. HUCKEMANN An extremal problem for harmonic measure	243

GEOMETRIC AND TOPOLOGICAL INEQUALITIES

J. ACZÉL E. Picardus ab omni naevo liberatus (On the axiomatics of vector addition)	249
D.H. MOUCHTARI and A.N. ŠERSTNEV Les fonctions du triangle pour les espaces normés aléatoires	255
JÜRGEN RÄTZ Quadratic functionals satisfying a subsidiary inequality	261

I. FENYŐ	On operators in Hilbert space depending analytically on a parameter	271
E.F. BECKENBACH	The counterspherical representation of a minimal surface	277
REMARKS AND PROBLEMS		
GEORG AUMANN	Remarks and problems concerning Prékopa's inequality	303
O. SHISHA	A simple differential proof of the inequality between the arithmetic and geometric means	305
E.F. BECKENBACH	A convexity problem in complex-variable theory	306
F. HUCKEMANN	Remarks on Ostrowski's inequality	307
RAYMOND M. REDHEFFER	A determinant inequality	308
KURT ENDL	On Favard's theorem for orthogonal polynomials	309
RAYMOND M. REDHEFFER and WOLFGANG WALTER	A problem in parabolic differential inequalities	311
RAYMOND M. REDHEFFER	A problem originating in transmission-line theory	312
RAYMOND M. REDHEFFER	An integral inequality connected with completeness	313
E.F. BECKENBACH	Some problems in the theory of surfaces	315
B. SCHWEIZER	A problem concerning t -norms	319
ALEXANDER M. OSTROWSKI	Remarks and a problem on an inequality	319
W. BENZ	On characterizing Lorentz transformations	319
NAME INDEX		321
SUBJECT INDEX		327
