CONTENTS

Foreword to the Tenth Russian Edition ix

I. FUNCTIONS

1. Functions and Methods of Specifying Them 1
2. Notation for and Classification of Functions 3
3. Elementary Investigation of Functions 7
4. Elementary Functions 13
5. The Inverse Functions. Power, Exponential and Logarithmic Functions 20
6. The Trigonometric and Inverse Trigonometric Functions 24
7. Numerical Problems 29

II. LIMITS

1. Basic Definitions 31
2. Orders of Magnitude. Tests for the Existence of a Limit 34
3. Continuous Functions 37
4. Finding Limits. Comparison of Infinitesimals 40

III. DERIVATIVES AND DIFFERENTIALS. DIFFERENTIAL CALCULUS

1. Derivatives. The Rate of Change of a Function 54
2. Differentiation of Functions 58
3. Differentials. Differentiability of a Function 82
4. Derivative as Rate of Change (Further Examples) 87
5. Repeated Differentiation 97

IV. THE INVESTIGATION OF FUNCTIONS AND CURVES

1. The Behaviour of a Function "at a Point" 106
2. Applications of the First Derivative 107
3. Applications of the Second Derivative 120
4. Auxiliary Problems. Solution of Equations 125
5. Taylor's Formula and its Applications 135
6. Curvature 138
7. Numerical Problems 142

V. THE DEFINITE INTEGRAL

1. The Definite Integral and its Elementary Properties 144
2. Fundamental Properties of the Definite Integral 149

VI. THE INDEFINITE INTEGRAL. INTEGRAL CALCULUS

1. Elementary Examples of Integration 156
2. Basic Methods of Integration 161
3. Basic Classes of Integrable Functions 168

VII. METHODS OF EVALUATING DEFINITE INTEGRALS. IMPROPER INTEGRALS

1. Methods of Exact Evaluation of Integrals 177
2. Approximation Methods 187
3. Improper Integrals 192

VIII. APPLICATIONS OF THE INTEGRAL

1. Some Problems of Geometry and Statics 198
2. Some Problems of Physics 221

IX. SERIES

1. Numerical Series 234
2. Functional Series 239
3. Power Series 244
4. Some Applications of Taylor's Series 248
5. Numerical Problems 252

X. FUNCTIONS OF SEVERAL VARIABLES. DIFFERENTIAL CALCULUS

1. Functions of Several Variables 254
2. Elementary Investigation of a Function 257
3. Derivatives and Differentials of Functions of Several Variables 263
4. Differentiation of Functions 268
5. Repeated Differentiation 273

XI. APPLICATIONS OF THE DIFFERENTIAL CALCULUS FOR FUNCTIONS OF SEVERAL VARIABLES

1. Taylor's Formula. Extrema of Functions of Several Variables 279
2. Plane Curves 287

3. Vector Functions of a Scalar Argument. Curves in Space. Surfaces 289
4. Scalar Field. Gradient. Directional Derivative 297

XII. MULTIPLE INTEGRALS AND ITERATED INTEGRATION

1. Double and Triple Integrals 301
2. Iterated Integration 302
3. Integrals in Polar, Cylindrical and Spherical Coordinates 307
4. Applications of Double and Triple Integrals 311
5. Improper Integrals. Integrals Depending on a Parameter 324

XIII. LINE AND SURFACE INTEGRALS

1. Line Integrals 333
2. Coordinate Line Integrals 337
3. Surface Integrals 345

XIV. DIFFERENTIAL EQUATIONS

1. Equations of the First Order 349
2. Equations of the First Order (Continued) 365
3. Equations of the Second and Higher Orders 370
4. Linear Equations 376
5. Systems of Differential Equations 384
6. Numerical Problems 387

XV. TRIGONOMETRIC SERIES

1. Trigonometric Polynomials 390
2. Fourier Series 391
3. Krylov's Method. Harmonic Analysis 396

XVI. ELEMENTS OF THE THEORY OF FIELDS 397

ANSWERS

Chapter I 406
Chapter II 416
Chapter III 422
Chapter IV 442
Chapter V 463
Chapter VI 466

Chapter VII 490
Chapter VIII 496
Chapter IX 505
Chapter X 511
Chapter XI 524
Chapter XII 534
Chapter XIII 545
Chapter XIV 548
Chapter XV 572
Chapter XVI 576

APPENDIX. TABLES

1. Trigonometric Functions 580
2. Hyperbolic Functions 581
3. Reciprocals, Square and Cube Roots, Logarithms, Exponential Functions 581

Index 585

Other Volumes in the Series in Pure and Applied Mathematics 589
