

CONTENTS

Program of the Conference	5
LINDE	
Gaussian Measures on Banach Spaces	13
PIETSCH	
Recent Progress and Open Problems in the Theory of Operator Ideals	23
HEINRICH	
Finite Representability of Operators	33
BEAUZAMY	
Some New Factorization Theorems	40
PISIER	
Topics on Grothendieck's Theorem	44
DAVIS/MAUREY	
The Distance of a Symmetric Space from Some l_p -Space	58
HAAGERUP	
The Best Constants in the Khintchine Inequality	69
PIETSCH	
Rosenthal's Inequality and Its Application in the Theory of Operators Ideals	80
FIGIEL	
Lattice Norms and the Geometry of Banach Spaces	89
JOHNSON/KÖNIG/MAUREY/REHERFORD	
Eigenvalues of p -Summing and l_p -Type Operators in Banach Spaces	100
KÖNIG	
Eigenvalues of p -Nuclear Operators	106
ROLEWICZ	
On Operator Theory and Control Theory	114
Open Problems	119
ALBERTI/UHLMANN	
The Order Structure of States in C^* - and W^* -Algebras	126
LANCE	
Almost Uniform Convergence in Operator Algebras	136
TIMMERMANN	
Classification of Domains	143

BUCHHOLZ On the Structure of Local Quantum Fields with Non-trivial Interaction	146
ALBERTI Remarks on the Σ -Property of Positive Linear Forms on W^* -Algebras	154
KRUSZYŃSKI On Positive Maps of C^* -Algebras	157
PAVLOV/POLIVANOV Analytic Structure of Amplitude $3 \rightarrow 3$	164
PTÁK Perturbations and Continuity of the Spectrum	177
BEHNKE JB Algebras with an Exceptional Ideal	187
HORUZHY/DADASHYAN Algebras of Observables in Models of Quantum Field Theory with Superselection Rules	191
LASSNER Algebras of Unbounded Operators and Representations	200
SCHWARTZ Kac Algebras	215
SCHMÖDGEN Trace Functionals on Unbounded Operator Algebras	224
ARCHBOLD On the Norm of an Inner Derivation of a C^* -Algebra	229
SAKAI Developments in the Theory of Derivations in C^* -Algebras	234
DUBOIS-VIOLETTE Topics on a Non Commutative Moment Problem	241
KIRCHBERG Positive Maps and C^* -Nuclear Algebras	255
ŻELAZKO Some Open Problems in Topological Algebras	258
BEREZANSKI The Expansion in Simultaneous Generalized Eigenvectors of an Arbitrary Family of Commuting Normal Operators	265
EXNER/HAVLÍČEK/LASSNER Boson Representations of Classical Lie Algebras	277

ANTOINE	
Partial Inner Product Spaces: Another Approach to Unbounded Operators	279
ALFSEN	
On the Geometry of State Spaces	290
ENOCK	
Kac Algebras and Crossed Products	292
ZINOVIEV	
Lorentz Invariant Distributions and the Laplace Transform.	301
CHANDLER	
Nonrelativistic Multichannel Quantum Scattering Theory in a Two Hilbert Space Formulation	308
GINIBRE/VELO	
Existence of Solutions and Scattering Theory for the Non Linear Schrödinger Equation	320
GUSTAFSON	
Scattering Theory and the Principle of Limiting Absorption	335
BAUMGÄRTEL	
A Decoupling Approach to Resonances for N-Particle Quantum Scattering Systems	350
AMREIN	
Algebraic Scattering Theory	364
WOLLENBERG	
On the Inverse Problem in the Abstract Scattering Theory .	372
