SUMMARIES OF SURVEY LECTURES

R.L. Devaney: <i>Dynamics of entire maps</i>	1
S.E. Newhouse: <i>Geometric aspects of topological entropy</i>	10
J. Palis: <i>Centralizers of diffeomorphisms</i>	19
L. Blum, M. Shub & S. Smale¹: <i>On a theory of computation over the real numbers; NP completeness, recursive functions and universal machines</i>	23
F. Takens: <i>Homoclinic bifurcations</i>	53
R. Thom: <i>On the reversibility (or irreversibility) of time</i>	59
R.F. Williams: <i>Geometric theory of dynamical systems</i>	67
E.C. Zeeman: <i>Stochastic stability and classification of dynamical systems</i>	76

ABSTRACT OF SEMINAR TALKS

R. Bamón, R. Labarca & M.J. Pacifico: Bifurcating singular horseshoes	83
J. Basto Gonçalves: Controllability properties of families of vector fields	85
T. Bedford: Dimension for repellers in expanding cylinder maps	87
J. Beloqui & M.J. Pacifico: Quasi transversal saddle-node bifurcation	89
H.W. Broer: On some quasi-periodic bifurcations	94
M.I.T. Camacho: Genericity of hyperbolic homogeneous vector fields in \mathbb{R}^3	95
J. Casasayas & A. Nunes: Dynamics under anisotropic perturbations	97
A. Cascon: Dimension of dynamically defined Cantor sets	99
M. Chaperon: 1. Variations on Morse theory	101
2. A symplectic closing lemma and related questions	104

¹ Survey Lecture given by S. Smale.

G. Contreras-Barandiaran: Average linking numbers of closed orbits of hyperbolic flows	106
F. Dumortier: On the unfolding of certain codimension 3 singularities of planar vector fields	109
E. Fontich: Small diffusion near elliptic equilibrium points of Hamiltonian systems	111
X. Gómez-Mont: On the spaces of polynomial vector fields modulo projectivities	112
V. Guíñez: Positive quadratic differential forms and foliations on surfaces	118
R. Labarca & S. Plaza: Survey about stability of generic one-parameter families of vector fields	120
I. Labouriau: Global bifurcation diagrams for nerve impulse equations	125
F. Ledrappier: Stability of Lyapunov exponents under random perturbations	128
R. Markarian: Non-uniform hyperbolicity. Billiards	129
L. Mendoza: Continuity properties of invariant sets and measures of one dimensional maps	136
J. Montaldi: Non-linear normal modes in Hamiltonian systems	138
J. Muciño: Deformation of holomorphic foliations having a first integral	140
W. Oliva: Analytic integrability of Toda-like systems	142
E. Paul: Topological study of logarithmic foliations	143
R. Posthumus: Homoclinic points and moduli	146
D.A. Rand: The global rigidity conjecture and convergence of renormalisation.	147
K. Schmidt: Automorphisms of compact groups and their entropy	156
M.A. Teixeira: Stability conditions for discontinuous vector fields	157
M. Viana: Discontinuity of Hausdorff dimension and limit capacity on arcs of diffeomorphisms	158
P. Walters: Lifting invariant measures	159
K. Ziemian: Asymptotic variance and limit theorems for some maps of an interval	161
APPENDIX: Contributors' Addresses	163
