

C O N T E N T S

FOREWORD	3
CONTENTS	5
SCIENTIFIC PROGRAM	9
LIST OF PARTICIPANTS	17
J. ABAFFY, A class of dual-matrix methods	25
A.A. Abramov - E.S. BIRGER - NADYEZDA B. KONYUKHOVA - VALENTYINA I. ULYANOVA, On methods of numerical solution of boundary value problems for systems of linear ordinary differential equations	33
L. ADAMCZYK, Monotone spline interpolations and op- timal control problem	69
GY. ADLER, A two-dimensional mathematical model and a related overshooting-free numerical method for oil mining using underground combustion.	81
R. ANSORGE, Existence and numerical representation of generalized solutions of nonlinear partial initial value problems	91
G. AVDELAS - A. HADJIDIMOS, The use of Wachspress- parameters for the numerical solution of three dimensional elliptic problems	113
KATALIN BALLA, On the replacement of the condition of boundedness for certain systems of linear ODE-s with regular singularity	121
L. COLLATZ, Numerical treatment of some singular boundary value problems	133
T. DESPERAT, Free boundary problems in the theory of fluid flow through porous media	153
L. ELSNER, Some notes on iterative methods for eigenvalues and eigenvectors of matrices	157

H.R. FARZAN - G. MOLNÁRKA, On uniform convergence and stability of a finite-difference scheme for weakly nonlinear parabolic equations with cylindrical symmetry	167
M. FIEDLER, Some combinatorial aspects in matrix theory and numerical algebra	185
A. GALANTAI, New stability property concerning stiff methods	203
L. GERENCSEI, On a stabilization method of Miele. (Convergence and applications)	213
J. GERGELY, Matrix inversion and solution of linear and nonlinear systems by the method of bordering	225
R. GORENFLO, Energy conserving discretizations of diffusion equations	239
D. GREENSPAN, Arithmetic modeling in applied mathematics	263
ÉVA GYURKOVICS - T. VÖRÖS, On a computational method of the time-optimal control problem	297
A. HADJIDIMOS, Accelerated overrelaxation method	315
L. HALADA, Recursive computation of the determinant of a bandtriangular matrix	325
H. HEINRICH, Über GAUSS' Beiträge zur Numerischen Mathematik	335
C.P. HUANG - R.T. GREGORY, A norm-reducing Jacobi-like algorithm for the eigenvalues of non-normal matrices	369
A.S. ILINSKII, Direct investigation methods for the exterior boundary value problems of elliptic equations	395
F. JUHÁSZ - K. MÁLYUSZ, Problems of cluster analysis from the viewpoint of numerical analysis	405

A. KOKOSZKIEWICZ, An explicit difference scheme of solving the Chauchy problem for a degenerate hyperbolic equation	417
MARGIT KOVÁCS, A continuous method for the nonlinear programming problem with equality constraints	423
G. MAESS, Iterative Lösung rechteckiger linearer Gleichungssysteme und verallgemeinerte Matrixinverse	431
ANDREA MESKÓ, An iterative, optimized interpolation method for randomly distributed data	449
J. MIKLOŠKO, Accelerated multiple calculation of linear recurrences	463
FERNANDA A. OLIVEIRA, Numerical solution of two-point-boundary-value problems and spline functions	471
G.N. DE OLIVEIRA, The characteristic values of the matrix $A=XBX^{-1}$	491
OLGA POKORNÁ, On the pseudoinversion of matrix products	501
D. RICHTER, About handling large linear systems with respect to using external storage	507
S.M. SALLAM, On the stability of quasidouble step spline function approximations for solutions of initial value problems	517
A.A. SAMARSKII, New iterative methods for solving difference equations	525
E. SCHECHTER, On the numerical solution of the equation of filtration	545
F. SCHIPP, Fast Fourier transform and conditional expectation	565
OLGA TAUSSKY, Sets of complex matrices which can be transformed to triangular form	579

J. TODD, Some applications of elliptic functions and integrals	591
GY. VARGA, Nonzero eigenvalues of singular matrices, Jordan normal form of matrices . . .	619
I.M. ZHILEIKIN - I. KÖRNYEI, On error estimation for approximate integration on the class $D_S^{\alpha, \beta, \gamma}(A, B)$	625
