Contents

Series Preface v

Preface vii

List of Contributors xvii

1 Berry Phase and Dissipation of Topological Singularities 1
Ping Ao and Xiao-Mei Zhu
1 Introduction 1
2 Description of the Berry Phase and Dissipation 1
3 Effective Vortex Action 3
4 Discussion 7
5 References 8

2 Normal Mode Spectra of Multi-Skyrmions 11
W.K. Baskerville, C. Barnes, and N.G. Turok
1 Introduction 11
2 Method 12
3 Results and Interpretation of Spectra 13
4 References 20

3 Standard-Model Dirac Particles Trapped in Flat (Noncompact) Higher Dimensions 21
Ronald Bryan
1 Introduction 21
2 Dirac Particle in Eight Flat Dimensions 22
3 References 24

4 Planar QED in Magnetic or Electric Solitonic Backgrounds 27
Gerald Dunne
1 References 30

5 Collective Coordinates and Inequivalent Coset Space Quantizations 33
Juan Pedro Garrahan and Martín Kruczenski
1 References 36

6 Spatial Solitons of the Nonlinear Schrödinger Equation of Arbitrary Nonlinearity with a Potential Hill **39**
Boris V. Gisin
1 References 43

7 Hairs on the Unicorn: Fine Structure of Monopoles and Other Solitons **45**
Alfred S. Goldhaber
1 Monopoles and Unicorns 45
1.1 Origin in medieval Europe 46
1.2 Subject of a vast literature 46
1.3 Never confirmed or captured 46
1.4 Unique unity, not usual duplexity 46
1.5 Illuminates much about the world 46
1.6 Beautiful 46
1.7 Poor cousins exist 47
1.8 Instantly recognizable 47
1.9 Still hope of discovery 47
2 "Fundamental" and "Complementary" Solitons 47
3 Fractional and Peculiar Soliton Charges 49
4 Conditions for Integer F 51
5 Questions About and Applications of the Jackiw–Rebbi Monopole 53
6 Conclusions 54
7 References 54

8 A Model for Partially Polarized Quantum Hall States **57**
T.H. Hansson and U. Nilsson
1 References 61

9 Ordering Dynamics of Topological Defect Networks **63**
Mark Hindmarsh
1 References 66

10 Gauge Theory Description of Spin Chains and Ladders **69**
Yutaka Hosotani
1 References 72

11 Soliton Solutions of the Integrable Chiral Model in (2+1) Dimensions **75**
Theodora Ioannidou
1 Introduction 75
2 Construction of Soliton Solutions 76
3 References 79

12 String Winding Modes From Charge Nonconservation in Compact Chern–Simons Theory **81**
Ian I. Kogan
1 References 91

13 Holes in the Charge Density of Topological Solitons **93**
M. Kugler
1 Introduction 93
2 The Existence of Holes 94
3 Discussion 96
4 References 96

14 From Two-dimensional Black Holes to sine-Gordon Solitons **99**
J. Gegenberg and G. Kunstatter
1 Introduction 99
2 Black Holes in Jackiw–Teitelboim Gravity 100
3 From Black Holes to sine-Gordon Solitons 103
4 ... and Back Again 104
5 Speculations 105
6 References 106

15 Solitons and Exciton Superfluidity **107**
I. Loutsenko and D. Roubtsov
1 References 113

16 Quantum Effects on Higgs Winding Configurations **115**
Arthur Lue
1 Introduction 115
2 Asymptotic Behavior of the Effective Action 116
3 Discussion 117
4 References 118

17 Solitons and Their Moduli Spaces **119**
N.S. Manton
1 References 129

18 Deformed Skyrmions **131**
L. Marleau
1 Introduction 131
2 The Static Oblate Soliton 131
3 Collective Variables 132
4 Discussion 134
5 References 134

19 The Large-N_c Renormalization Group **137**
Nicholas Dorey and Michael P. Mattis
1 Introduction 137
2 Large-N_c Hadron Models 139
3 Summing the Leading-Order Graphs 140
4 Solving the Classical Field Equation 145
5 Large-N_c Renormalization Group 146
6 References 151

20 Instantons in Nonirreducible Representations of the Lorentz Group **153**
D.G.C. McKeon
1 References 157

21 Fermion Vacuum Effects on Soliton Stability **159**
Stephen G. Naculich
1 Nontopological Solitons 159
2 Kinks in the Linear Sigma Model 160
3 References 162

22 Soliton Solutions of the σ-Model and Disoriented Chiral Condensates **163**
Prasanta K. Panigrahi and C. Nagaraja Kumar
1 References 166

23 Dynamics of Topological Magnetic Solitons **167**
N. Papanicolaou
1 Introduction 167
2 Vorticity and Conservation Laws 168
3 Ferromagnets 172
4 Antiferromagnets 175
5 Superfluids 178
6 References 180

24 Fun with Baby-Skyrmions **183**
T. Gisiger and M.B. Paranjape
1 Introduction 183
2 Symmetries 183
3 Static and Spinning Baby-Skyrmions 184
4 The Model on S^3 or R^3 185
5 References 186

25 Skyrmions and Domain Walls **187**
B.M.A.G. Piette and W.J. Zakrzewski
1 Introduction 187

2 Domain Wall Solutions 188
3 References 190

26 Fun with Electroweak Solitons **191**
Edward Farhi, Jeffrey Goldstone, Arthur Lue, and Krishna Rajagopal
1 Introduction 191
1.1 The model 192
1.2 The soliton and the sphaleron 194
1.3 Over the barrier 195
1.4 Fermion production 197
1.5 Relating the model to the real world 198
2 Classical Dynamics for ξ Near ξ^* 199
3 Quantum Processes in the Fixed ΔE Limit 205
4 Concluding Remarks 210
5 References 211

27 Neutral and Charged Spin Excitations in the Quantum Hall Ferromagnet **213**
Rashmi Ray
1 Introduction 213
2 Notation and Formulation 214
3 Ferromagnetic Ground State 215
4 Effective Action for the Magnons 216
5 Charged Spin Skyrmions 217
6 Conclusions 217
7 References 217

28 Quantum Corrections to Monopoles **219**
G. Chalmers, M. Roček, and R. von Unge
1 References 223

29 Nonabelian Dyons **225**
B.J. Schroers
1 Outline of the Problem 225
2 SU(3) Monopoles and Their Moduli Spaces 227
3 Dyonic Quantum States and the Emergence of $U(2) \ltimes \mathbb{R}^4$ . . 230
4 Discussion and Outlook 232
5 References 233

30 Electroweak Baryon Properties in Soliton Models **235**
Norberto N. Scoccola
1 Introduction 235
2 The Model 235
3 Decuplet Radiative Decays 236

4 Hadronic Weak Decays of Octet Baryons 237
5 Conclusions 238
6 References 238

31 Solitons, Duality, and Supersymmetric Gauge Theories 241
Alfred D. Shapere
1 History 241
2 Seiberg and Witten's Solution 244
3 Solitons and Singularities 247
4 References 250

32 Solitonic Strings and Knots 253
R.A. Battye and P.M. Sutcliffe
1 References 260

33 Toward a String Formulation of Vortex Dynamics 263
Elsebeth Schröder and Ola Törnkvist
1 Introduction 263
2 String Formulation 264
3 The String Equation of Motion 264
4 Conclusions and Outlook 266
5 References 267

34 Domain Walls in a Chern–Simons Theory 269
M. Torres
1 The Model 269
2 Domain Walls 270
3 References 272

35 Microphysics of Gauge Vortices and Baryogenesis 273
Mark Trodden
1 Introduction 273
2 The Electroweak Theory and Sakharov 274
3 Electroweak Symmetry Restoration around Vortices 274
4 Defect-mediated Electroweak Baryogenesis 275
5 Conclusions 276
6 References 276

36 On a Dual Standard Model 279
Tanmay Vachaspati
1 Motivation 279
2 Construction of the Dual Model 280
3 Confinement 281
4 Families 281
5 Fermions 282

6 Conclusions 284
7 References 285

37 From Skyrmions to the Nucleon–Nucleon Potential 287
Jochen Wambach and Thomas Waindzoch
1 Introduction 287
2 The Skyrme Model 288
3 Interacting Skyrmions and the Gradient Flow Method 289
4 The Nucleon–Nucleon Potential 291
5 References 293

38 Two-dimensional Solitons at Finite Temperature 295
M. Kacir and I. Zahed
1 Introduction 295
2 Model Field Theory 296
3 High Temperature Behavior 298
4 Soliton Rest Mass 299
5 Propagating Soliton Mass 300
6 Energy Shift 304
7 Conclusions 305
8 References 306

39 Nontopological Structures in the Baby-Skyrme Model 309
B.M.A.G. Piette and W.J. Zakrzewski
1 Introduction 309
2 Pseudobreathers 310
3 Conclusions 312
4 References 312
